Bringing together scholars from a broad range of theoretical  
perspectives, *The Language of Argumentation* offers a unique  
overview of research at the crossroads of linguistics and theories

of argumentation. In addition to theoretical and methodological reflections by leading scholars in their fields, the book contains studies of the relationship between language and argumentation from two different viewpoints. While some chapters take a specific argumentative move as their point of departure and investigate the ways in which it is linguistically manifested in discourse, other chapters start off from a linguistic construction, trying to determine its argumentative function and rhetorical potential. *The Language of Argumentation* documents the currently prominent research on stylistic aspects of argumentation and illustrates how the study of argumentation benefits from insights from linguistic models, ranging from

theoretical pragmatics, politeness theory and metaphor studies to models of discourse coherence and construction grammar.

The Routledge Handbook of Linguistic Anthropology is a broad survey of linguistic anthropology, featuring contributions from prominent scholars in the field. Each chapter presents a brief historical summary of research in the field and discusses topics and issues of current concern to people doing research in

linguistic anthropology. The handbook is organized into four parts - Language and Cultural Productions; Language Ideologies and Practices of Learning; Language and the Communication of Identities; and Language and Local/Global Power - and covers current topics of interest at the intersection of the two fields, while also contextualizing them within discussions of fieldwork practice. Featuring 30 contributions from leading scholars in the field, The Routledge Handbook of Linguistic Anthropology is an essential overview for students and researchers interested in understanding core concepts and key issues in linguistic anthropology.

This book is open access under a CC BY 4.0 license and reports on research carried out as part of the European Union co-funded C.O.N.T.A.C.T. project which targeted hate speech and hate crime across a number of EU member states. It showcases the bearing that discourse analytic research can have on our understanding of this phenomenon that is a growing global cause for concern. Although 'hate speech' is often incorporated in legal and policy documents, there is no universally accepted definition, which in itself warrants research into how hatred is both expressed and perceived. The research project synthesises discourse analytic and corpus linguistics techniques, and presents its key findings here. The focus is especially on online comments posted in reaction to news items that could trigger discrimination, as well as on the folk perception of online hate speech as revealed through semi-structured interviews with young individuals across the various partner countries.

This handbook focuses on the often neglected dimension of interpretation in educational research. It argues that all educational research is in some sense 'interpretive', and that understanding this issue belies some usual dualisms of thought and practice, such as the sharp dichotomy between 'qualitative' and 'quantitative' research. Interpretation extends from the very framing of the research task, through the sources which constitute the data, the process of their recording, representation and analysis, to the way in which the research is finally or provisionally presented. The thesis of the handbook is that interpretation cuts across the fields (both philosophically, organizationally and methodologically). By covering a comprehensive range of research approaches and methodologies, the handbook gives (early career) researchers what they need to know in order to decide what particular methods can offer for various educational research contexts/fields. An extensive overview includes concrete examples of different kinds of research (not limited for example to 'teaching' and 'learning' examples as present in the Anglo-Saxon tradition, but including as well what in the German Continental tradition is labelled 'pädagogisch', examples from child rearing and other contexts of non-formal education) with full description and explanation of why these were chosen in particular circumstances and reflection on the wisdom or otherwise of the choice - combined in each case with consideration of the role of interpretation in the process. The handbook includes examples of a large number of methods traditionally classified as qualitative, interpretive and quantitative used across the area of the study of education. Examples are

drawn from across the globe, thus exemplifying the different 'opportunities and constraints' that educational research has to confront in different societies.

The topic of Language and Ideology has increasingly gained importance in the linguistic sciences. The general aim of critical linguistics is the exploration of the mechanisms of power which establish inequality, through the systematic analysis of political discourse (written or oral). This reader contains papers on a variety of topics, all related to each other through explicit discussions on the notion of ideology from an interdisciplinary approach with illustrative analyses of texts from the media, newspapers, schoolbooks, pamphlets, talkshows, speeches concerning language policy in Nazi-Germany, in Italofascism, and also policies prevalent nowadays. Among the interesting subjects studied are the jargon of the student movement of 1968, speeches of politicians, racist and sexist discourse, and the language of the green movement. Because of the enormous influence of the media nowadays, the explicit analysis of the mechanisms of 'manipulation', 'suggestion', and 'persuasion' inherent in language or about language behaviour and strategies of discourse are of social relevance and of interest to all scholars of social sciences, to readers in all educational institutions, to analysts of political discourse, and to critical readers at large.

Transnational Perspectives on Culture, Policy, and Education John Benjamins Publishing Company

This collection of original work demonstrates the new ways in which particular research methodologies are used, valued and critiqued in the field of race and ethnic studies. Contributing

authors discuss the ways in which their personal and professional histories and experiences lead them to select and use particular methodologies over the course of their careers. They then provide the intellectual histories, strengths and weaknesses of these methods as applied to issues of race and ethnicity and discuss the ethical, practical, and epistemological issues that have influenced and challenged their methodological principles and applications. Through these rigorous self-examinations, this text presents a dynamic example of how scholars engage both research methodologies and issues of social justice and ethics. This volume is a successor to Stanfield's landmark *Race and Ethnicity in Research Methods*.

The Routledge Handbook of Language in Conflict presents a range of linguistic approaches as a means for examining the nature of communication related to conflict. Divided into four sections, the Handbook critically examines text, interaction, languages and applications of linguistics in situations of conflict. Spanning 30 chapters by a variety of international scholars, this Handbook: includes real-life case studies of conflict and covers conflicts from a wide range of geographical locations at every scale of involvement (from the personal to the international), of every timespan (from the fleeting to the decades-long) and of varying levels of intensity (from the barely articulated to the overtly hostile) sets out the textual and interactional ways in which conflict is engendered and in which people and groups of people can be set against each other considers what linguistic research has brought, and can bring, to the universal aim of

minimising the negative effects of outbreaks of conflict wherever and whenever they occur. The Routledge Handbook of Language in Conflict is an essential reference book for students and researchers of language and communication, linguistics, peace studies, international relations and conflict studies.

This Element consists of ten short pieces written by prominent discourse analysts in the midst of the COVID-19 pandemic. Each piece focuses on a different aspect of the pandemic, from the debate over wearing face masks to the metaphors used by politicians and journalists in different countries to talk about the virus. Each of the pieces also makes use of a different approach to analysing discourse (e.g. Critical Discourse Analysis, Genre Analysis, Corpus Assisted Discourse Analysis) and demonstrates how that approach can be applied to a small set of data. The aim of the Element is to show how the range of tools available to discourse analysts can be brought to bear on a pressing, 'real-world' problem, and how discourse analysis can contribute to formulating 'real-world' solutions to the problem.

*A Discourse-Analytic Perspective* Springer

The Routledge Handbook of Language and Politics provides a comprehensive overview of this important and dynamic area of study and research. Language is indispensable to initiating, justifying, legitimatising and coordinating action as well as negotiating conflict and, as such, is intrinsically linked to the area of politics. With 45 chapters written by leading scholars from around the world, this Handbook covers the following key areas: Overviews of the most influential theoretical approaches,

including Bourdieu, Foucault, Habermas and Marx; Methodological approaches to language and politics, covering – among others – content analysis, conversation analysis, multimodal analysis and narrative analysis; Genres of political action from speech-making and policy to national anthems and billboards; Cutting-edge case studies about hot-topic socio-political phenomena, such as ageing, social class, gendered politics and populism. The Routledge Handbook of Language and Politics is a vibrant survey of this key field and is essential reading for advanced students and researchers studying language and politics.

"A landmark in the oeuvre of one of the founding fathers of discourse analysis. Van Dijk has managed to edit a volume of lasting significance, and some of the chapters in this book belong to the most widely read in the field. In its totality, Discourse Studies offers us a 360 degree tour of the field... Nothing in this volume is dated, everything remains mandatory reading for every student and advanced practitioner." - Jan Blommaert, Tilburg University "This very welcome updated second edition will allow Teun van Dijk's very popular Discourse Studies to consolidate its already strong and central position in the area. Featuring chapters written by so many of the leading scholars it will continue to be a stimulating and wide-ranging introduction to the discipline of discourse studies for new generations of students." - Malcolm Coulthard, University of Birmingham This book is the largest, most complete, most diverse and only multidisciplinary introduction to the field. A combined Second Edition of two seminal texts in the field (the 1997 titles Discourse as Social

Interaction and Discourse as Structure and Process) this essential handbook: Is fully updated from start to finish to cover contemporary debates and research literature. Covers everything from grammar, narrative, argumentation, cognition and pragmatics to social, political and critical approaches. Adds two new chapters on ideology and identity. Puts the student at the centre, offering brand new features such as worked examples, sample analyses and recommended further reading. Written and edited by world-class scholars in their fields, it is the essential, one-stop companion for any student of discourse analysis and discourse studies.

In this book, Panayota Gounari uses Critical Discourse Studies to analyze data from social media to understand the revival of far-right authoritarian discourses in the context of Trumpism.

**Methods of Critical Discourse Studies** Elsevier

This book builds on the consolidated research field of Political Discourse Analysis and attempts to provide an introduction suitable for adoption amongst a readership wishing to understand some of the principles underlying such research, and above all to appreciate how the tools of discourse analysis might be applied to actual texts. It summarises some of the work that has been done in this field by authorities such as Halliday, Fairclough, Wodak, Chilton, Van Dijk, Martin, Van Leeuwen and others to provide the would-be analyst with practical ideas for their own research. Naturally, this would not be the first time that such a handbook or introductory reference book has been proposed. Fairclough himself recently produced one; however, his work,

simply entitled Political Discourse Analysis, inevitably includes theoretical insights from his own research. The beginning analyst can, at times, experience a sense of bewilderment at the mass of theoretical writing in linguistics, in the search for some practical, usable tools. I explain a variety of such tools, demonstrating their usefulness in application to the analysis of a number of political speeches, from different historical periods and diverse social contexts. The author's hope is that would-be students of political rhetoric, of whatever level and from a variety of research areas, will be able to pick up this book and find tools and techniques that will assist them in actual work on texts. Naturally, it is also hoped that they will be inspired to follow up the suggestions for further reading which they will find in the bibliography.

Islamism in Egypt is more diversified in terms of its sociology and ideology than is usually assumed. Through linguistic analysis of Islamist rhetoric, this book sheds light upon attitudes towards other Muslims, religious authority and secular society. Examining the rhetoric of three central Islamist figures in Egypt today - Yusuf al-Qaradawi, Amr Khalid and Muhammad Imara - the author investigates the connection between Islamist rhetoric and the social and political structures of the Islamic field in Egypt. Highlighting the diversity of Islamist rhetoric, the author argues that differences of form disclose sociological and ideological tensions. Grounded in Systemic Functional Grammar, the book explores three linguistic areas in detail: pronoun use, mood choices and configurations of processes and participants. The author explores how the writers relate to their readers and how they construe concepts that are central in the current Islamic revival, such as 'Islamic thought', 'Muslims', and 'the West'. Introducing an alternative divide in Egyptian public debate - between text cultures rather than ideologies - this book approaches the topic of Islamism from a unique analytical perspective, offering an important addition to the existing literature in the areas of Middle Eastern society and politics, Arabic language and religious studies.

Keeping in Touch With Pragma-Dialectics John Benjamins Publishing

In *Discourse and Power in a Multilingual World* the discourse of politicians and policy-makers in Britain links languages other than

English, and therefore speakers of these languages, with civil disorder and threats to democracy, citizenship and nationhood. These powerful arguments travel along 'chains of discourse' until they gain the legitimacy of the state, and are inscribed in law. The particular focus of this volume is on discourse linking 'race riots' in England in 2001 with the Nationality, Immigration and Asylum Act 2002, which extended legislation to test the English language proficiency of British citizenship applicants. Adrian Blackledge develops a theoretical and methodological framework which draws on critical discourse analysis to reveal the linguistic character of social and cultural processes and structures; on Bakhtin's notion of the dialogic nature of discourse to demonstrate how voices progressively gain authority; and on Bourdieu's model of symbolic domination to illuminate the way in which linguistic-minority speakers may be complicit in the misrecognition, or valorisation, of the dominant language. [The Routledge Handbook of Linguistic Anthropology](#) Routledge Elite Discourse examines how language and communication – or

just discourse – define, mediate and legitimize class privilege. It does so from the perspective of those people and places who often stand to gain most from inequality. Collectively, chapters consider language and communication that is elitist in its appeal to distinction, excellence and superiority; they also describe the ways in which various groups and institutions lay claim to 'eliteness' as a way to position themselves (or to be positioned by others) as elite or non-elite. As such, chapters are concerned as much with discourse about elite status as they are with the discourse of elites – those groups commonly defined by their material wealth, political control, or demographic rarity. Ultimately, Elite Discourse views 'elite' as something we do, rather than something we necessarily have or are. Indeed, elite status and eliteness point us to the rhetorical strategies by which many people differentiate themselves and by which they access symbolic-material resources for shoring up their status, privilege and power. This book was originally published as a special issue of Social Semiotics.
