From the author of Rhyme Schemer, House Arrest, and Knockout! *The Kids Under the Stairs*: BenBee and the Teacher Griever is a funny, clever novel-in-verse series about Ben Bellows—who failed the Language Arts section of the Florida State test—and three classmates who get stuck in a summer school class. But these kids aren't dumb—they're divergent thinkers, as Ms. J tells them: they simply approach things in a different way than traditional school demands. • Each chapter is told through the perspective of one of the four students, who each write in a different style (art, verse, stream of consciousness). • Celebrates different types of intelligence • A heartwarming, laugh-out-loud novel-in-verse Soon, the kids win over Ms. J with their passion for Sandbox, a Minecraft-type game. The kids make a deal with Ms. J: every minute they spend reading aloud equals one minute they get to play Sandbox in class. But when the administration finds about this unorthodox method of teaching, Ben B. and his buds have to band together to save their teacher's job—and their own academic future. The first in a series of complementary storylines, this is an honest, heartfelt book about

friendship, videogames, and learning to love yourself. • Features a distinct and engaging cast of characters • Encourages even the most reluctant reader to embrace their own "divergent" self • Perfect for parents of kids age 10 and up who love Minecraft, educators and librarians, middle grade readers, new readers of poetry, and fans of videogames • You'll love this book if you love books like *Ghost* by Jason Reynolds, *Patina* by Jason Reynolds, and *Short* by Holly Goldberg Sloan.

Holt Science and Technology Holt Rinehart & Winston

A classroom textbook covering the physical sciences discusses such topics as matter, the atom, motion and forces, and the universe.
