MARIELA MICHAEL

The Zoologist's Guide to
the Galaxy Houghton
Mifflin
From a noted Cambridge

zoologist, a wildly fun and scientifically sound exploration of what alien life must be like, using universal laws that govern life on Earth and in space. Scientists are confident that life exists elsewhere in the universe. Yet rather than taking a realistic approach to what aliens

might be like, we imagine that life on other planets is the stuff of science fiction. The time has come to abandon our fantasies of space invaders and movie monsters and place our expectations on solid scientific footing. But short of aliens landing in New York City, how do we

know what they are like? Using his own expert understanding of life on Earth and Darwin's theory of evolution--which applies throughout the universe--Cambridge zoologist Dr. Arik Kershenbaum explains what alien life must be like: how these creatures will move, socialize, and communicate. For example, by observing fish whose electrical pulses indicate social status, we can see that other planets might allow for communication by electricity. As there was

evolutionary pressure to wriggle along a sea floor, Earthling animals tend to have left/right symmetry; on planets where creatures evolved in midair or in soupy tar, they might be lacking any symmetry at all. Might there be an alien planet with supersonic animals? A moon where creatures have a language composed of smells? Will aliens scream with fear, act honestly, or have technology? The Zoologist's Guide to the Galaxy answers these questions using the latest

science to tell the story of how life really works, on Earth and in space. Communicating the Science and Culture of Astrobiology
Independently Published
The US Air Force is experiencing a profound shift! In order to aggregate the military's major space assets under one authority, they are being moved into a new branch under the purview of the Air Force. This new branch is to be called "Space Force". The true purpose of Space Force will be to publicly unveil

the most well-guarded secrets in the Air Force's stunning arsenal of exotic spacecraft, unconventional weapons and mind-blowing technologies assembled over the more than seventy years since its official emergence in 1947. This book lays out the history of the Air Force Secret Space Program: ushering in a new era with the recovery of several extraterrestrial craft in the 1940's. Secret agreements with a breakaway German colony in Antarctica (the

Fourth Reich) & different extraterrestrial groups in the 1950's. Its complicity in the German infiltration of NASA & the Military-Industrial Complex in the 1960's. Development of stealth space stations beginning from the 1970's. Deployment of squadrons of disk, triangle and rectangular-shaped craft in the 1980's & 1990's. After its 2016 discovery that it had been deceived by the Deep State and their shadowy Fourth Reich allies, Air Force leaders made the momentous decision to

shift alliances and realigned their covert space program with human-looking extraterrestrials. This has led to bold steps being taken by the Air Force to reveal the existence of its arsenal of spacecraft to the US public. Out There First Avenue Editions™ Are we alone? asks the writeup on the back cover of the dust jacket. The contributors to this collection raise questions that may have been overlooked by physical scientists about the ease

of establishing meaningful communication with an extraterrestrial intelligence. By drawing on issues at the core of contemporary archaeology and anthropology, we can be much better prepared for contact with an extraterrestrial civilization, should that day ever come. NASA SP-2013-4413.
Aliens BoD – Books on Demand
 Explores the role of ETs in the military, government, technology, history, and the coming new age •

Surveys contact with ETs, abductions, alien technology and exopolitics, genetic tampering by ETs, and the history behind the Nazis and UFOs • Contains interviews with Jesse Marcel, Michael Salla, Paul LaViolette, Robert Bauval, Helen Wambach, and others at the forefront of the ET-derived New Science movement The extraterrestrial presence on Earth is widening and, as we enter the Aquarian Age, will be admitted officially, causing shock and an urgent universal

need to understand the social and technological changes derived from our space brothers. A primer for the explosive advances humanity will experience scientifically and spiritually in the coming years, this compendium explores the ET phenomenon and its influence on humanity past and present. The book surveys contact with ETs and abduction accounts, unexplained public and undisclosed military technology from aliens including anti-gravity devices,

exopolitics (the influence of ETs in human affairs), the Iraqi Stargate, the Hybrid Project of alien interbreeding by abduction, Nazi ties to UFOS and their secret underground base in Antarctica, government cover-ups of alien interactions including Roswell, and the transformation triggered by the Hale-Bopp comet. Based on interviews with people who are witnessing the coming changes as well as those visionaries who are actually bringing them

about--including John Mack, Major Jesse Marcel, Paul LaViolette, Robert Bauval, Michael Salla, and Helen Wambach--this book sketches out a breathtaking vision of the planetary revolution just around the corner. [The Reptilian Plan to Divide and Conquer the Human Race](#) Princeton University Press Antarctica is a land about to be exposed over its well-guarded secrets and ancient hidden mysteries ... In 1955, as a result of a secret agreement reached between the Eisenhower

Administration and a German breakaway group in Antarctica, a transnational corporate space program began to emerge. The secret infusion of personnel and resources from US military contractors into Antarctica allowed this transnational corporate program to steadily grow into a major space power, which would eventually surpass and eclipse the secret space programs run by the US Navy, Air Force, and the classified space programs of other nations. Whistleblower

claims substantiate that many of the classified programs conducted there violate the 1961 Antarctic Treaty, and constitute crimes against humanity due to the abuse of a captive slave labor force. Dr. Michael Salla daringly exposes the major corporations involved in these illegal programs, and how the truth is hidden from company shareholders and the public. Today, Antarctica's secrets are slowly being revealed by the increasing volcanic activity that is melting the

massive ice shelves, exposing ancient artifacts and crashed extraterrestrial spacecraft. Full disclosure of Antarctica's history, and current events involving multiple space programs and transnational corporations, will vitally aid in transforming our planet, and prepare humanity for the major geological events that lie ahead as the melting ice unveils all that has previously been hidden. *And Other Questions from the Astronomers' In-Box*

Unmasking the mysteries of alien life on earth!
Make mention of the word "alien" and it conjures images of black-eyed, large-headed, dwarfish beings that have come to be known as the Greys. Indeed, Greys have become a staple part of pop-culture, never mind just the field of UFO research. They've

appeared in Steven Spielberg's classic 1977 movie, Close Encounters of the Third Kind. They regularly popped up in The X-Files. And, of course, there are numerous people – all across the world – who claim to have been abducted by the Greys and subjected to intrusive medical experiments. Yet, before the 1950s, the Greys were nowhere in sight. The Alien Book: A Guide to Extraterrestrial Beings on Earth shows that extraterrestrial life comes in all kinds,

appearances, sizes, and bodies. They all have one thing in common, however: the human race has encountered them, and we continue to do so today. Not just dozens, or even hundreds, but thousands of eyewitness experiences have been reported. Covering hundreds of extraterrestrial life forms in more than 40 thematic chapters, this absorbing look at the mysteries of aliens on earth includes ... the Space Brothers: long-haired, very human-looking ETs the fiendish

Reptilians: seven-to-eight-foot-tall predatory shapeshifters Men in Black beings: extremely pale-skinned, tall, and with huge eyes Black-eyed Children: anemic-looking kids with solid black eyes that might be ET-human hybrids Bigfoot the werewolf-like Dogmen jellyfish-style aliens that soar around the skies of our world the Shadow People: dangerous humanoids that terrorize people legendary Nephilim space-vampires: insect-like aliens that resemble a giant praying

mantis and many, many more! The Alien Book investigates the full range of sentient, alien life forms. Some are benign and others downright deadly. Some are small, like a germ or virus that has NASA, creating guidelines to deal with an outbreak of an extraterrestrial germ. Some are big like a giant praying mantis or the biblical Goliath. They all lurk on Earth and in this chilling book! With more than 120 photos and graphics, this tome is richly illustrated. Its

helpful bibliography and extensive index add to its usefulness.

A Novel Simon and Schuster

"Eleven-year-old Alex Petroski, along with his dog, Carl Sagan, makes big discoveries about his family on a road trip and he records it all on a golden iPod he intends to launch into space"--

For Use in Preparing ... Returns Grand Central Publishing

One of the world's leading scientists explains why—and how—the search for intelligent life

beyond Earth should be expanded. Fifty years ago, a young astronomer named Frank Drake first pointed a radio telescope at nearby stars in the hope of picking up a signal from an alien civilization. Thus began one of the boldest scientific projects in history, the Search for Extraterrestrial Intelligence (SETI). After a half-century of scanning the skies, however, astronomers have little to report but an eerie silence—eerie because many scientists are

convinced that the universe is teeming with life. Physicist and astrobiologist Paul Davies has been closely involved with SETI for three decades and chairs the SETI Post-Detection Taskgroup, charged with deciding what to do if we're suddenly confronted with evidence of alien intelligence. He believes the search so far has fallen into an anthropocentric trap—assuming that an alien species will look, think, and behave much like us. In this provocative

book Davies refocuses the search, challenging existing ideas of what form an alien intelligence might take, how it might try to communicate with us, and how we should respond if it does. *Grey Aliens and the Harvesting of Souls* National Aeronautics & Space Admin The Los Angeles Air Raid on February 24/25, 1942 opened an unprecedented chapter in the evolution of the U.S. Navy. In response to this incident, a covert research program to investigate the feasibility

of exotic antigravity propulsion technologies was developed. In addition, Navy operatives were embedded in Nazi occupied Europe to learn about the Germans' advanced flying saucer programs, and they discovered the Nazis were receiving assistance from two extraterrestrial groups with very different agendas. The debriefing of the operatives took place at Naval Air Station, San Diego, led by Rear Admiral Rico Botta. He instructed a -Disseminator of Naval Research and

Information-, William Tompkins, to take confidential briefing packets to select think tanks, corporations and university departments around the country. Later, Tompkins worked with a number of leading aerospace companies to design massive spacecraft for a secret U.S. Navy space program, and was fatefully assisted by extraterrestrial visitors described as -Nordics-. An extensive number of documents substantiate Tompkins' claims of the existence of a covert

Navy program created to study, design and build deep space battle groups. They became operational in the 1980's. Now the Navy has a new goal to enact a plan to level the universal playing field, and the election of President Donald Trump may just be the wild card they needed to reveal ... everything!

[A Guide To Extraterrestrial Beings On Earth](#) Visible Ink Press
In the vein of Randall Munroe's What If? meets Brian Green's Elegant Universe, a senior writer

from Space.com leads readers on a wild ride of exploration into the final frontier, investigating what's really "out there." We've all asked ourselves the question. It's impossible to look up at the stars and NOT think about it: Are we alone in the universe? Books, movies and television shows proliferate that attempt to answer this question and explore it. In OUT THERE Space.com senior writer Dr. Michael Wall treats that question as merely the beginning, touching off a wild ride of

exploration into the final frontier. He considers, for instance, the myriad of questions that would arise once we do discover life beyond Earth (an eventuality which, top NASA officials told Wall, is only drawing closer). What would the first aliens we meet look like? Would they be little green men or mere microbes? Would they be found on a planet in our own solar system or orbiting a star far, far away? Would they intend to harm us, and if so, how might they do it? And might they already

have visited? OUT THERE is arranged in a simple question-and-answer format. The answers are delivered in Dr. Wall's informal but informative style, which mixes in a healthy dose of humor and pop culture to make big ideas easier to swallow. Dr. Wall covers questions far beyond alien life, venturing into astronomy, physics, and the practical realities of what long-term life might be like for we mere humans in outer space, such as the idea of lunar colonies, and even

economic implications. Dr. Wall also shares the insights of some of the leading lights in space exploration today, and shows how the next space age might be brighter than ever.

Rise of the Red Dragon

Simon and Schuster

This is one of the most important books ever written on the clandestine world of the UFO cover-up. Grant Cameron and Scott Crain do more than demonstrate the reality of an extraterrestrial presence on Earth. Through tenacious

investigation and impeccable research, they shine a light into the CIA, NSA, Air Force, Navy, and other inside groups that have managed this secret for decades. Their conclusion is inescapable and shocking: this is a secret that the insiders themselves struggle to understand and contain. "Government agencies, at various times, perceive a need to release some UFO information to the public. Some, definitely not all. How do they do it? Always via avenues that leave no one at risk. That means

ensuring there is no direct connection between the agency and whomever is doing the actual releasing. It also means the necessity of mixing in some false information. It means, ultimately, to tell the truth, but tell it with a slant. Until there is a full disclosure of the UFO/ET reality, deniability will remain paramount to those in possession of this great secret." - By the authors, from the book's Introduction.
Leonard (My Life as a Cat)
Cambridge University Press

A special fiftieth anniversary edition of Kurt Vonnegut's masterpiece, "a desperate, painfully honest attempt to confront the monstrous crimes of the twentieth century" (Time), featuring a new introduction by Kevin Powers, author of the National Book Award finalist *The Yellow Birds* Selected by the Modern Library as one of the 100 best novels of all time *Slaughterhouse-Five*, an American classic, is one of the world's great antiwar books. Centering on the infamous World War II

firebombing of Dresden, the novel is the result of what Kurt Vonnegut described as a twenty-three-year struggle to write a book about what he had witnessed as an American prisoner of war. It combines historical fiction, science fiction, autobiography, and satire in an account of the life of Billy Pilgrim, a barber's son turned draftee turned optometrist turned alien abductee. As Vonnegut had, Billy experiences the destruction of Dresden as a POW. Unlike Vonnegut, he experiences time

travel, or coming "unstuck in time." An instant bestseller, *Slaughterhouse-Five* made Kurt Vonnegut a cult hero in American literature, a reputation that only strengthened over time, despite his being banned and censored by some libraries and schools for content and language. But it was precisely those elements of Vonnegut's writing—the political edginess, the genre-bending inventiveness, the frank violence, the transgressive wit—that

have inspired generations of readers not just to look differently at the world around them but to find the confidence to say something about it. Authors as wide-ranging as Norman Mailer, John Irving, Michael Crichton, Tim O'Brien, Margaret Atwood, Elizabeth Strout, David Sedaris, Jennifer Egan, and J. K. Rowling have all found inspiration in Vonnegut's words. Jonathan Safran Foer has described Vonnegut as "the kind of writer who made people—young people especially—want

to write." George Saunders has declared Vonnegut to be "the great, urgent, passionate American writer of our century, who offers us . . . a model of the kind of compassionate thinking that might yet save us from ourselves." Fifty years after its initial publication at the height of the Vietnam War, Vonnegut's portrayal of political disillusionment, PTSD, and postwar anxiety feels as relevant, darkly humorous, and profoundly affecting as ever, an enduring beacon

through our own era's uncertainties. "Poignant and hilarious, threaded with compassion and, behind everything, the cataract of a thundering moral statement."—The Boston Globe
Slaughterhouse-Five
 Simon and Schuster
 The quest for extraterrestrial life doesn't happen only in science fiction. This book describes the startling discoveries being made in the very real science of astrobiology, an intriguing new field that blends astronomy, biology, and

geology to explore the possibility of life on other planets. Jeffrey Bennett takes readers beyond UFOs to discuss some of the tantalizing questions astrobiologists grapple with every day: What is life and how does it begin? What makes a planet or moon habitable? Is there life on Mars or elsewhere in the solar system? How can life be recognized on distant worlds? Is it likely to be microbial, more biologically complex--or even intelligent? What would such a discovery

mean for life here on Earth? Come along on this scientific adventure and learn the astonishing implications of discoveries made in this field for the future of the human race. Bennett, who believes that "science is a way of helping people come to agreement," explains how the search for extraterrestrial life can help bridge the divide that sometimes exists between science and religion, defuse public rancor over the teaching of evolution, and quiet the debate over global

warming. He likens humanity today to a troubled adolescent teetering on the edge between self-destruction and a future of virtually limitless possibilities. Beyond UFOs shows why the very quest to find alien life can help us to grow up as a species and chart a course for the stars. In a new afterword, Bennett shares the most recent developments in extrasolar research, and discusses how they might further our quest to find alien life.
The War of the Worlds

Exopolitics Consultants
This book discusses the big questions about how the discovery of extraterrestrial life, whether intelligent or microbial, would impact society and humankind.
What Animals on Earth Reveal About Aliens--and Ourselves Penguin
On September 5, 2019, a Space Futures conference was hosted by the US Air Force Space Command which analyzed evolving conditions in space up to 2060. Eight possible negative and positive futures were identified,

the optimal being a "Star Trek Future" which would involve countries with space programs forming a multinational alliance collaborating in civil, military and commercial affairs in space. Today, the emergence of Space Force, signing of the Artemis Accords, and creation of NATO's Space Center promise to be the fulcrum for ushering in this Star Trek scenario. Such a future is not assured however due to the existence of uncooperative rival space programs of China and

Russia. Could one or both launch a Space Pearl Harbor that could devastate the entire US GPS system, as predicted 20 years ago by a blue-ribbon Space Commission? Also, there is the wildcard of numerous secret space programs possessing reverse-engineered antigravity craft. Their existence is not officially acknowledged by major nations, but their space activities pose major challenges to a Star Trek future. Will Space Force be able to integrate the

US based secret space programs or will these and their foreign counterparts be obstacles to its future operations? The ultimate question is how the existence of extraterrestrial life will factor into the activities of Space Force and its allies space forces. Will extraterrestrial visitors respond in a benign or a belligerent way to Space Force setting up a multinational space coalition to militarily project humanity's presence far into our solar system and beyond? How

will a future "Starfleet" with Space Force and NATO at its core have to deal with rogue secret space programs and alien life operating throughout our solar system? The US Navy secret space program reportedly has space battle groups built with the assistance of friendly human looking 'Nordic' extraterrestrials. Under what conditions will the Navy surrender authority over them to combine with Space Force? Space Force Our Star Trek Future provides answers to these and

many other critical questions about humanity's bold emergence as an interplanetary space power.

My Life in the Top-secret World of UFOs, Think Tanks and Nordic Secretaries Simon and Schuster

Documents how 12 people, as part of a top-secret U.S. government program, traveled to the planet Serpo and lived there for 13 years • Based on the debriefing of the Serpo team and the diary of the expedition's

commander • Explains how the aliens helped us reverse-engineer their antigravity spacecraft and develop technology to solve our planet-wide energy problems • Reveals how our government has an ongoing relationship with the Serpo aliens On July 16, 1965, a massive alien spacecraft from the Zeta Reticuli star system landed at the Nevada test site north of Las Vegas. Following a plan set in motion by President Kennedy in 1962, the alien visitors known as the

Ebens welcomed 12 astronaut-trained military personnel aboard their craft for the 10-month journey to their home planet, Serpo, 39 light-years away. In November 2005, former and current members of the Defense Intelligence Agency-- directed by Kennedy to organize the Serpo exchange program--came forward to reveal the operation, including details from the 3,000-page debriefing of the 7 members of the Serpo team who returned after 13 years on the planet.

Working with the DIA originators of the Serpo project and the diary kept by the expedition's commanding officer, Len Kasten chronicles the complete journey of these cosmic pioneers, including their remarkable stories of life on an alien planet, superluminal space travel, and advanced knowledge of alien technologies. He reveals how the Ebens presented the U.S. with "The Yellow Book"--a complete history of the universe recorded holographically, allowing the reader to view actual

scenes from pre-history to the present. He explains how the Ebens helped us reverse-engineer their antigravity spacecraft and develop technology to solve our planet-wide energy problems-- knowledge still classified. Exposing the truth of human-alien interaction and interplanetary travel, Kasten reveals not only that the Ebens have returned to Earth eight times but also that our government continues to have an ongoing relationship with them--a relationship with the

potential to advance the human race into the future.

Welcome to the Universe Image Books
The New York Times bestselling tour of the

cosmos from three of today's leading astrophysicists Welcome to the Universe is a personal guided tour of the cosmos by three of today's leading astrophysicists. Inspired by the enormously popular introductory astronomy course that Neil deGrasse Tyson, Michael A. Strauss, and J. Richard Gott taught together at Princeton, this book covers it all—from planets, stars, and galaxies to black holes, wormholes, and time travel. Describing the

latest discoveries in astrophysics, the informative and entertaining narrative propels you from our home solar system to the outermost frontiers of space. How do stars live and die? Why did Pluto lose its planetary status? What are the prospects of intelligent life elsewhere in the universe? How did the universe begin? Why is it expanding and why is its expansion accelerating? Is our universe alone or part of an infinite multiverse? Answering these and

many other questions, the authors open your eyes to the wonders of the cosmos, sharing their knowledge of how the universe works.

Breathtaking in scope and stunningly illustrated throughout, *Welcome to the Universe* is for those who hunger for insights into our evolving universe that only world-class astrophysicists can provide.

[Alien Life Imagined](#)

Ballantine Books

The first volume of

Selected by

Extraterrestrials covered

the life of Bill Tompkins to about 1970 and did not go deeply into the super-secret briefings he attended with Navy spies reporting what was going on in Nazi Germany from 1942-1945. Volume 2 of his ground-breaking memoirs covers those details and more about his subsequent aerospace career at companies including TRW. Here is a record of everything that Bill Tompkins wrote on his computer about his life until his death in 2017. You can read what Bill was remembering as he

typed his recollections over about 15 years. Of special interest is his detailed access to work being done by TRW that is largely still unknown, such as aggressive remote viewing projects with the early Bobby Ray Inman involvement, extensive underground alien and U.S. tunneling systems, and the interesting role TRW played in the content of movies. Bill was in charge of the famous Joe Papp engine development that was one of many non-petroleum energy systems studied by

TRW. Bill was entered the world of secrecy as a teenager, when the Navy took his personal ship models out of a Hollywood department store display window because they showed the classified locations of radars and gun emplacements. He was present at the "Battle of L.A." when 1430 anti-aircraft rounds were fired at UFOs, and he claims one of the Nordic craft selected him to be their rep in the evolving aerospace race. After working at North American Aviation and

Northrop, he was hired by Douglas Aircraft Company in 1950, and when they found out about his involvement in classified work, was given a job as a draftsman with a peripheral assignment to work in a "think tank". It was controlled by the Navy personnel who used to work for James Forrestal and who developed what probably later became the "Solar Warden" secret spacecraft system. Volume 2 provides very personal interactions with his co-workers and

secretaries, some of whom he believes were Nordic aliens helping the "good guys" here on Earth. He sketched six alien craft he personally saw on TV when Armstrong was landing on the Moon. Born in May 1923, Bill Tompkins was one of the few survivors of the "big war", married to the same woman Mary, and told his story about what he really did during his aerospace life from the 1940s through 2017 and confirmed the existence of a secret space program today.
