FITZPATRICK HOPE

A Novel Macmillan

Designed for the introductory computer science subject at MIT, this book presents a unique conceptual introduction to programming that should make it required reading for every computer scientist. The authors' main concern is to give their readers command of the major techniques used to control the complexity of large software systems: building abstractions, establishing conventional interfaces, and establishing new descriptive languages. Structure and Interpretation of Computer Programs covers a wide range of material, from simple numerical

programs, through symbol manipulation, logic programming, interpretation, and compilation. Main sections of the book are: Building Abstractions with Procedures; Building Abstractions with Data; Modularity, Objects, and State, Meta-Linguistic Abstraction; and Computing with Register Machines. Each chapter includes numerous exercises and programming projects. As a programming language, the book uses Scheme, a modern dialect of LISP, which incorporates block structure and lexical scoping. This book inaugurates the MIT Electrical Engineering and Computer Science series, copublished with McGraw Hill.

Damaged Portland detective Archie Sheridan spent ten years tracking Gretchen Lowell, a beautiful serial killer, but in the end she was the one who caught him. Two years ago, Gretchen

kidnapped Archie and tortured him for ten days, but instead of killing him, she mysteriously decided to let him go. She turned herself in, and now Gretchen has been locked away for the rest of her life, while Archie is in a prison of another kind---addicted to pain pills, unable to return to his old life, powerless to get those ten horrific days off his mind. Archie's a different person, his estranged wife says, and he knows she's right. He continues to visit Gretchen in prison once a week, saying that only he can get her to confess as to the whereabouts of more of her victims, but even he knows the truth---he can't stay away. When another killer begins snatching teenage girls off the streets of Portland, Archie has to pull himself together enough to lead the new task force investigating the murders. A hungry young newspaper reporter, Susan Ward, begins profiling Archie and the investigation, which sparks a deadly game between Archie, Susan, the new killer, and even Gretchen. They need to catch a killer, and maybe somehow then Archie can free himself from Gretchen, once and for all. Either way, *Heartsick* makes for one of the most extraordinary suspense debuts in recent memory.

From "a major new talent" come short stories set in modern Nepal, about arranged marriages, forbidden desires, and the universal yearning for human connection (Amitav Ghosh). Set in a city where gods are omnipresent, privacy is elusive, and family defines identity, these are stories of men and women caught between their own needs and the demands of their society and culture. Psychologically rich and astonishingly acute, with "a masterful narrative style" (Ian MacMillan), *Arresting God* in Kathmandu introduces a potent new voice in contemporary fiction. "Upadhyay brings to readers the flavor of Nepal and its culture in this impressive collection of nine short stories. Like Ha Jin's *Bridegroom*, Upadhyay's stories portray the lives of simple yet psychologically complex characters and reveal much about the universal human condition in us all. . . . Upadhyay's stories leave the reader with much food for thought and will make a good choice for book discussion groups." —Library Journal

Mutual-fund superstar Peter Lynch and author John Rothchild explain the basic principles of the stock market and business in an investing guide that will enlighten and entertain anyone who is high-school age or older. Many investors, including some with

substantial portfolios, have only the sketchiest idea of how the stock market works. The reason, say Lynch and Rothchild, is that the basics of investing—the fundamentals of our economic system and what they have to do with the stock market—aren't taught in school. At a time when individuals have to make important decisions about saving for college and 401(k) retirement funds, this failure to provide a basic education in investing can have tragic consequences. For those who know what to look for, investment opportunities are everywhere. The average high-school student is familiar with Nike, Reebok, McDonald's, the Gap, and the Body Shop. Nearly every teenager in America drinks Coke or Pepsi, but only a very few own shares in either company or even understand how to buy them. Every student studies American history, but few realize that our country was settled by European colonists financed by public companies in England and Holland—and the basic principles behind public companies haven't changed in more than three hundred years. In *Learn to Earn*, Lynch and Rothchild explain in a style accessible to anyone who is high-school age or older how to read a stock table in the daily newspaper, how to understand a company annual report, and why everyone should pay attention to the stock market. They explain not only how to invest, but also how to think like an investor.

IIENC 2020 Simon and Schuster

Karnali Blues, by Buddhisagar, is the most widely read Nepali novel to have appeared in the last twenty years. As it recounts

the evolution of a father-son relationship-a son's search for approval, a father's small acts of kindness and forgiveness, a son's fears for his father's dignity as his fortunes and faculties begin to fail-the reader is deeply drawn into young Brisha Bahadur's world. His father is kind and idealistic; his mother, though she is kind too, is often frustrated and irascible. The characters in this book are some of the most carefully drawn and authentic in all of Nepali literature. In a backwater district of a country about to undergo radical social, political and cultural change, Brisha's dreams, his games and his mischief, his loves, his hopes and his fears come alive. Translated from the Nepali by Michael Hutt, this highly original piece of work, with the simplicity of its language and its emotional range, holds the power to take your breath away. Its principal themes-the love between a son and his father, the joys and sorrows of childhood, the daily struggle for survival-are universal, and will resonate with readers the world over.

A beautiful story of strangers who shape each other's lives in fateful ways, *All of Us in Our Own Lives* delves deeply into the lives of women and men in Nepal and into the world of international aid. Ava Berriden, a Canadian lawyer, quits her corporate job in Toronto to move to Nepal, from where she was adopted as a baby. There she struggles to adapt to her new career in international aid and forge a connection with the country of her birth. Ava's work brings her into contact with Indira Sharma, who has ambitions of becoming the first Nepali woman director of a NGO; Sapana Karki, a bright young teenager living a small village; and Gyanu, Sapana's brother, who has returned home from Dubai to settle his sister's future after their father's death. Their journeys collide in unexpected ways. *All of Us in Our Own Lives* is a stunning, keenly observant novel about human interconnectedness, about privilege, and about the ethics of international aid (the earnestness and idealism and yet its cynical, moneyed nature).
