GLOVER ZAYDEN

Houghton Mifflin Math Central Hmh School
 Author Jasmin Rogg draws from her own
 extensive experience as a
 psychotherapist, addiction and recovery
 group facilitator, and her own personal
 struggle with substance abuse and long-
 term sobriety. She compiled a collection of
 writings meant to offer inspiration and
 information for recovery and change. After
 introducing readers to her own story and
 her path through addiction and recovery,
 Rogg goes on to write with honesty and
 compassion about the issues at the heart
 of substance abuse and recovery. She
 shares how embracing Buddhism's
 teachings of mindfulness practice help
 foster emotional regulation and healing-
 two important aspects of maintaining

ongoing sobriety. She does not shy away
 from difficult topics, tackling issues such
 as abuse, trauma, love, attachment, and
 suffering, all while shining a light on the
 things we tell ourselves and about why we
 do what we do. Waking Up Sober inspires
 insight and understanding, and includes
 adverse childhood experiences and
 relational issues as underlying factors for
 self-destructive behavior patterns. Rogg
 intersperses her own poems throughout
 the book, which ultimately serve to ground
 the topics in humanity.

Teacher Edition Houghton Mifflin School
 Using mathematical metaphor, Cohen
 touches deeply into issues of life and
 heart. In each poem she crosses the equal
 sign on many levels, beginning with visible
 points, lines, and numbers, crossing over
 to life's invisible-yet-tangible delights and
 frustrations and crossing back again with
 insights gleaned from these reflections.

Though not a textbook, this text's concise and direct approach toward solving math problems offers itself to be a conducive supplement to most Pre-algebra textbooks. The author assumes the viewpoint that the reader has little to no experience in Pre-algebra. This perspective has motivated the author to impart knowledge in how to solve math problems in an unambiguous style, and with thorough detail in every step. This text can be used as a quick reference guide for algebra classes as well.

Guide for Entrepreneurs Routledge
Whether you're premed, pregrad, preprofessional, undecided, or headed for the job market after graduation, undergrad research can help you define your career path and prepare for it. But research opportunities are highly competitive so where do you start and

how do you find the perfect position?

Getting In brings together the essential information you need with a no-nonsense approach that will save you time and frustration. Co-written by academic insiders, Getting In is like having two mentors coach you through your search and keep you organized as you decide on which research positions to pursue, contact potential mentors, nail interviews, and ultimately choose a research experience. Getting In gives you the guidance you need including: * Creative search strategies * Mistakes to avoid during the search, application, and interview * How to approach a professor after lecture or during office hours * Email templates that get you noticed * Time-management strategies to maintain your academic/life balance * Tips to determine if you should accept or decline a research position * How to use your research experience to build habits for success in the lab, in college, and in life Additional tips, tricks, and strategies for getting the most out your STEM undergrad research experience can be found at UndergradInTheLab.com at facebook.com/undergradinthelab and on Twitter at @youinthelab.D.G.

Oppenheimer, Ph.D., is an associate professor of molecular and cellular biology at the University of Florida. P.H. Grey, B.A., is a molecular biology research scientist who started her research career as an undergraduate laboratory assistant. Together, they have over 46 years experience training, mentoring, and writing recommendation letters for undergrad researchers. They understand the challenges that students face when searching for a research experience and how to successfully navigate around them.

He is one that all can embrace, and he will shine for years to come."

A Newsletter from the National Council for the Social Studies Holt McDougal

Customized for the Salem Volcanoes (Minor League Team in Salem Oregon) This book gets rid of all the myths and misunderstandings of the baseball swing. For the first time in 120 years of baseball, we now fully understand the swing from a precise analytical perspective - - and here it is! There are two books: Book 1 (this book) is the stand-alone manual written specifically (in baseball language) for fans, ballplayers, and coaches of all levels, including Little League coaches and their dads. It carefully walks you through the swing telling you what is happening, how, and why. It's unlike anything you have ever seen in the baseball literature. You'll be amazed. For FANS, certain chapters are written specifically for you, so you (1) know what to watch for during a game; (2) how to classify batters into different styles; and (3) the final chapter describes the styles of different Home Run Kings

from Babe Ruth to Barry Bonds. You'll learn lots and enjoy the game that much more. Book 2 is Technical Supplements, which are referenced in Book 1, with lots of graphs and tables - - based on our computer model which exactly matches the swing. Book 2 is for coaches, trainers, weight trainers, as well as teachers and students of the swing. Perfect for a college course!

Usability Assessment is a concise volume

for anyone requiring knowledge and practice in assessing the usability of any type of product, tool, or system before it is launched. It provides a brief history and rationale for conducting usability assessments and examples of how usability assessment methods have been applied, takes readers step by step through the process, highlights challenges and special cases, and offers real-life examples. By the end of the book, readers will have the knowledge and skills they

need to conduct their own usability assessments without requiring that they read textbooks or attend workshops. This book will be valuable for undergraduate and graduate students; practitioners; usability professionals; human-computer interaction professionals; researchers in fields such as industrial design, industrial/organizational psychology, and computer science; and those working in a wide range of content domains, such as health care, transportation, product design, aerospace, and manufacturing.
