### COLBY EVELIN

#### International Law and the Arctic BRILL

In common with previous issues, the 2012 Review contains critical analysis and a wealth of unique data, including long-term data series on seaborne trade, fleet capacity, shipping services and port handling activities. This year's Review notes that world seaborne trade grew by 4 per cent in 2011, whereas the tonnage of the world fleet grew at a greater rate, by almost 10 per cent, as shipowners took delivery of vessels that had been ordered before the economic crisis began. With supply outstripping demand, freight rates fell even further, to unprofitable levels for most shipping companies. For importers and exporters, however, the low freight rates helped to reduce transaction costs, which is important for helping to revive global trade. As freight traffic continues to grow, the question of how to ensure the long-term sustainability of such growth is playing an increasingly important part in the policy debate on globalisation, trade and development, environmental sustainability, energy security and climate change. Reflecting these new realities, this year's Review of Maritime Transport addresses a range of relevant issues in this context and includes a special chapter on sustainable freight transport. This chapter highlights the impacts of freight transport activity, for example on the environment, human health and the climate, and the consequent need to reduce the sector's energy consumption and emissions. If left unchecked, such unsustainable patterns are likely to intensify, increasing the potential for global energy and environmental crises, and risk undermining progress being made on sustainable development and

growth. Promoting a shift towards sustainable freight transport will help improve the sector's energy efficiency, reduce its heavy reliance on oil, and limit environmental and climate change impacts. In this context, developing effective policies and measures, including for the purpose of climate change mitigation and adaptation, and ensuring appropriate financing, are major challenges, especially for developing countries

#### Regulations for the Prevention of Air Pollution from Ships and NOx Technical Code 2008 IUCN

With over 80 per cent of global trade by volume and more than 70 per cent of its value being carried on board ships and handled by seaports worldwide, the importance of maritime transport for trade and development cannot be overemphasized. The 2017 Review of Maritime Transport presents and discusses key developments in the world economy and international trade and related impacts on shipping demand and supply, freight and charter markets, as well as seaports and the regulatory and legal framework. In addition to relevant developments in 2016 and the first half of 2017, this year's edition of the Review also features a special chapter on maritime transport connectivity, reflecting the prominence of physical and electronic connectivity as a priority area in the trade and development policy agenda.

#### **Global Lessons and Research to Inspire Action and Guide Policy Change** Inter-Governmental Maritime

This yearbook contains documentary texts of treaties and other materials concerning the legal status and activities of the United Nations and related inter-governmental organizations. It also presents the judicial decisions on questions related to the Organization. A bibliography on jurisprudence is included.

*Third Edition* Springer

This model course is designed to facilitate the delivery of training in order to promote the energy-efficient operation of ships. The course contributes to the IMO's environmental protection goals as set out in resolutions A.947(23) and A.998(25) by promulgating industry "Best Practices", which reduce greenhouse gas (GHG) emissions and the negative impact of global shipping on climate change. The course also covers essential subjects to develop management tools to assist a shipping company in managing the environmental performance of its ships. Therefore, the contents of the course reflect the guidance for the development of a Ship Energy Efficiency Management Plan (SEEMP), resolution MEPC.213(63), adopted 2 March 2012.

"In The Spratly Islands and International Law, Xuechan Ma offers a detailed analysis of legal solutions to achieve coexistence and cooperation in the Spratly Islands in the absence of maritime delimitation.

**The Spratly Islands and International Law** UN

This open access book presents detailed pathways to achieve 100% renewable energy by 2050, globally and across ten geographical regions. Based on state-of-the-art scenario modelling, it provides the vital missing link between renewable energy targets and the measures needed to achieve them. Bringing together the latest research in climate science, renewable energy technology, employment and resource impacts, the book breaks new ground by covering all the elements essential to achieving the ambitious climate mitigation targets set out in the Paris Climate Agreement. For example, sectoral implementation pathways, with special emphasis on differences between developed and developing countries and regional conditions, provide tools to implement the scenarios globally and domestically. Non-energy greenhouse gas mitigation scenarios define a sustainable pathway for land-use change and the agricultural sector. Furthermore, results of the impact of the scenarios on employment and mineral and resource requirements provide vital insight on economic and resource management implications. The book clearly demonstrates that the goals of the Paris Agreement are achievable and feasible with current technology and are beneficial in economic and employment terms. It is essential reading for anyone with responsibility for implementing renewable energy or climate targets internationally or domestically, including climate policy negotiators, policy-makers at all levels of government, businesses with renewable energy commitments, researchers and the renewable energy industry.

**How to Do It** United Nations

The Globally Harmonized System of Classification and Labelling of Chemicals (GHS) addresses classification and labelling of chemicals by types of hazards. It provides the basis for worldwide harmonization of rules and regulations on chemicals and aims at enhancing the protection of human health and the environment during their handling, transport and use by ensuring that the information about their physical, health and environmental hazards is available. The sixth revised edition includes, inter alia, a new hazard class for desensitized explosives and a new hazard category for pyrophoric gases; miscellaneous amendments intended to further clarify the criteria for some hazard classes (explosives, specific target organ toxicity following single exposure, aspiration hazard, and hazardous to the aquatic environment) and to complement the information to be included in section 9 of the Safety Data Sheet; revised and further rationalized precautionary statements; and an example of labelling of a small packaging in Annex 7.

**International Evidence of the Effects of Rent Control in Six Countries** OECD Publishing

Guidelines for the Implementation of MARPOLAnnex V

*International Code on Intact Stability, 2008* Cambridge University Press

This publication provides guidance to port State control officers (PSCOs) on the conduct of inspections of foreign ships, in order to promote consistency in the way inspections are carried out worldwide, and to harmonize the criteria for deciding on deficiencies found on board relating to the ship, its equipment or its crew, as well as the application of procedures.

Guidelines for Protected Areas Legislation Routledge

Now in a third, revised edition, *Excessive Maritime Claims* by J. Ashley Roach and Robert W. Smith is designed for law of the sea and maritime law specialists. Coverage includes current affairs in maritime law such as submarine cables, polar areas, environmental protection, sovereign immunity and sunken ships, and maritime law enforcement, maritime security, proliferation of weapons of mass destruction by sea, piracy, and protection of underwater cultural heritage.

**United Nations Juridical Yearbook 2008** Createspace Independent Publishing Platform

This series contains the decisions of the Court in both the English and French texts.

This is edition 46 for 2016. The descriptions are from the official United States Coast Pilot updated to Sept 2015. Additional information is included with a free app on your phone or tablet, Apple or Android. Cape Henry to Key West. Cape Henry to Cape Lookout Cape Lookout to Cape Fear Cape Fear to Charleston Harbor Charleston Harbor to Savannah R. Savannah River to St. Johns River St. Johns River St. Johns River to Miami Miami to Key West :Intracoastal Waterway There is a QR code for a free installation of an app to your phone or tablet. Every Island, Every Tour, Every Anchorage, Every Walk, Every Dive, Every Animal, Every Regulation, Every Camp site, Every Boat, Every Room, Every Fish, Every Restaurant, Every Snorkel, Every Danger, Every Bird, Every Activity, Every Thing, Every Price, EVERY THING. \* Videos \* Photos \* Maps \* Sketches \* Notes \* Hyperlinks \* Things To Do \* Opinions \* Blogs & Reviews The file contains links to thousands of useful pieces of information. Everything from the weather, the winds, Utube, the formalities and regulations, to blogs and photos, things to do, events, anchorages, the people, costs, the pilot charts, pirates, marinas, google earth, camping, cell phone coverage, walking, flights, ferries, nightlife, boatyards, history, repairs, currency, addresses, communications, repairers, snorkeling, fishing workshop, diving, flora, the animals, online charts, updates, the parks, local food, the restaurants, hotels and accommodation, Wikipedia, Noonsite, sailing guides online, diesel engine troubleshooting & repair, your float plan, every Gov Dept., the Nav Rules, Sailing Directions, etc. Using your phone or tablet you can email out of the book to the editors. Instantly see the actual site on google earth. And more..... Your phone or tablet screen will display the current weather radar. Also your screen can display surrounding shipping using links to AIS technology. Coast Pilot 1 covers the coasts of Maine, New Hampshire, and part of Massachusetts, from West Quoddy Head in Maine to Provincetown in Massachusetts. Major ports are at Portsmouth, NH and Boston, MA. Coast Pilot 2 covers the Atlantic coast from Cape Cod to Sandy Hook, embracing part of the Massachusetts coast and all of the coasts of Rhode Island, Connecticut, and New York. Coast Pilot 3 covers the Atlantic coast from Sandy Hook to

Cape Henry, including the New Jersey Coast, Delaware Bay, Philadelphia, the Delaware - Maryland - Virginia coast, and the Chesapeake Bay. Coast Pilot 4 covers the Atlantic coast of the United States from Cape Henry to Key West. Coast Pilot 5 covers the Gulf of Mexico from Key West, FL to the Rio Grande. This area is generally low and mostly sandy, presenting no marked natural features to the mariner approaching from seaward. so covers Puerto Rico and the Virgin Islands. Coast Pilot 6 covers the Great Lakes system, including Lakes Ontario, Erie, Huron, Michigan, and Superior, their connecting waters, and the St. Lawrence River. Coast Pilot 7 covers the rugged United States coast of California, Oregon and Washington, between Mexico on the south and Canada's British Columbia on the north. Coast Pilot 7 also includes Hawaii and other United States territories in the South Pacific. Coast Pilot 8 covers the panhandle section of Alaska between the south boundary and Cape Spencer. In this volume, general ocean coastline is only 250 nautical miles, but tidal shoreline totals 11,085 miles. Coast Pilot 9 deals with the Pacific and Arctic coasts of Alaska from Cape Spencer to the Beaufort Sea. General ocean coastline totals 5,520 nautical miles, and tidal shoreline totals 18,377 miles.

*Environmental Impact of Ships* IMO Publishing

Edition 48 for 2016. The app links to charts, aerial photos, embedded videos, every marina, email support group, all port authorities, the wind charts, every anchorage, worldwide harbors, the tides, engine troubleshooting, all the weather, local knowledge, every dive site, every seabird, every pelagic fish, how to catch fish, animated knots, tips, Cruisers Forum, suggested itineraries, the nav rules, the ocean currents, all safety information, USCG, outboard engines, vessel traffic services, the radio frequencies, videos, every dock, every fuel supply, food, restaurants & supermarkets, every lighthouse, repairs, marine parks, general knowledge, your safety & security, sightseeing, the dive sites, all necessary books, USCG accident reports, safety check, Facebook group, Pinterest, Instagram, the nightlife, Crewfinder, Tumblr, Scuttlebutt, Snapchat group, Tripadvisor, environmental issues, all warnings, Chatbot, Live cams, Livestream, Events, Regulations, Wikipedia, put up your photos & videos, email group, Cruisers Forum, BoatBuzz, Top 20 sailing blogs, Links to all Gov agencies, official alerts & warnings and more... +The app on your phone, tablet and computer ready for any situation. + Link to First Aid and Sea Survival. + Phone and email out of the app. + Your screen can become a full screen weather radar. + See the surrounding ships in real time on your screen with a link to AIS. + View updated charts using online chart viewer. + Before departure download and print current charts in booklet form. Topics in this Pilot include channel descriptions, piracy, safety, anchorages, cloud cover, local winds, humidity, temperatures, bridge and cable clearances, dangerous waves, currents, tide and water levels, prominent features, visibility, cyclones, storms, fog, precipitation, pilotage, towage, weather, ice conditions, wharf descriptions, dangers, routes, traffic separation schemes, small-craft facilities, and Federal regulations applicable to navigation. GENERAL INFORMATION This is a huge resource on the app with hundreds of useful links to Government, USCG, Wikipedia etc. Chapter 2. NAVIGATION REGULATIONS The complete online updated Code of Federal Regulations is linked in the app. Chapter 3. California, Oregon, and Washington Chapter 4. San Diego to Point Arguello, California Chapter 5. CHANNEL ISLANDS. This chapter describes the eight Channel Islands They include the four islands of the southern group-San Clemente, Santa Catalina, San Nicolas, and Santa Barbara; Chapter 6. Point Arguello to San Francisco Bay, California Chapter 7. San Francisco Bay, California. Chapter 8. San Francisco Bay to Point St. George, California. This chapter describes Bodega Bay, Tomales Bay, Noyo River and Anchorage, Shelter Cove, Humboldt Bay. Chapter 9. Chetco River to Columbia River, Oregon This chapter describes 200 miles of the Oregon coast from the mouth of the Chetco River to the mouth of the Columbia River. Chapter 10. Columbia River, Oregon and Washington This chapter describes the Columbia River from its mouth at the Pacific Ocean to the head of navigation above Richland, Chapter 11. Columbia River to Strait of Juan De Fuca, Washington This chapter describes the Pacific coast of the State of Washington from the Washington-Oregon border at the mouth of the Columbia River Chapter 12. Strait of Juan De Fuca and Georgia, Washington. This chapter includes the Strait of Juan de Fuca, Sequim Bay, Port Discovery, the San Juan Islands and its various passages and straits, Deception Pass, Fidalgo Island, Chapter 13. Puget Sound, Washington This chapter describes Puget Sound and its numerous inlets, bays, and passages, and the waters of Hood Canal, Chapter 14. HAWAII The Hawai'ian Islands an archipelago, consist of eight large islands, plus many islets, reefs, and shoals, strung out from SE to NW for 1,400 nautical miles in the north-central Pacific Ocean. Chapter 15. PACIFIC ISLANDS

[Review of Maritime Transport 2012](#) CreateSpace

The Marine Environment Protection Committee (MEPC) of IMO, at its sixty-second session in July 2011, adopted the Revised MARPOL Annex V, concerning Regulations for the prevention of pollution by garbage from ships, which enters into force on 1 January 2013. The associated guidelines which assist States and industry in the implementation of MARPOL Annex V have been reviewed and updated and two Guidelines were adopted in March 2012 at MEPC's sixty-third session. The 2012 edition of this publication contains: the 2012 Guidelines for the implementation of MARPOL Annex V (resolution MEPC.219(63)); the 2012 Guidelines for the development of garbage management plans (resolution MEPC.220(63)); and the Revised MARPOL Annex V (resolution MEPC.201(62)).

Frontiers in International Environmental Law is a collection of essays that showcases how law and legal scholarship can responded to challenges to our oceans and climate governance regimes.

[Rent Control, Myths & Realities](#) National Academies Press

Marine debris is a serious environmental problem. To do its part, the United States has agreed to abide by the international treaty for garbage control at sea, known as MARPOL 73/78 Annex V. *Clean Ships, Clean Ports, Clean Oceans* explores the challenge of translating Annex V into workable laws and regulations for all kinds of ships and boats, from cruise ships to fishing crafts and recreational boats. The volume examines how existing resources can be leveraged into a comprehensive strategy for compliance, including integrated waste management systems and effective enforcement. *Clean Ships, Clean Ports, Clean Oceans* describes both progress toward and obstacles to Annex V compliance. The book covers How shipborne garbage originates and what happens to garbage discharged into the seas. Effects of discharge on human health, wildlife safety, and aesthetics. Differences in perspective among military, industrial, and recreational seafarers and shoreside facilities. *Clean Ships, Clean Ports, Clean Oceans* will be important to marine policymakers, port administrators, ship operations officers, maritime engineers, and marine ecologists.

**Challenges for International Law** Guidelines for the Implementation of MARPOLAnnex V The Marine Environment Protection Committee (MEPC) of IMO, at its sixty-second session in July 2011, adopted the Revised MARPOL Annex V, concerning Regulations for the prevention of pollution by garbage

from ships, which enters into force on 1 January 2013. The associated guidelines which assist States and industry in the implementation of MARPOL Annex V have been reviewed and updated and two Guidelines were adopted in March 2012 at MEPC's sixty-third session. The 2012 edition of this publication contains: the 2012 Guidelines for the implementation of MARPOL Annex V (resolution MEPC.219(63)); the 2012 Guidelines for the development of garbage management plans (resolution MEPC.220(63)); and the Revised MARPOL Annex V (resolution MEPC.201(62)). Enforcing International Maritime Legislation on Air Pollution through UNCLOS

This publication contains various legal texts concerning the United Nations and related intergovernmental organisations. These texts either came into force or were concluded in 1997. The materials presented include: legislative texts and treaty provisions relating to the legal status of these bodies; treaties concerning international law; a review of their legal activities for the year; and a bibliography listing legal works and articles published in 1997.

**United Nations Juridical Yearbook 1997** Inter-Governmental Maritime

This report presents both short- and long-term approaches to the problem of marine plastic debris and micro plastics. It provides an overview of the latest science and experiences, identifies priority areas of action, and points out areas requiring more research. Improved waste management is urgently needed to reduce the flow of plastic into our oceans.

**Procedures for Port State Control 2019** Springer

This Manual provides practical information to Governments and competent (port) authorities, in particular those in developing countries, as well as the shipping industry, agencies and waste contractors seeking guidance when implementing MARPOL. It also provides guidance on how to deal with possible inadequacies, as, in order to comply fully with MARPOL, a party State has to ensure the provision of adequate port reception facilities meeting the needs of ships using their ports, without causing undue delay to the ships.

**Essays in Honour of David Freestone** Bloomsbury Publishing

This book explains the EU's climate policies in an accessible way, to demonstrate the step-by-step approach that has been used to develop these policies, and the ways in which they have been tested and further improved in the light of experience. The latest changes to the legislation are fully explained throughout. The chapters throughout this volume show that no single policy instrument can bring down greenhouse gas emissions. The challenge facing the EU, as for many countries that have made pledges under the Paris Agreement, is to put together a toolbox of policy instruments that is coherent, delivers emissions reductions, and is cost-effective. The book stands out by the fact it covers the EU's emissions trading system, the energy sector and other economic sectors, including their development in the context of international climate policy. This accessible book will be of great relevance to students, scholars and policy makers alike.
