Real-Life Applications of the Internet of Things Butterworth-Heinemann

This two-volume set constitutes the refereed proceedings of the 5th International Conference on Computational Intelligence in Communications and Business Analytics, CICBA 2023, held in Kalyani, India, during January 27-28, 2023. The 52 full papers presented in this volume were carefully reviewed and selected from 187 submissions. The papers present recent research on intersection of computational intelligence, communications, and business analytics, fostering international collaboration and the dissemination of cutting-edge research.

The Art of the Musculoskeletal Physical Exam Taylor & Francis
Digital innovations, such as mobile technologies, have had a significant impact on the way people relate to one another, as well as the way they obtain and distribute information. As mobile devices continue to evolve, it has become easier to socialize; however, these mobile advancements have also made certain

aspects of interaction more complex. The Handbook of Research on Human Social Interaction in the Age of Mobile Devices features an interdisciplinary perspective on mobile innovations and the use of this technology in daily life. Investigating the successes, issues, and challenges of the utilization of mobile technology, this handbook of research is a comprehensive reference source for professionals, educators, policymakers, and students interested in the impact these devices have on digital interaction, media, and communication.

Going Online Cengage AU

Affect and Social Media is an edited collection of twenty bite sized articles by leading scholars from across disciplinary boundaries. It is comprised of four distinct but related sections which are interspersed with artistic illustrations, depicting the affectivities that flow through social media. The term 'affect' denotes a rather slippery concept that is not as easily caught as for example 'emotion' or 'feeling'. Quite often it denotes a more than or an excess to that which is felt in the human body or indexed through cultural grids of meaning. It can exist in ways which defy expectations, conventions, and representations. It is often understood as that which is vital to the emergence of the new

and hence socio-cultural revolution. As life shifts ever more online, we find ourselves caught up in the affective flows of computer mediated practices into an ever expanding and indeterminate horizon. This compilation of articles that were initially presented at an international conference in East London, were selected on the basis of their ability to depict and conceptualise these radical movements of sociality.

The United States Army and Navy Journal and Gazette of the Regular and Volunteer Forces Springer Nature

Extending from the belief that masculinities are multiple, consisting of complexities and constructions that make up the traits associated with each, this book explores the various ways in which boys and men are conditioned to view women as inferior to themselves and predominantly sexual objects—and the deleterious effects this has on both women and men, society, and culture at large. Beginning in childhood, the book provides a critical framework to understand one form of masculinity referred to as "bro culture," and how it is reproduced and reinforced through popular culture, social institutions, and patriarchal forms of religion and politics. Weaving together current research with illuminating historical and contemporary examples, Thomas Keith unpacks the attitudes, beliefs, and behaviors that constitute this subculture and reveals the ways in which traditional and outdated codes of manhood, power, and gender relations have evolved into problematic forms of sexism, misogyny, and abuse. For as much as popular culture is revealed to be a contributing factor in the passage of bro codes, the book also includes examples of cultural forces that are challenging and seeking to overthrow the core tenets in powerful and lasting ways. Timely and thought-provoking, *The Bro Code* addresses the implications of an enduring social problem and moves us to reflect on ways to empower men away from this toxic form of masculinity.

Proceedings of the 17th European Conference on Game-Based Learning MSU Press

This book contains selected papers presented during the World Renewable Energy Congress (WREC) 2020 at the Instituto Superior Técnico in Lisbon. The WREC is dedicated to promoting renewable energy global development, and features top international experts, policy makers, scientists, engineers, technology developers, and business practitioners addressing the most current research and technological breakthroughs in sustainable energy development and innovation. The contributions address policy and renewable energy technologies and applications in all sectors—for heating and cooling, agricultural applications, water, desalination, industrial applications, and for the transport sectors. Presents cutting-edge research in green building and renewable energy from all over the world; Covers the most up-to-date research developments, government policies, business models, best practices, and innovations; Contains case studies and examples to enhance practical application of the technologies.

The Rise of Smart Cities R. R. Bowker

Delinquency in Society, Tenth Edition provides a comprehensive and systematic overview of juvenile delinquency, criminal behavior, and status-offending youths.

Billboard Rowman & Littlefield

This new volume provides an overview of the Internet of Things along with its architectures, its vital technologies, and their uses in our daily life. The book explores the integration of IoT with other emerging technologies, such as blockchain and cloud. Topics in the volume cover the many powerful features and applications of IoT, such as for weather forecasting, in agriculture, in medical science, in surveillance systems, and much more. The first section of the book covers many of the issues and challenges that arise from the Internet of Things (IoT),

exploring security challenges, such as attack detection and prevention systems, as well as energy efficiency and resource management in IoT. The volume also introduces the use of IoT and smart technology in agricultural management, in healthcare diagnosis and monitoring, and in the financial industry. Chapters also focus on surveillance network technology, the technology shift from television to video streaming apps, using IoT-fog computing for smart healthcare, detection of anomalies in climate conditions, and even detection of illegal wood logging activity.

NSCA's Essentials of Sport Science Routledge

In Going Online, one of our most respected online learning leaders offers insights into virtual education—what it is, how it works, where it came from, and where it may be headed. Robert Ubell reaches back to the days when distance learning was practiced by mail in correspondence schools and then leads us on a tour behind the screen, touching on a wide array of topics along the way, including what it takes to teach online and the virtual student experience. You'll learn about: how to build a sustainable online program; how to create an active learning online course; why so many faculty resist teaching online; how virtual teamwork enhances digital instruction; how to manage online course ownership; how learning analytics improves online instruction. Ubell says that it is not technology alone, but rather unconventional pedagogies, supported by technological innovations, that truly activate today's classrooms. He argues that innovations introduced online—principally peer-to-peer and collaborative learning—offer significantly increased creative learning options across all age groups and educational sectors. This impressive collection, drawn from Ubell's decades of experience as a digital education pioneer, presents a powerful case for embracing online learning for its transformational potential.

Billboard Cornell University Press

This two volume set LNCS 10602 and LNCS 10603 constitutes the thoroughly refereed post-conference proceedings of the Third International Conference on Cloud Computing and Security, ICCCS 2017, held in Nanjing, China, in June 2017. The 116 full papers and 11 short papers of these volumes were carefully reviewed and selected from 391 submissions. The papers are organized in topical sections such as: information hiding; cloud computing; IOT applications; information security; multimedia applications; optimization and classification.

MKTG4 continues to offer a unique blended solution for lecturers and students in introductory marketing subjects, in both University and Vocational sectors. Continuing to pave a new way to both teach and learn, MKTG4 is designed to truly connect with today's busy, tech-savvy student. Students have access to online interactive quizzing, videos, flashcards, games and more. An accessible, easy-to-read text with tear-out review cards completes a package that helps students to learn important concepts faster.

The Bro Code Springer Nature

The production and distribution of film and audiovisual works is one of the most dynamic growth sectors in the world. Thanks to digital technologies, production has been growing rapidly in Africa in recent years. For the first time, a complete mapping of

the film and audiovisual industry in 54 States of the African continent is available, including quantitative and qualitative data and an analysis of their strengths and weaknesses at the continental and regional levels. The report proposes strategic recommendations for the development of the film and audiovisual sectors in Africa and invites policymakers, professional organizations, firms, filmmakers and artists to implement them in a concerted manner.

Technical Abstract Bulletin Rutgers University Press
Sustainability Communication across Asia distills the core components of environmental communication in the diverse milieu of Asian nations such as Indonesia, Malaysia, the Philippines, Thailand, and China. The chapters in this book engage readers in a clear-sighted view of issues, challenges, and strategies related to sustainability communication in Asia, examining fundamental principles, digital strategies, and the role of language, as well as community engagement. The first part of the book features underpinning ideologies of sustainability communication. The authors go on to explore the prevalent trends and approaches in sustainable communication in the digital realm, examining the internet in general, social media, and gaming platforms. Finally, the book discusses the green efforts adopted among selected Asian communities, the role of communication, and the resulting societal impacts. Readers will be introduced to many related examples of Asian sustainability cases and issues that may differ from Western experiences. Interesting topics such as environmental gamification, edutainment and sustainability communication, and social media and sustainability are among those presented and elaborated at length by 21 writers with industrial and academic backgrounds. Practical and inspiring, this book will be of great interest to students and scholars of sustainability and environmental communication, and Asian studies in general.

Computational Intelligence in Communications and Business Analytics Lippincott Williams & Wilkins

This book features a collection of high-quality, peer-reviewed papers presented at the Fourth International Conference on Intelligent Computing and Communication (ICICC 2020) organized by the Department of Computer Science and Engineering and the Department of Computer Science and Technology, Dayananda Sagar University, Bengaluru, India, on 18–20 September 2020. The book is organized in two volumes and discusses advanced and multi-disciplinary research regarding the design of smart computing and informatics. It focuses on innovation paradigms in system knowledge, intelligence and sustainability that can be applied to provide practical solutions to a number of problems in society, the environment and industry. Further, the book also addresses the deployment of emerging computational and knowledge transfer approaches, optimizing solutions in various disciplines of science, technology and health care.

Handbook of Research on Human Social Interaction in the Age of Mobile Devices Springer Nature

The third edition of this authoritative and comprehensive handbook is the definitive work on the current state of the art of Biometric Presentation Attack Detection (PAD) – also known as Biometric Anti-Spoofing. Building on the success of the previous editions, this thoroughly updated third edition has been considerably revised to provide even greater coverage of PAD methods, spanning biometrics systems based on face, fingerprint, iris, voice, vein, and signature recognition. New material is also included on major PAD competitions, important databases for research, and on the impact of recent international legislation. Valuable insights are supplied by a selection of leading experts in the field, complete with results from reproducible research, supported by source code and further information available at an

associated website. Topics and features: reviews the latest developments in PAD for fingerprint biometrics, covering recent technologies like Vision Transformers, and review of competition series; examines methods for PAD in iris recognition systems, the use of pupil size measurement or multiple spectra for this purpose; discusses advancements in PAD methods for face recognition-based biometrics, such as recent progress on detection of 3D facial masks and the use of multiple spectra with Deep Neural Networks; presents an analysis of PAD for automatic speaker recognition (ASV), including a study of the generalization to unseen attacks; describes the results yielded by key competitions on fingerprint liveness detection, iris liveness detection, and face anti-spoofing; provides analyses of PAD in finger-vein recognition, in signature biometrics, and in mobile biometrics; includes coverage of international standards in PAD and legal aspects of image manipulations like morphing. This text/reference is essential reading for anyone involved in biometric identity verification, be they students, researchers, practitioners, engineers, or technology consultants. Those new to the field will also benefit from a number of introductory chapters, outlining the basics for the most important biometrics. This text/reference is essential reading for anyone involved in biometric identity verification, be they students, researchers, practitioners, engineers, or technology consultants. Those new to the field will also benefit from a number of introductory chapters, outlining the basics for the most important biometrics.

MKTG4 CRC Press

In an era in which the internet has made pornography readily accessible, *Seeing with the Eyes of the Heart* offers a theological critique of pornography and retrieves from the Christian tradition an alternative visual culture. This visual culture is constituted by both the character of the images we behold and the manner in which we see. Contributors include psychologists William M. Struthers and Jill Manning, who address the neurological effects of pornography and its influences on personal, familial, and social life. Their professional analysis is complemented by the testimony of a young man in recovery from pornography addiction. In an exposition of Christian visual culture, Orthodox iconographer Randi Sider-Rose describes the spiritual discipline of icon writing, Danielle M. Peters, S.T.D., surveys the iconography and art of Marian traditions, and art historian Dianne Phillips elucidates the meaning of divine desire as evident in Catholic visual culture of the late medieval and early modern periods. Catholic theologians Ann W. Astell, Nathaniel Peters, Boyd Taylor Coolman, and Nicolas Ogle discuss specific practices and dimensions of the Catholic tradition that can contribute to the cultivation of sacramental vision, and David W. Fagerberg, Kimberly Hope Belcher, Jennifer Newsome Martin, and John C. Cavadini offer reflections on sacramental imagination and the healing of vision. *Seeing with the Eyes of the Heart* is a work of scholarship composed with pastoral care and concern, and it will be serviceable to both classroom teachers and pastoral ministers. A special feature of the book is an inset of seventy-two full-color plates featuring both classic and contemporary works of Christian iconography and art. The essays and images invite readers to behold in beauty the truth that we are created by the triune God not for sexual objectification but with a sacramental vocation to deification through Christ and the Holy Spirit of love.

Best Actress Springer Nature

This book focuses on cultures that shape contemporary Asian tourist experiences. The book consists of 10 chapters, which are organised into two themes: Collectivist Culture and Wellbeing. The chapters cover emerging forms of tourism (e.g., wedding and bridal photography tourism, roots/affinity tourism and shamanic tourism), investigate a wide range of topics (e.g., tourist

motivation, tourist anxiety and decision making) and consider Asian perspectives from diverse backgrounds (e.g., China, Hong Kong, Singapore, Taiwan, South Korea, Japan, Philippines, Malaysia, Indonesia, India, Bangladesh, and Nepal). The book provides tourism researchers, students and practitioners a consolidated, comprehensive and updated reference for the understanding of Asian tourists.

The African Film Industry Academic Conferences and publishing limited

Russia's North Caucasus mujahedin of the self-declared Caucasus Emirate and the history thereof is part and parcel of the global jihadi revolutionary movement which includes but is no longer led by Al Qaeda. This book corrects the inadequate previous treatments of the violence in the Caucasus, almost all of which explain what ought to be called the rise of jihadism in the Caucasus solely in terms of Russian actions. The author brings the international jihadist and local North Caucasian causes back into the picture, detailing the global Jihadist/Islamist revolutionary movement's propagation of the "jihadi method" and material support to nationalist and Islamic extremists in Chechnya and the Caucasus since the mid-1990s. Like jihadi groups in Afghanistan and Pakistan, Iraq, Syria, and Africa, the Caucasus Emirate is an Al Qaeda ally and de facto affiliate. It represents a threat to Russian, U.S., and international security as evidenced by terrorist plots perpetrated or inspired by it in Belgium, the Czech Republic, Denmark, Spain, Azerbaijan, and Boston.

Bowker's Complete Video Directory 2001 Springer

This book constitutes the proceedings of the 6th International Conference on Analysis of Images, Social Networks and Texts,

AIST 2017, held in Moscow, Russia, in July 2017. The 29 full papers and 8 short papers were carefully reviewed and selected from 127 submissions. The papers are organized in topical sections on natural language processing; general topics of data analysis; analysis of images and video; optimization problems on graphs and network structures; analysis of dynamic behavior through event data; social network analysis.

Catalog of Educational Captioned Films/videos for the Deaf Springer Nature

There is a growing need for a book on emergency general surgery in the elderly, as adults age 65 and older are the fastest growing segment of the population worldwide, and their number is expected to double to 89 million between now and 2050. Based on these changing demographics, it is expected that there will be a concurrent rise in the demand for a variety of surgical services, including vascular surgery (with a projected growth of 31%) and general surgery (with a projected growth of 18%), as well as in all sub-disciplines of surgery (thoracic, cardiac, oncology, hepatobiliary, transplant, plastic colorectal, orthopedic, gynecologic, urology and neurosurgery). In addition, older surgical patients often require a different level of care than younger patients during the preoperative, intraoperative and postoperative phases. Many of our geriatric population have multiple chronic illnesses beyond the one for which surgery is required, and therefore are prone to developing postoperative complications, functional decline, loss of independence, and other undesirable outcomes. In response, this book offers surgeons, geriatrists and nurses state-of-the-art surgical approaches and essential information on the complex perioperative care of the elderly.
