How New Labour Changed British Politics Forever W. W. Norton & Company
 Melakopides defines Canadian internationalism as "pragmatic idealism," a balanced synthesis of idealism and pragmatism, and demonstrates concretely how it reflects the principles, interests, and values of the country's mainstream political culture. Focusing on Canada's record in the areas of peacekeeping and peacemaking, arms control and disarmament, foreign development assistance, human rights, and ecological concerns, Melakopides reveals that at the heart of Canadian foreign policy are the concepts and the practice of moderation, communication,

mediation, cooperation, caring, and sharing. Pragmatic Idealism is an inspiring challenge to the assumption that all foreign policy is premised on realpolitik. Students, scholars, and practitioners of Canadian foreign policy as well as historians, Canadianists, members of NGOs, and interested members of the general public will find it an engaging and enlightening experience.

"Managerial styles are influenced by habit, familiarity, and workplace culture. It's no wonder that well-intentioned professionals doing their best to be good organizational leaders often repeat

unhelpful supervisory practices experienced in their early careers, even if they disliked them at the time. In the DUH! Book of Management and Supervision, the author disagrees with many accepted leadership principles (unabashedly referring to them as myths) and makes new and different approaches easier to imagine. Her challenging and controversial concepts illustrated with poignant stories suggest common-sense and immediately applicable alternatives more suitable in today's workplace"--Back cover.

Dispelling Common Leadership Myths : a Practical Guide for Leaders that Reminds Us of the Obvious Createspace Independent Publishing Platform

This work outlines available resources and proposed standards for international NGO fact-finding missions. Chapter One presents an introduction to the issue of NGO fact-finding. Chapter Two discusses the problems caused by the lack of any generally-accepted guidelines for NGO fact-finding, in contrast with contexts where NGOs have achieved consensus. Chapter Three surveys proposed guidelines for human rights and humanitarian NGOs. In addition, this section examines United Nations fact-finding standards, as well as examples of internal fact-finding standards for major NGOs. Chapter Four analyzes the fact-finding standards used in five specific cases: the International Crisis Group (Kosovo, 1999), the Independent International Fact-Finding Mission on the Conflict in Georgia (Georgia, 2008), United Nations Office of the High Commissioner for Human Rights Mapping Exercise on the Democratic Republic of Congo (1993-2003), Conflict Analysis Resource Center/University London study on Amnesty International and Human Rights Watch (Colombia, 1988-2004), and Human Rights Watch (Lebanon, 2006). The final chapter offers conclusions and recommendations.

What is knowledge? Where does it come from? What kinds of knowledge are there? Can we know anything at all? This lucid and engaging introduction grapples with these central questions in the theory of knowledge, offering a clear, non-partisan view of the main themes of epistemology. Both traditional issues and contemporary ideas are discussed in sixteen easily digestible chapters, each of which conclude with a useful summary of the main ideas discussed, study questions, annotated further reading and a guide to internet resources. Each chapter also features text boxes providing bite-sized summaries of key concepts and major philosophers, and clear and interesting examples are used throughout. The book concludes with an annotated guide to general introductions to epistemology, a glossary of key terms, and a summary of the main examples used in epistemology. This is an ideal first textbook in the theory of knowledge for undergraduates coming to philosophy for the first time. The third edition has been revised and updated throughout and features two new chapters, on religious knowledge and scientific knowledge, as part of a whole new section on what kinds of knowledge there are. In addition, the text as a whole has been refreshed to keep it up to date with current developments.
