Cheap and Simple Steam Engine: 8 Steps (with Pictures) To make a steam engine out of a soda can, you'll need an empty soda can,

pliers, a tea light, an 8-inch piece of copper tubing, and a bowl of water. The engine works by using heat from a candle to evaporate water, which creates steam to form jets that propel the engine. To start, cut the bottom off of a soda can and place a tea light in it.
