Washington's Anticommunist Crusade and the Mass Murder Program that Shaped Our World Random House
 Building from his acclaimed anthology *Tales of Two Americas*, beloved writer and editor John Freeman draws together a group of our greatest writers from around the world to help us see how the environmental crisis is hitting some of the most vulnerable communities where they live. In the past five years, John Freeman, previously editor of *Granta*, has launched a celebrated international literary magazine, *Freeman's*, and compiled two acclaimed anthologies that deal with income inequality as it is experienced. In the course of this work, one major theme

came up repeatedly: Climate change is making already dire inequalities much worse, devastating further the already devastated. But the problems of climate change are not restricted to those from the less developed world. Galvanized by his conversations with writers and activists around the world, Freeman engaged with some of today's most eloquent storytellers, many of whom hail from the places under the most acute stress--from the capital of Burundi to Bangkok, Thailand. The response has been extraordinary. Margaret Atwood conjures with a dys-topian future in a remarkable poem. Lauren Groff whisks us to Florida; Edwidge Danticat to Haiti; Tahmima Anam to Bangladesh; Yasmine El Rashidi to Egypt, while Eka Kurniawan brings us to Indonesia, Chinelo Okparanta to Nigeria, and Anuradha Roy to the Himalayas in the

wake of floods, dam building, and drought. This is a literary all-points bulletin of fiction, essays, poems, and reportage about the most important crisis of our times.

 Crisis? What crisis? How powerful corporations make a killing out of disaster Award-winning journalist Antony Loewenstein travels across the US, Britain, Afghanistan, Pakistan, Haiti, Papua New Guinea and Australia to witness the reality of Disaster Capitalism—the hidden world

of privatized detention centers and militarized private security, formed to protect corporations as they profit from war zones. He visits Britain's immigration detention centers, tours the prison system in the United States, and digs into the underbelly of the companies making a fortune from them. Loewenstein reveals the dark history of how large multinational corporations have become more powerful than governments, supported by media and political elites.

Capitalism Vs. The Climate Profile Books

Engaging stories in the form of Marxist journalism about US imperialism Washington Bullets is written in the best traditions of Marxist journalism and history-writing. It is a book of fluent and readable stories, full of detail about US imperialism, but never letting the minutiae obscure the larger political point. It is a book that could easily have been a song of despair—a lament of lost causes; it is, after all, a roll call of butchers and assassins; of plots against people's movements and governments; of the assassinations of socialists, Marxists, communists all over the Third World by the country where liberty is a statue. Despite all this, Washington Bullets is a book about possibilities, about hope, about genuine heroes. One such is Thomas Sankara of Burkina Faso—also assassinated—who said: 'You cannot carry out fundamental change without a certain amount of madness. In this case, it comes from nonconformity, the courage to turn your back on the old formulas, the courage to invent the future. It took the madmen of yesterday for us to be able to act with extreme clarity today. I want to be one of those madmen. We must dare to invent the future.' Washington Bullets is a book infused with this madness, the madness that dares to invent the future.

Disaster Capitalism Penguin

The Rise of Disaster Capitalism features Naomi Klein explaining the ideas and research behind her bestselling book, *The Shock Doctrine: The Rise of Disaster Capitalism*. In this riveting lecture and interview, Klein challenges and exposes the popular myth of the free market economy's peaceful global victory. Around the world there are people with power who are cashing in on chaos, exploiting bloodshed and catastrophe to brutally implement their policies. They are the shock doctors. From Chile in 1973 to Iraq today, this is the chilling tale of how a few are making a killing while more are getting killed.

Shocks, from natural disasters to military catastrophes, have long been exploited by the state to impose privatization, cuts and rampant free markets. This book argues that the left can use such moments of chaos to achieve emancipation. Graham Jones illustrates how everyone can help to exploit these shocks and bring about a new world of compassion and care. He examines how combining mutually reinforcing strategies of 'smashing, building, healing and taming' can become the basis of a unified left. His vivid personal experience underpins a compelling, practical vision for activism, from the scale of the individual body to the global social movement. This bold book is a toolkit for revolution for activists and radical millennials everywhere.

No Is Not Enough Simon and Schuster

The most powerful force in the world economy today is the redefinition of the relationship between state and marketplace - a process that goes by the name of privatization though this term is inadequate to express its far-reaching changes. We are moving from an era in which governments sought to seize and control the 'commanding heights' of the economy to an era in which the idea of free markets is capturing the commanding heights of world economic thinking. Basic views of how society ought to be organized are undergoing rapid change, trillions of dollars are changing hands and so is fundamental political power. Great new wealth is being created - as are huge opportunities and huge risks. Taking a worldwide perspective, including Britain, where the process began with Mrs Thatcher, Europe and the former USSR, China, Latin America and the US, **THE COMMANDING HEIGHTS** shows how a revolution in ideas is transforming the world economy - why it is happening, how it can go wrong and what it will mean for the global economy going into the twenty-

first century.

In twenty short books, Penguin brings you the classics of the environmental movement. In *Hot Money* Naomi Klein lays out the evidence that deregulated capitalism is waging war on the climate, and shows that, in order to stop the damage, we must change everything we think about how our world is run. Over the past 75 years, a new canon has emerged. As life on Earth has become irrevocably altered by humans, visionary thinkers around the world have raised their voices to defend the planet, and affirm our place at the heart of its restoration. Their words have endured through the decades, becoming the classics of a movement. Together, these books show the richness of environmental thought, and point the way to a fairer, saner, greener world.

How to Change Everything Metropolitan Books

The New York Times–bestselling roadmap to resistance in the Trump era from the internationally acclaimed activist and author of *On Fire* and *The Battle for Paradise*. The election of Donald Trump is a dangerous escalation in a world of cascading crises. Trump's vision—a radical deregulation of the US economy in the interest of corporations, an all-out war on "radical Islamic terrorism," and a sweeping aside of climate science to unleash a domestic fossil fuel frenzy—will generate wave after wave of crises and shocks, to the economy, to national security, to the environment. In *No Is Not Enough*, Naomi Klein explains that Trump, extreme as he is, is not an aberration but a logical extension of the worst and most dangerous trends of the past half-century. In exposing the malignant forces behind Trump's rise, she puts forward a bold vision for a mass movement to counter rising militarism, nationalism, and corporatism in the United States and around the world. Longlisted for the National Book Award "I hope that Klein's book is read by more than just her (mostly) leftwing fan base. For whatever you think about her economic arguments, she makes a powerful and an important point: that you cannot understand Trump without looking at how he reflects bigger cultural and social dynamics. And what is perhaps refreshing about *No Is Not Enough* is that Klein tries to move beyond mere outrage and hand-wringing to offer a practical manifesto for opposition." —Financial Times "Brimming with ideas rarely heard in the mainstream media. And her fiery, punchy writing style, which is occasionally laced with humor, makes it

hard to put down." —The Georgia Straight [Stories of Climate Change and Inequality in a Divided World](#) Anchor

Fences and Windows: Dispatches from the Front Lines of the Globalization Debate brings together two years of Naomi Klein's writings and tracks the globalization conflict from Seattle to September 11th and beyond. Since the publication of *No Logo*, Naomi Klein has continued tirelessly as a brilliant and informed contributor to contemporary debate. *Fences and Windows: Dispatches from the Front Lines of the Globalization Debate*, intended as a companion to *No Logo*, includes her most notable essays, speeches and articles on issues from NAFTA to Genetically Modified Organisms to the violence in Genoa. It offers introduction and explanation, looking at where the movement has come from and where it is going. More than any other single voice, Naomi Klein articulates the concerns and complaints of a generation: about economic fundamentalism, the criminalization of dissent and the effects of Free Trade. But this book also reflects on the nature of resistance: the street protests that shocked and energized millions, carnival-style subversion and the apparent disorganization that is anti-globalization's great strength. *Fences and Windows: Dispatches from the Front Lines of the Globalization Debate* is provocative, intelligent and passionate, a document, in its own right, of a unique time in our history.

Richly informed and written in an engaging style, *Against Empire* exposes the ruthless agenda and hidden costs of the U.S. empire today. Documenting the pretexts and lies used to justify violent intervention and maldevelopment abroad, Parenti shows how the conversion to a global economy is a victory of finance capital over democracy. As much of the world suffers unspeakable misery and the Third-Worldization of the United States accelerates, civil society is impoverished by policies that benefit rich and powerful transnational corporations and the national security state. Hard-won gains made by ordinary people are swept away. "A valuable rebuttal to the drumbeat...from the right." —New York Times Book Review "Entertainingly written." —Publishers Weekly "Parenti writes clear, smooth, often provocative prose, has a way of cutting to the heart of complex issues and knows how to tell a story." —Allan Johnson, Author of *Human Arrangements* Michael Parenti, PhD Yale, is an internationally known author and lecturer. He is one of the nation's leading progressive political analysts. He is the author of over 275 published articles and twenty books. The shock doctrine is the unofficial story of how the "free market" came to dominate the world, from Chile to Russia, China to Iraq, South Africa to Canada. But it is a story radically different from the one usually told. It is a story about violence and shock perpetrated on people, on countries, on economies. About a program

of social and economic engineering that Naomi Klein calls "disaster capitalism." Based on breakthrough historical research and 4 years of reporting in disaster zones, Klein explodes the myth that the global free market triumphed democratically, and that unfettered capitalism goes hand-in-hand with democracy. Instead, she argues it has consistently relied on violence and shock, and reveals the puppet strings behind the critical events of the last 40 years. "The shock doctrine" is the influential but little understood theory that in order to push through profoundly unpopular policies that enrich the few and impoverish the many, there must be a collective crisis or disaster—real or manufactured. Klein vividly traces the origins of modern shock tactics to the economic lab of the University of Chicago under Milton Friedman in the 60s, and beyond to the CIA-funded electroshock experiments at McGill in the 50s which helped write the torture manuals used today at Guantanamo Bay. She details the events of the recent past that have been deliberate theatres for the shock doctrine: among them, Pinochet's coup in Chile in 1973, the Tiananmen Square Massacre in 1989, the collapse of the Soviet Union in 1991; and, more recently, the September 11 attacks, the invasion of Iraq, the Asian tsunami and Hurricane Katrina. And she shows how—in the hands of the Bush Administration—the "war on terror" is a thin cover for a thriving destruction/reconstruction complex, with disasters, wars and homeland security fuelling a booming new economy. Naomi Klein has once again written a book that will change the way we see the world. *America's Quest for Global Dominance* Penguin UK

This work analyzes the future of capitalism, and charts a course for surviving and winning in the years ahead.

Around the world in Britain, the United States, Asia and the Middle East, there are people with power who are cashing in on chaos; exploiting bloodshed and catastrophe to brutally remake our world in their image. They are the shock doctors. Thrilling and revelatory, *The Shock Doctrine* cracks open the secret history of our era. Exposing these global profiteers, Naomi Klein discovered information and connections that shocked even her about how comprehensively the shock doctors' beliefs now dominate our world - and how this domination has been achieved. Raking in billions out of the tsunami, plundering Russia, exploiting Iraq - this is the chilling

tale of how a few are making a killing while more are getting killed.

Essays on the contemporary continuum of incarceration: the biopolitics of juvenile delinquency, predatory policing, the political economy of fees and fines, and algorithmic policing. What we see happening in Ferguson and other cities around the country is not the creation of livable spaces, but the creation of living hells. When people are trapped in a cycle of debt it also can affect their subjectivity and how they temporally inhabit the world by making it difficult for them to imagine and plan for the future. What psychic toll does this have on residents? How does it feel to be routinely dehumanized and exploited by the police? —from *Carceral Capitalism* In this collection of essays in Semiotext(e)'s Intervention series, Jackie Wang examines the contemporary incarceration techniques that have emerged since the 1990s. The essays illustrate various aspects of the carceral continuum, including the biopolitics of juvenile delinquency, predatory policing,

the political economy of fees and fines, cybernetic governance, and algorithmic policing. Included in this volume is Wang's influential critique of liberal anti-racist politics, “Against Innocence,” as well as essays on RoboCop, techno-policing, and the aesthetic problem of making invisible forms of power legible. Wang shows that the new racial capitalism begins with parasitic governance and predatory lending that extends credit only to dispossess later. Predatory lending has a decidedly spatial character and exists in many forms, including subprime mortgage loans, student loans for sham for-profit colleges, car loans, rent-to-own scams, payday loans, and bail bond loans. Parasitic governance, Wang argues, operates through five primary techniques: financial states of exception, automation, extraction and looting, confinement, and gratuitous violence. While these techniques of governance often involve physical confinement and the state-sanctioned execution of black Americans, new carceral modes have blurred the distinction between the inside and outside of prison. As technologies of control are perfected, carcerality tends to bleed into society.
