In *Negotiating the New in the French Novel* Teresa Bridgeman applies insights from pragmatic theory to the French novel in order to examine its discourse conventions. Focussing on texts by some of the greatest and most innovative French novelists - Diderot, Balzac, Flaubert, Zola, Celine, Sarraute and Perec - Bridgeman analyses how these authors established their own conventions, challenged reader expectations and drew conventions from other literary and non-literary forms. *Negotiating the New in the French Novel* shows the development of changing perceptions of genre, author and reader. This book will make fascinating reading for students of French literature - particularly of the nineteenth century novel, students of Stylistics and of Narratology.

The Mabinogion, from the Welsh of the Llyfr coch o Hergest, tr., with notes, by lady C. Guest Univ of North Carolina Press
Elite Romans periodically chose to limit or destroy the memory of a leading citizen who was deemed an unworthy member of the community. Sanctions against memory could lead to the removal or mutilation of portraits and public inscriptions. Harriet Flower provides the first chronological overview of the development of this Roman practice--an instruction to forget--from archaic times into the second century A.D. Flower explores Roman memory sanctions against the background of Greek and Hellenistic cultural influence and in the context of the wider Mediterranean world. Combining literary texts, inscriptions, coins, and material evidence, this richly illustrated study contributes to a deeper

understanding of Roman political culture.

"Throughout the whole vast shadowy world of ghosts and demons there is no figure so terrible, no figure so dreaded and abhorred, yet [looked upon] with such fearful fascination, as the vampire, who is himself neither ghost nor demon, but yet who partakes the dark natures and possesses the mysterious and terrible qualities of both." So begins this riveting study by one of the foremost authorities on witchcraft and occult phenomena. An indefatigable researcher, Summers explores the presence of vampires in Greek and Roman lore, in England and Ireland during Anglo-Saxon times, in Hungary, Czechoslovakia, Russia, Romania, and Bulgaria, even in modern Greece. More than just a collection of library lore, however, this detailed examination of the history of vampirism in Europe also includes anecdotes and firsthand accounts gathered by the author from peasants in places where belief in vampires was still common. A fascinating, sometimes terrifying book, *The Vampire in Lore and Legend* is a "mine of out-of-the-way information full of unspeakable tales," writes *The New York Times*; and according to *Outlook*, "a fascinating inquiry into the vampire legend . . . a storehouse of curious and interesting lore." Of great interest to any enthusiast of the supernatural and the occult, this book will appeal as well to the legions of general readers captivated by this ancient myth.

Originally published in 1915, this is a biography of the writer, philanthropist, and traveler, considered responsible for the foreign war that ended only with the fall of Napoleon, known as the leader of the Girondins, and when that party fell he was brought to trial and execution. Contains a fair amount of information concerning his time in America.

The remarkable first-hand account of Margret Wittmer, who settled the island of Floreana in the Galapagos-600 miles from the mainland of Ecuador. It took Wittmer and her family weeks to travel to the island in 1932; they battled with the ties for three full days before they could land. Wittmer and her husband left their home and family in Germany, seeking a new life in a place not yet touched by civilization. Their first home was a cave, previously

abandoned by pirates. They planted their first garden, only to find it torn up continually by wild boars. Five months pregnant when she arrived, Wittmer found the beauty of the tropical island constantly tempered by the traumas of attempting everyday life in a wild and lonely spot. From the mysterious disappearance of a stranger linked to another recluse on the island, to a missed opportunity to meet President Franklin D. Roosevelt. The 56 years recalled in this memoir are full of exotic adventures and the joys and tragedies of a lifetime.

Comprising Inquiries Into the Modifying Influence of Physical and Moral Agencies on the Different Tribes of the Human Family En

THE NEW YORK TIMES BESTSELLER "The seminal book on the child-separation policy." —Rachel Maddow The award-winning NBC News correspondent lays bare the full truth behind the Trump administration's systematic separation of families at the US-Mexico border. Los Angeles Times Book Prize Finalist | American Bar Association's Silver Gavel Award Finalist In June 2018, Donald Trump's most notorious decision as president had secretly been in effect for months before most Americans became aware of the astonishing inhumanity being perpetrated by their own government. Jacob Soboroff was among the first journalists to expose this reality after seeing firsthand the living conditions of the children in custody. His influential series of reports ignited public scrutiny that contributed to the president reversing his own policy and earned Soboroff the Cronkite Award for Excellence in Political Broadcast Journalism and, with his colleagues, the 2019 Hillman Prize for Broadcast Journalism. But beyond the headlines, the complete, multilayered story lay untold. How, exactly, had such a humanitarian tragedy—now deemed "torture" by physicians—happened on American soil? Most important, what has been the human experience of those separated children and parents? Soboroff has spent the past two years reporting the many strands of this complex narrative, developing sources from

within the Trump administration who share critical details for the first time. He also traces the dramatic odyssey of one separated family from Guatemala, where their lives were threatened by narcos, to seek asylum at the U.S. border, where they were separated—the son ending up in Texas, and the father thousands of miles away, in the Mojave desert of central California. And he joins the heroes who emerged to challenge the policy, and who worked on the ground to reunite parents with children. In this essential reckoning, Soboroff weaves together these key voices with his own experience covering this national issue—at the border in Texas, California, and Arizona; with administration officials in Washington, D.C., and inside the disturbing detention facilities. *Separated* lays out compassionately, yet in the starkest of terms, its human toll, and makes clear what is at stake as America struggles to reset its immigration policies post-Trump.

History of the Urquhart family originally of Scotland and later in North Carolina, Georgia, Alabama, South Carolina, Texas and elsewhere. John Urquhart (1802-1849) was believed to have been born in Cumberland Co., N.C., and died in Talbot or Marion Co., Georgia. He was married (1) ca. 1830 in Butts Co., Ga. to a widow, Ruth Mitchel Rhodes (1786-1835). She had seven children with her first husband William Rhodes. She and John Urquhart had no children. He married (2) 1837 in Talbot Co., Ga. Euphemia Parker (1813-1877), the daughter of Stephen W. Parker and Elizabeth Ridley. They were parents of three children: William Henry (1838-1864); Maryan Elizabeth (1840-1844); and Amanda M. (1850-1926).

The radical break with the past heralded by the French Revolution in 1789 has become one of the mythic narratives of our time. Yet in the drawn-out afterlife of the Revolution, and through subsequent periods of Empire, Restoration, and Republic, the question of what such a temporal transformation might involve found complex, often unresolved expression in visual and material culture. This diverse collection of essays draws attention to the eclectic objects and forms of visuality that emerged in France from the beginning of the French Revolution through to the end of the July Monarchy in 1848. It offers a new account of

the story of French art's modernity by exploring the work of genre painters and miniaturists, sign-painters and animal artists, landscapists, architects, and printmakers, as they worked out what it meant to be post-revolutionary.

The words 'aristocrats', 'aristocracy' and 'aristocratic values' appear in many a study of ancient history and culture. Sometimes these terms are used with a precise meaning. More often they are casual shorthand for 'upper class', 'ruling elite' and 'high standards'. This book brings together 12 new studies by an impressive international cast of specialists. It demonstrates not only that true aristocracies were rare in the ancient world, but also that the modern use of 'aristocracy' in a looser sense is misleading. The word comes with connotations derived from medieval and modern history. Antiquity, it is here argued, was different. An introductory chapter by the editors argues that 'aristocracy' is rarely a helpful concept for the analysis of political struggles, of historical developments or of ideology. The editors call instead for close study of the varied nature of social inequalities and relationships in particular times and places. The following eleven chapters explore and in most cases challenge the common assumption that hereditary 'aristocrats' who derive much of their status, privilege and power from their ancestors are identifiable at most times and places in the ancient world. They question, too, the related notion that deep ideological divisions existed between 'aristocratic values', such as hospitality, generosity and a disdain for commerce or trade, and the norms and ideals of lower or 'middling' classes. They do so by detailed analysis of archaeological and literary evidence for the rise and nature of elites and leisure classes, diverse elite strategies, and political conflicts in a variety of states across the Mediterranean.

Chapters deal with archaic and classical Athens, Samos, Aigina and Crete; the Greek 'colonial' settlements such as Sicily; archaic Rome and central Italy; and the Roman empire under the Principate.

Inside an American Tragedy

Years ago, people knew without a doubt that the Earth was flat. Even the top scientists of the day were certain that the sun revolved around the earth. Today, most people are sure that life on Earth is either the result of random evolution or a supernatural God. Or is it? In 'Intelligent Design', Rael presents us with a third option: that life on Earth was created by advanced human scientists from another world. In 1973, Rael was visited by one of these designers, who dictated a series of messages to him to share with all of humanity. This astonishing 'message from the designers' reveals knowledge on science, religion, love, relationships, government, meditation, infinity, sensuality, eternal life, and so much more, giving us the secrets to the past, present, and future of mankind...

The Border Elliots and the Family of Minto

"It is the design of the following work, to furnish for the use of general readers, a brief and popular view of all the physical characteristics, or varieties in colour, figure, structure of body,

and likewise of the moral and intellectual peculiarities which distinguish from each other the different races of men. It is likewise intended, in the same treatise, to comprise such an account of the nature and causes of these phenomena as the present state of knowledge will afford. For the completion of this design, it was necessary to describe all the different tribes of people scattered over the world, and to advert, however briefly, to their mutual relations, and to all that is known respecting their origin and descent, as discovered by historical and philological investigations. Very brief, indeed, must necessarily be such a

summary of universal ethnography. It was only possible to state, and that in a manner rather summary than argumentative, results, in which inquiring persons can hardly be expected to acquiesce without the exhibition of unquestionable evidence"-- Foreword.
