ANTONIO KADENCE

Glycine Saunders

This pharmacology text for nurses covers the principles of pharmacology, drug classes and individual drugs. Chapters new to this 20th edition highlight important variations on interactions, dosage and administration, and side effects regarding maternal/child and geriatric pharmacology.

Annotated Bibliography of Teaching-learning Materials for Schools of Nursing and Midwifery Cambridge University Press

This dictionary lists acronyms and abbreviations occurring with a reasonable frequency in the literature of medicine and the health care professions. Abbreviations and acronyms are given in capital letters, with no punctuation, and with concise definitions. The beginning sections also include symbols, genetic symbols, and the Greek alphabet and symbols.

Complementary & Alternative Therapies in Nursing Mosby Elsevier Health Science

This encyclopedic reference work on pharmacognosy covers the study of those natural substances, principally plants, that find a use in medicine. Its popularity and longevity stem from the book's balance between classical (crude and powdered drugs' characterization and examination) and modern (phytochemistry and pharmacology) aspects of this branch of science, as well as the editor's recognition in recent years of the growing importance of complementary medicines, including

herbal, homeopathic and aromatherapy.

No other book provides such a wealth of detail. A reservoir of knowledge in a field where there is a resurgence of interest - plants as a source of drugs are of growing interest both in complementary medicine fields and in the pharmaceutical industry in their search for new 'lead compounds'.

Dr Evans has been associated with the book for over 20 years and is a recognised authority in all parts of the world where pharmacognosy is studied, his knowledge and grasp of the subject matter is unique.

Meticulously referenced and kept up to date by the editor, new contributors brought in to cover new areas. New chapter on 'Neuroceuticals'. Addition of many new compounds recently added to British Pharmacopoeia as a result of European harmonisation. Considers development in legal control and standardisation of plant materials previously regarded as 'herbal medicines'. More on the study of safety and efficacy of Chinese and Asian drugs. Quality control issues updated in line with latest guidelines (BP 2007).

Gynaecology by Ten Teachers Springer Science & Business Media

First published in 1919 as 'Diseases of Women', *Gynaecology by Ten Teachers* is well established as a concise, yet comprehensive, guide. The twentieth edition has been thoroughly updated by a new team of 'teachers', integrating clinical material with the latest scientific developments that underpin patient care. Each chapter is highly structured, with learning objectives, definitions, aetiology, clinical features, investigations, treatments, case histories and key point summaries and additional

reading where appropriate. New themes for this edition include 'professionalism' and 'global health' and information specific to both areas is threaded throughout the text.

Biochemical Targets of Plant Bioactive Compounds CRC Press

One of the hottest political issues today concerns ways to improve national healthcare systems without incurring further costs. An extensive study by the Institute of Medicine (IOM) in the United States formally reported that computer-based patient records are absolutely necessary to help contain the cost explosion in health care. The information obtained from experts, the studies conducted, and the conclusions that went into the IOM's report have now been collected in *Aspects of the Computer-Based Patient Record*. A large portion of the volume discusses the state-of-the-art in existing computer-based systems as well as the essential needs which must be addressed by future computer-based patients' records. A final section in the book discusses implementation strategies for changing to the electronic system and practical issues: Who will bear the final cost? How and when will healthcare providers who use the system be trained? This volume contains the concise, valuable information which hospital administrators, hospital systems designers, third-party payer groups, and medical technology providers will need if they hope to successfully transit to hospital systems which use a computer-based patient record.

Digoxin Elsevier Health Sciences

A compilation of researchers' experience in the areas of bioanalysis, pharmacokinetics, and drug metabolism, to present an up-to-date and comprehensive treatise on the

application of these and related technologies in drug discovery, development, and clinical use. Contents cover descriptions of analytical methods, in vitro metabolism technology and membrane transport, reappraisal of classical pharmacokinetic problems, and the time course of drug action. The book concludes with a description of PET and imaging methods in pharmacokinetics and an appendix containing a critical appraisal of computer methods and pharmacokinetic software available for PCs.

Encyclopedia of Ophthalmology CRC Press

When introduced to the human body, bioactive metabolites produced by plants for self defense bind to particular biochemical targets, most notably to proteins involved in signaling by hormones and neurotransmitters. This, essentially, is the basis for the effects of herbal medicine. While herbal medicine preparations may act by complex synergistic interactions, molecular explanations of herbal medicine efficacy and side effects ultimately require definition of the biochemical targets of individual plant bioactive constituents. *Biochemical Targets of Plant Bioactive Compounds* is a comprehensive and user-friendly reference guide to biochemical targets of plant defensive compounds. With 500 pages of tables, it presents a mine of succinctly summarized information relating to bioactive compound structures, plant sources, biochemical targets and physiological effects that can be readily accessed via chemical compound, plant genus, plant common name and subject indexes. With introductory chapters providing reviews of the structural diversity of plant defensive compounds and biochemistry, this book is an

invaluable reference for biomedical professionals in the fields of alternative/complementary medicine, natural product chemistry, toxicology, pharmacology, and botany.

Trease and Evans' Pharmacognosy CRC Press

Package includes Medical-Surgical Nursing: Assessment and Management of Clinical Problems Two Volume text and Virtual Clinical Excursions 2.0

Фармакологія (англ.мовою). 3-є видання. Elsevier

Підручник для студентів вищих медичних навчальних закладів IV рівня акредитації складено згідно з програмою з фармакології та адресовано студентам з англомовною формою навчання. У підручнику викладено основні розділи фармакології, наведено характеристику лікарських засобів з урахуванням сучасних поглядів на їхні механізми дії та застосування.

Mosby's Pharmacology in Nursing
Elsevier Health Sciences

Begin reading, writing, and speaking medical terms immediately with this highly interactive, proven approach.

The International Pharmacopoeia
CRC Press

Written by nationally and internationally recognised experts on the design, evaluation and application of such systems, this book examines the impact of practitioner and patient use of computer-based diagnostic tools. It serves simultaneously as a resource book on diagnostic systems for informatics specialists; a textbook for teachers or students in health or medical informatics training programs; and as a comprehensive introduction for clinicians, with or without expertise in the applications of computers in medicine, who are interested in learning

about current developments in computer-based diagnostic systems. Designed for a broad range of clinicians in need of decision support.

From Guinea Pig to Computer Mouse

Oxford University Press, USA

This is the first textbook to focus on Aortopathy, a new clinical concept for a form of vasculopathy. The first section of the book starts from discussing general concept and history of Aortopathy, and then deals with its pathophysiology, manifestation, intrinsic factor, clinical implication, management and prevention. The second part closely looks at various disorders of the Aortopathy such as bicuspid aortic valve and coarctation of aorta. The book editors have published a lot of works on the topic and have been collecting relating data in the field of congenital heart disease for the past 20 years, thus present the book with confidence. The topic - an association of aortic pathophysiological abnormality, aortic dilation and aorto-left ventricular interaction - is getting more and more attention among cardiovascular physicians. This is the first book to refer for cardiologists, pediatric cardiologists, surgeons, ACHD specialists, etc. to acquire thorough knowledge on Aortopathy.

Aspects of the Computer-based Patient Record Springer Science & Business Media

Now available in a compact 4" x 7" format, this portable reference covers the management of emergency conditions seen in pediatric patients. The Fourth Edition includes new sections on pediatric emergency radiology and sports injuries, plus expanded material on infectious diseases and environmental emergencies.. . "very well written. . . more complete than

traditional pocket books." -Pediatric Emergency Care Review-review of the previous edition.

Technology in Forensic Science Springer Wolters Kluwers is dedicated to providing quality content. This is a reprint of the Seventh Edition, corrected to address typographical errors identified by reviewers. Clinical high-yield content covers what you need to know for the USMLE, shelf exam, and your Obstetrics & Gynecology rotation. This best-selling Blueprints title is an ideal resource for the obstetrics and gynecology rotation and board preparation. This is the perfect companion for quick study breaks during rotation downtime, with concise chapters that appeal to students who want a review of key concepts, research, and therapies in today's practice. Blueprints are also utilized by students in physician assistant, nurse practitioner, and osteopathic programs, as well as residents preparing for USMLE Step 3. Features include: Expanded coverage of topics, evidence-based research, therapies, and the latest changes in the management of cervical dysplasia and cervical cancer screening, abnormal uterine bleeding, hypertension in pregnancy, cervical insufficiency, prenatal diagnosis, and preterm labor. Updates on the latest techniques in contraception, sterilization, and hormone replacement, as well as current treatment options for uterine fibroids and ovarian cysts. Updated tables and figures that improve student's assimilation and retention of information. Case-based clinical vignette questions at the end of each chapter help you review the material and prepare for exams. New and updated board-style questions, with full explanations of both correct and

incorrect options, increase understanding.

Ross & Wilson Anatomy and Physiology in Health and Illness Springer Science & Business Media

A portable, comprehensive revision guide for resident physicians preparing for the ABEM Emergency Medicine In-Training Exam.

Clio in the Clinic Springer Science & Business Media

Twenty-three physicians, all accomplished historians, write autobiographically about their use of history in medical practice, from the making of a diagnosis, to consolation & encouragement.

Dictionary Catalog of the National Agricultural Library Elsevier Health Sciences

World-renowned coverage of today's pharmacology at your fingertips - Keeps you up-to-date with new information in this fast-changing field, including significantly revised coverage of CNS drugs, cognitive enhancers, anti-infectives, biologicals/biopharmaceuticals, lifestyle drugs, and more. - Includes access to unique features, including more than 100 brand new chapter-specific multiple-choice questions and 6 new cases for immediate self-assessment. - Features a color-coded layout for faster navigation and cross-referencing. - Clarifies complex concepts with Key Points boxes, Clinical Uses boxes and full-color illustrations throughout.

Dorland's Dictionary of Medical Acronyms and Abbreviations F.A.

Davis

This dictionary is aimed primarily at the beginners entering the new discipline of Pharmaceutical Medicine, an area comprising aspects of toxicology, pharmacology, pharmaceuticals,

epidemiology, statistics, drug regulatory and legal affairs, medicine and marketing. But also more experienced colleagues in departments engaged in clinical development as well as researchers and marketing experts in the pharmaceutical industry will find concise and up-to-date information. The book is completed by a list of about 1000 abbreviations encountered in pharmaceutical medicine and a

compilation of important addresses of national and international health authorities.

Hypertension Primer Elsevier Health Sciences

First multi-year cumulation covers six years: 1965-70.
