This volume contains the altitude to 1' and true azimuth to 1° for the seven stars most suitable

for finding your position at sea with a sextant, for the complete range of latitudes and hour angles of Aries. Admiralty Rapid Sight Reduction Tables for Navigation Volume 1 The Sight Reduction Tables for Marine Navigation (Pub 229) is published in six Volumes, each of which contains two eight-degree zones of latitude with a one-degree overlap between Volumes. They are designed to facilitate the practice of celestial navigation at sea. The tables are primarily used with the Intercept method

of sight reduction by entering arguments of latitude, declination, and Local Hour Angle and obtaining tabulated altitudes and azimuth angles. Maritime Safety Information The British Admiralty call these Rapid Sight Reduction Tables; they are \$55 per volume, for the identical content. The US versions are online as free PDFs, although you could not print and bind them for the \$25 they sell for in print. Use of Vol. 1 takes a new approach to star sights. David Burch
