Ghoulia, Auntie Departed, and Tragedy the greyhound are back for another adventure at Crumbling Manor! They're preparing for the annual Dead but Not Departed New Year's Eve party. A young ghost arrives, and he seems to be fading away. Turns out, the ghost has forgotten his own name and is in danger of vanishing entirely—all because there's no one left alive who remembers him. Not on Ghoulia's watch! If she can help the ghost figure out his name, she'll be able to keep him safe. But will Ghoulia be able to discover the truth before it's too late? With all the hijinks and Tim Burton-style art that made Books #1 and #2 fan favorites, Book #3 is sure to deliver!

This easy-to-read 2010 book demonstrates how a simple geometric idea reveals fascinating connections and results in number theory, the mathematics of polyhedra, combinatorial geometry, and group theory. Using a systematic paper-folding procedure it is possible to construct a regular polygon with any number of sides. This remarkable algorithm has led to interesting proofs of certain results in number theory, has been used to answer combinatorial questions involving partitions of space, and has enabled the authors to obtain the formula for the volume of a regular tetrahedron in around three steps, using nothing more complicated than basic arithmetic and the most elementary plane geometry. All of these ideas, and more, reveal the beauty of mathematics and the interconnectedness of its various branches. Detailed instructions, including clear illustrations, enable the reader to gain hands-on experience constructing these models and to

discover for themselves the patterns and relationships they unearth.
