A new guide designed to ensure confident prescribing in specialist areas. The need for this text stems from the necessity to develop non-medical prescribing in practice. It offers a resource for all non-medical prescribers including nurses, pharmacists, optometrists, physiotherapists and other healthcare professionals who

desire to become supplementary or independent prescribers in their field. The book is divided into two comprehensive sections and provides an overview of non-medical prescribing by healthcare professionals other than doctors.

*Transcultural Concepts in Nursing Care* Mosby ANA and the American College of Cardiology Foundation convened an array of cardiovascular health experts to develop this succinct and practical guide. This completely updated document is unique, in fact, as a unifying effort due to participation and contribution of 16 nursing organizations whose constituency includes cardiovascular nurses. Reflecting the

cumulative work of three previous iterations (and including their content), this book is a foundational volume. It articulates the essentials of the specialty, its accountabilities and activities - the who, what, when, where, and how of its practice - for both specialists and generalists. The standards themselves - six for nursing practice and nine for nursing professional performance - are those by which all nurses in this specialty practice. Together, along with each standard's set of measurement criteria, these reflect the perspectives and priorities of cardiovascular nursing. The book's summary discussion of the scope

of such practice - its characteristics, development and trends, education and training, its practice environments and settings, its general and specialized practice roles, its ethical and conceptual bases - lends a broad context for understanding and using these standards. While *Cardiovascular Nursing: Scope and Standards of Practice* is a reference and guide primarily for practicing nurses and nursing faculty and students, it is also an essential source document for other cardiovascular specialists, healthcare providers, researchers, and scholars, along with those involved in funding, legal, policy, and regulatory activities.
