ELAINA BRADSHAW

Exploring Creation with Physical Science Apologia Educational Ministries
 The Ballad of the White Horse is a poem by G. K. Chesterton about the idealized exploits of the Saxon King Alfred the Great. Written in ballad form, the work is usually considered one of the last great traditional epic poems ever written in the English language. The poem narrates how Alfred was able to defeat the invading Danes at the Battle of Ethandun under the auspices of God working through the agency of the Virgin Mary. In addition to being a narration of Alfred's military and political accomplishments, it is also considered a Catholic allegory. Chesterton incorporates a significant amount of philosophy into the basic structure of the story. Aeterna Press
Exploring Creation with General Science 2nd Edition Aeterna Press
 Science in the context of the seven days of creation presented in the Bible. This textbook uses activities to reinforce scientific principles presented.

 Children have a natural desire to understand how things work in our world. Friendly Physical Science provides the pathway on which a child can explore and make sense of how and why things do what they do in our homes, schools and workplaces. Friendly Physical Science includes several hands-on, minds-on design engineering challenges (STEM) as well as labs to allow a student to experience the concepts presented in the lessons. A workbook and tests and solutions manual (sold separately) allow the student to practice the concepts and then verify their understanding. Friendly Physical Science is the first in the Friendly Sciences series which can be followed by Friendly Biology and Friendly Chemistry.
Legislative History of United States Tax Conventions Apologia Educational Ministries
 This should be the last course a student takes before high school biology. Typically, we recommend that the student take this course during the same year that he or she is taking prealgebra. Exploring Creation With Physical Science provides a detailed introduction to the physical environment and some of the basic laws that make it work. The fairly broad scope of the book provides the student with a good understanding of the earth's atmosphere, hydrosphere, and lithosphere. It also covers details on weather, motion, Newton's Laws, gravity, the solar system, atomic structure, radiation, nuclear reactions, stars, and galaxies. The second edition of our physical science course has several features that enhance the value of the course: * There is more color in this edition as compared to the previous edition, and many of the drawings that are in the first edition have been replaced by higher-quality drawings. * There are more experiments in this edition than there were in the previous one. In addition, some of the experiments that were in the previous edition have been changed to make them even more interesting and easy to perform. * Advanced students who have the time and the ability for additional learning are directed to online resources that give them access to advanced subject matter. * To aid the student in reviewing the course as a whole, there is an appendix that contains questions which cover the entire course. The solutions and tests manual

has the answers to those questions. Because of the differences between the first and second editions, students in a group setting cannot use both. They must all have the same edition. A further description of the changes made to our second edition courses can be found in the sidebar on page 32.

Exploring Creation with Physical Science

This booklet includes the full text of the ISTE Standards for Students, along with the Essential Conditions, profiles and scenarios.

Science in the Beginning

What separates people from apes? How can a Great Dane be related to a Chihuahua? Is there evidence that people and dinosaurs lived at the same time? What should you do if you encounter a bear? How can you tell if a snake is poisonous? Come find out answers to these questions and many, many more with Apologia's Exploring Creation with Zoology 3! This third book in the zoology series takes students on a safari through jungles, deserts, forests, farms, and even their own backyard to explore, examine and enjoy the enchanting creatures God designed to inhabit the terrain. Families will snuggle together and discover the amazing animals from primates to parasites, kangaroos to caimans, and turtles to terrifying T-Rexs this safari doesn't end there! Students will also keep a record of where each animal is found on a map and learn to identify animal tracks. As with all the Apologia elementary books, students will continue the practice of narration, keeping a notebook of what they have learned.

National Educational Technology Standards for Students

High-school level biology presented in an engaging way for elementary and middle school students.

Teaching High-school Science

Apologia's Marine Biology course is one of the few homeschool science courses that include an entire education on ecology. It gives students self-directed learning tools to ensure that they thrive and master key science concepts. God designed the earth's intricate ecosystem for his glory and the needs of those He created, and it is crucial for Christians in our day to accurately understand the ocean's ecosystems and resources and how we can best steward them.--Publisher

Exploring Creation with Chemistry and Physics

Lapbook Journals are designed to bring a more hands on learning aspect to all levels of Apologia science. This product includes 599 pages of helpful and organized tools for improved retention of this challenging topic ~ You choose which pages to use. Journal pages featuring decorative borders and eye pleasing graphics are included for all of the "On Your Own" questions. These are helpful and save time because the student doesn't have to re-write the questions and the journal pages can be easily organized into 3-ring binders. Review Questions for each module are represented in 2 formats, for the student to decide which to use. He may choose the journaling pages for these questions OR these questions may be completed on colorful booklets which each student can cut out and assemble. Practice Problem Questions are represented in journaling pages as well, so that the student has neatly organized space for each question. The Lab Report pages are partially completed with the list of supplies, complete instructions and procedures, they provide a consistent and orderly means of recording the outcome of each lab studied. We have recently developed Vocabulary Flash Cards to correlate with this book as well, and they are sold separately.

Novare Physical Science, Third Edition

This wonderful book uses the classical and Charlotte Mason methodology to give elementary school students an introduction to our solar system and the universe that contains it. Narration and notebooking are used to encourage critical thinking, logical ordering, retention, and record keeping. Each lesson in the book is organized with a narrative, some notebook work, an activity, and a project. The activities and projects use easy-to-find household items and truly make the lessons come alive! They include making a solar eclipse, making craters like those found on Mercury,

simulating the use of radar to determine hidden landscape, keeping track of the phases of the moon, making a telescope, making fog, and making an astrometer to measure the brightness of a star. Although designed to be read by the parent to elementary students of various grade levels, it is possible for students with a 4th-grade reading level to read this book on their own. Grades K-6.

Using Language Well, Book 1, Student Book

This CD contains a complete audio recording of the course Exploring Creation With Physics, Second Edition as read by Kathleen J. Wile. Although the audio for the complete text and On Your Own problems is included on the CD, the audio for the study guides, tests, and answers is not included. This is the perfect accompaniment to the book for students who are auditory learners, slow readers, or have other learning disabilities that make reading difficult."

Exploring Creation with Physics

In this book, your children will begin exploring the dynamics of flight and animal classification, understanding why the design we see in these incredible creatures points us to our Creator God. Then, get ready for the exciting adventure of learning about birds. Your children will learn how to attract various bird species to your yard and identify them by looking at their special physical characteristics, diverse nests, and interesting domestic practices. They will also learn the anatomy and the glorious design that enables birds to do remarkable things. The text contains actual experiments on the preferences and habits of the birds your children see. These experiments further

enrich the learning experience. After becoming amateur ornithologists, your children will explore the world of chiropterology, which is the study of bats. They will be able to intelligently share with others the value of bats in our world while exposing the misconceptions that most people have regarding these docile creatures of the night. Your children will then investigate entomology, the study of insects. They will learn to scientifically classify insects they find in their yard by a simple glance at their wings and other important characteristics. In addition to designing experiments with flies, crickets, darkling moths, and caterpillars, they will also learn how to attract and catch insects for scientific study. When your children complete this study of zoology, they will never view nature in the same way again. Their eyes will be open to the different species that live in their midst, enjoying and understanding nature to the fullest. Vacations will become educational experiences as they notice birds and insects inhabiting the areas they visit. By learning to keep a field journal, they will be able to notice unusual circumstances or sudden increases in bird or insect populations. They will become true scientists as they come to know nature and the fascinating world that God created.

Grades K-6.
