Reading Mastery 2008

McGraw-Hill Education

In Guided Highlighted

Reading, teachers of

grades 4-12 learn an easy

and effective text-based

strategy that scaffolds all

students to return to a complex or difficult text for four different reading purposes. This resource uses prompts--not questions--to build competency with difficult and complex text for four close-reading purposes for any content area: Reading comprehension; Author's craft; Tier II vocabulary acquisition; and

Answering multiple-choice questions on high-stakes assessments Sample passages from ELA Appendix B of the Common Core State Standards are prepared for student use for all purposes, along with how-to directions, rubrics for assessing mastery of reading comprehension and author's craft, and an

alignment of the four purposes to the CCSS. Guided Highlighted Reading is a go-to resource for teachers to help students navigate complex texts and meet the rigorous requirements of the CCSS.

Language at the Speed of Sight McGraw-Hill/Glencoe
A book that brings the habits of reading to life
Great readers are not made by genetics or destiny but by the habits they build—habits that are intentionally built by their teachers. The early

formal years of education are the key to reversing the reading gap and setting up children for success. But K-4 education seems to widen the gap between stronger and weaker readers, not close it. Today, the Common Core further increases the pressure to reach high levels of rigor. What can be done? This book includes the strategies, systems, and lessons from the top classrooms that bring the habits of reading to life, creating countless quality opportunities for students

to take one of the most complex skills we as people can know and to perform it fluently and easily. Offers clear teaching strategies for teaching reading to all students, no matter what level Includes more than 40 video examples from real classrooms Written by Paul Bambrick-Santoyo, bestselling author of *Driven by Data* and *Leverage Leadership* *Great Habits, Great Readers* puts the focus on: learning habits, reading habits, guided reading, and independent

reading. NOTE: Content video and other supplementary materials are not included as part of the e-book file, but are available for download after purchase

Corrective Reading Educational Technology
A content reading methods text that takes a quick start, heuristic approach to imparting the skills future teachers need to improve their pupils' reading ability in essential content areas. Coverage of current theories and practices in comprehension, assessment and heuristics is organized around pre-reading, guided silent

reading, and post-reading.

Reading to Learn in Secondary Classrooms
John Wiley & Sons

To most of us, learning something "the hard way" implies wasted time and effort. Good teaching, we believe, should be creatively tailored to the different learning styles of students and should use strategies that make learning easier. Make It Stick turns fashionable ideas like these on their

head. Drawing on recent discoveries in cognitive psychology and other disciplines, the authors offer concrete techniques for becoming more productive learners.

Memory plays a central role in our ability to carry out complex cognitive tasks, such as applying knowledge to problems never before encountered and drawing inferences from facts already known. New insights into how memory is encoded, consolidated, and later retrieved have led to a better understanding of

how we learn. Grappling with the impediments that make learning challenging leads both to more complex mastery and better retention of what was learned. Many common study habits and practice routines turn out to be counterproductive. Underlining and highlighting, rereading, cramming, and single-minded repetition of new skills create the illusion of mastery, but gains fade quickly. More complex and durable learning come from self-testing, introducing certain

difficulties in practice, waiting to re-study new material until a little forgetting has set in, and interleaving the practice of one skill or topic with another. Speaking most urgently to students, teachers, trainers, and athletes, *Make It Stick* will appeal to all those interested in the challenge of lifelong learning and self-improvement.

Reading: a tool for
learning in any subject
area! Although reading is
an essential skill for

learning in any discipline,
many students in today's
secondary classrooms find
reading tasks difficult and
often fail to complete
those assignments. Now
this proven, step-by-step
instructional model shows
secondary teachers how
to help students boost
their reading
comprehension, acquire
knowledge through their
reading, and process the
information that they've
learned. Providing
numerous classroom
examples, the authors
show teachers how to use
research-based, high-

effect strategies before, during, and after reading to increase student learning in various content and subject areas. Teachers learn how to help students: Prepare for learning and anticipate reading assignments through pre-lesson strategies such as previewing the text, activating prior knowledge, and developing questions. Remain focused and engaged during reading assignments through strategies such as reciprocal teaching,

jigsaw, and think-alouds. Process and internalize newly learned information using strategies such as graphic organizers and summaries. Easy to implement, this method helps secondary teachers improve students' content learning and reading ability at the same time! *Suggestions for directed reading*
TEACH YOUR STUDENTS TO READ WITH PRECISION AND INSIGHT. The world we are preparing our students to succeed in is one bound together by words and phrases. Our

students learn their literature, history, math, science, or art via a firm foundation of strong reading skills. When we teach students to read with precision, rigor, and insight, we are truly handing over the key to the kingdom. Of all the subjects we teach reading is first among equals. Grounded in advice from effective classrooms nationwide, enhanced with more than 40 video clips, *Reading Reconsidered* takes you into the trenches with actionable guidance from

real-life educators and instructional champions. The authors address the anxiety-inducing world of Common Core State Standards, distilling from those standards four key ideas that help hone teaching practices both generally and in preparation for assessments. This 'Core of the Core' comprises the first half of the book and instructs educators on how to teach students to: read harder texts, 'closely read' texts rigorously and intentionally, read nonfiction more

effectively, and write more effectively in direct response to texts. The second half of Reading Reconsidered reinforces these principles, coupling them with the 'fundamentals' of reading instruction—a host of techniques and subject specific tools to reconsider how teachers approach such essential topics as vocabulary, interactive reading, and student autonomy. Reading Reconsidered breaks an overly broad issue into clear, easy-to-implement approaches.

Filled with practical tools, including: 44 video clips of exemplar teachers demonstrating the techniques and principles in their classrooms (note: for online access of this content, please visit my.teachlikeachampion.com) Recommended book lists Downloadable tips and templates on key topics like reading nonfiction, vocabulary instruction, and literary terms and definitions. Reading Reconsidered provides the framework necessary for teachers to ensure that students

forge futures as lifelong readers.
