The World Fantasy Award-winning novel of a female deity trying to save a modern world gone mad—"Invites comparisons with Vonnegut and even Rushdie" (The Washington Post). Rejoice! A new messiah has come, and her name is Julie. Born to Murray Katz, the solitary (and celibate) keeper of an abandoned lighthouse on the Jersey shore, our protagonist arrives on Earth boasting supernatural abilities evocative of her divine half brother, Jesus. As a child, she revels in her talent for walking on water, resurrecting dead crabs, and treating fireflies as luminous alphabet blocks. But after she reaches adolescence, her life becomes as challenging and ambiguous as any mortal's. Not only is Julie Katz obliged to deal with a silver-tongued devil and self-righteous neo-Christian zealots, she must also figure out what sort of mission her mother—the female Supreme Being—has in mind for her. At once outrageous and affirming, this Nebula Award finalist is a magnificent work of contemporary satire that holds a mirror up to human nature, astutely reflecting our species' failings, foibles, and often misguided affections.

Change initiatives fail because humans are hardwired to return to what's worked for us in the past. This book offers a straightforward process for rewiring ourselves and those we lead to be more change-capable. Erika Andersen says avoiding change has been a historical imperative. In this book, she shows how we can overcome that reluctance and get good at making necessary change. Using a fictional story about a jewelry business changing generational hands, Andersen lays out a five-step model for addressing both this human side of change and its practical aspects: Step 1: Clarify the change and why it's needed—Get clear on what the change is and the benefits it will bring. Step 2: Envision the future state—Build a shared picture of the post-change future. Step 3: Build the change—Bring together a change team, engage key stakeholders, and plan the change. Step 4: Lead the transition—Build a transition plan that supports the human side of the change, then engage the whole organization in making the change. Step 5: Keep the change going—Work to make your organization permanently more change-capable. With opportunities to self-reflect and try out the ideas and approaches throughout, this book is a practical guide to thriving in this era of nonstop change.

NPR Books We Love 2021 selection "If you're only going to read one Everest book this decade, make it *The Third Pole*. . . . A riveting adventure."—Outside Shivering, exhausted, gasping for oxygen, beyond doubt . . . A hundred-year mystery lured veteran climber Mark Synnott into an unlikely expedition up Mount Everest during the spring 2019 season that came to be known as "the Year Everest Broke." What he found was a gripping human story of impassioned characters from around the globe and a mountain that will consume your soul—and your life—if you let it. The mystery? On June 8, 1924, George Mallory and Sandy Irvine set out to stand on the roof of the world, where no one had stood before. They were last seen eight hundred feet shy of Everest's summit still "going strong" for the top. Could they have succeeded decades before Sir Edmund Hillary and Tenzing Norgay? Irvine is believed to have carried a Kodak camera with him to record their attempt, but it, along with his body, had never been found. Did the frozen film in that camera have a photograph

of Mallory and Irvine on the summit before they disappeared into the clouds, never to be seen again? Kodak says the film might still be viable. . . . Mark Synnott made his own ascent up the infamous North Face along with his friend Renan Ozturk, a filmmaker using drones higher than any had previously flown. Readers witness first-hand how Synnott's quest led him from oxygen-deprivation training to archives and museums in England, to Kathmandu, the Tibetan high plateau, and up the North Face into a massive storm. The infamous traffic jams of climbers at the very summit immediately resulted in tragic deaths. Sherpas revolted. Chinese officials turned on Synnott's team. An Indian woman miraculously crawled her way to frostbitten survival. Synnott himself went off the safety rope—one slip and no one would have been able to save him—committed to solving the mystery. Eleven climbers died on Everest that season, all of them mesmerized by an irresistible magic. *The Third Pole* is a rapidly accelerating ride to the limitless joy and horror of human obsession.

"Abbie Hoffman, Yippie non-leader, notorious dope addict and up-and-coming rock group (the WHAT), is currently on trial with seven others for conspiracy to incite riot during the Democratic Convention. When he returned from the Woodstock Festival he had five days before leaving for Chicago to prepare for the trial. Woodstock Nation, which the author wrote in longhand while lying upside down, stoned, on the floor of an unused office of the publisher, is the product of those five days. Other works by Mr. Hoffman include *Revolution for the Hell of It* and *Fuck the System*, which he describes as a "tender love epic".-- Back cover.
