Every day, Lin Jensen has
plops down a meditation
cushion on the streets of

Chico, California, and sits
"peace vigils" to protest
the U.S. invasion of Iraq --
his honest effort to
change the world. From
his knee-level spot on the
pavement, Jensen
encounters a bracing
array of what he calls
"uprights": a
heartbreakingly generous
homeless man; hostile

passersby who scream "Fuck you, Peace Wimp!"; "White Wolf," who punctuates every shouted comment with a sharp poke to Lin's chest; compassionate soldiers -- all amid rain and bright sun, exhaust, and the scent of azaleas. Jensen -- whose previous memoir, "Bad Dog! A Memoir of Love, Beauty, and Redemption in Dark Places," received wide acclaim -- here shares his struggles and helps us all learn more about humility, generosity, and what it really means to

love our neighbors. This is an inspiring, good-humored book -- especially for anyone who might work or wish for change but doesn't want to be just spitting in the wind.

Library List Penguin Directory is indexed by name (parent and subsidiary), geographic location, Standard Industrial Classification (SIC) Code, and corporate responsibility.

The Five-year Outlook: Source materials CABI This book contains edited and revised papers from a

conference on 'Science and Technology for Managing Plant Genetic Diversity in the 21st Century' held in Malaysia in June 2000, organised by the International Plant Genetic Resources Institute (IPGRI). It includes keynote papers and some 40 additional ones, covering ten themes. The major scientific challenges to developing a global vision for the next century are identified and key research objectives are also discussed.

Create unforgettable characters your readers will love! 45 Master Characters will make your characters and their stories more compelling, complex and original than ever before. You'll explore the most common male and female archetypes—the mythic, cross-cultural models from which all characters originate—and learn how to use them as foundations for your own unique characters.

Examples culled from literature, television and film illustrate just how memorable and effective these archetypes can be—from "Gladiators" and "Kings" like Rocky Balboa and Captain Ahab to "Amazons" and "Maidens" like Xena and Guinevere. The mythic journeys of heroes and heroines—the progression of events upon which each archetype's character arc develops—are also examined. Building such a "journey" into your character's story will enable you to stop

worrying about what happens next and get on with telling your tale. It's a power-packed method for creating characters that stand the test of time!

NBS Special Publication

Soil erosion has become a problem of crisis proportions in developing countries around the globe, and better approaches to land management are desperately needed. This book provides analytical frameworks to guide the creation and appraisal of

soil erosion control programs. The authors discuss a broad range of important issues involved in designing and implementing more effective soil conservation programs. The book begins with a discussion of the physical and economic dimensions of soil erosion and an estimation of the extent of the problem. It then explains how to improve the evaluation of soil conservation programs by integrating scientific knowledge with economic methods and procedures.

A series of practical illustrations graphically demonstrates the application of the concepts derived from the theory. The most important organizational, institutional, technical, and macroeconomic aspects of soil and land management appraisal are outlined, and the major elements of project or program design are also pinpointed and illustrated. Finally, the book suggests areas most in need of future research.
