While top-down policies and declarations have yet to establish equal status and opportunities for speakers of all languages in practice, activists and advocates at local levels are playing an increasingly significant role in the creation of new social imaginaries and practices in multilingual contexts. This volume describes how social actors across multiple domains contribute to the elusive goal of linguistic equality or justice through their language activism practices. Through an ethnographic account of Indigenous Isthmus Zapotec language activism in Oaxaca, Mexico, this study illuminates the (sometimes conflicting) imaginaries of what positive social change is and how it should be achieved, and the repertoire of strategies through which these imaginaries are being pursued. Ethnographic and action research conducted from 2013-2018 in the multilingual Isthmus of Tehuantepec brings to light the experiences of educators, students, writers, scholars and diverse cultural activists whose aspirations and strategies of social change are significant in shaping the future language ecology. Their repertoire of strategies may inform and encourage language activists, scholars, and educators working for change in other contexts of linguistic diversity and inequality.

Using Taiwan as a case study, this book constructs an innovative theory of a political sociology of language. Through documentary and ethnographic data and a comparative-historical method the book illustrates how language mediates interactions between society and the state and becomes politicized as a result; how language, politics and power are intertwined processes; and how these processes are not isolated in institutions but socially embedded.

Praxis II Test Review for the Praxis II Subject Assessments Kamehameha Schools Press

This book is an essential for providers and students of postgraduate level courses in educational management resource and for leadership development provision for head teacher induction programs, NPQH and LPSH. It is also suitable for short courses and for practitioners occupying or aspiring to leadership roles in schools, colleges and other educational organizations.

Dissertation Abstracts International Xamonline

The last three decades have witnessed a growth of interest in research on tasks from various perspectives and numerous books and collections of articles have been published focusing on the notion of task and its utility in different contexts. Nevertheless, what is lacking is a multi-faceted examination of tasks from different important perspectives. This edited volume, with four sections of three chapters each, views tasks and Task-based Language Teaching (TBLT) from four distinct (but complementary)

vantage points. In the first section, all chapters view tasks from a cognitive-interactionist angle with each addressing one key facet of either cognition or interaction (or both) in different contexts (CALL and EFL/ESL). Section two hinges on the idea that language teaching and learning is perhaps best conceptualized, understood, and investigated within a complexity theory framework which accounts for the dynamicity and interrelatedness of the variables involved. Viewing TBLT from a sociocultural lens is what connects the chapters included in the third section. Finally, the fourth section views TBLT from pedagogical and curricular vantage points.

Imaginations and Strategies of Minority Language Equality

Walter de Gruyter GmbH & Co KG

During the past 30 years, researchers have made exciting progress in the science of learning (i.e., how people learn) and the science of instruction (i.e., how to help people learn). This second edition of the Handbook of Research on Learning and Instruction is intended to provide an overview of these research advances. With chapters written by leading researchers from around the world, this volume examines learning and instruction in a variety of learning environments including in classrooms and out of classrooms, and with a variety of learners including K-16 students and adult learners. Contributors to this volume demonstrate how and why educational practice should be guided by research evidence concerning what works in instruction. The Handbook is written at a level that is appropriate for graduate students, researchers, and practitioners interested in an evidence-based approach to learning and instruction. The book is divided into two sections: learning and instruction. The learning section consists of chapters on how people learn in reading, writing, mathematics, science, history, second language, and physical education, as well as how people acquire the knowledge and processes required for critical thinking, studying, self-regulation, and motivation. The instruction section consists of chapters on effective instructional methods—feedback, examples, questioning, tutoring, visualizations, simulations, inquiry, discussion, collaboration, peer modeling, and adaptive instruction. Each chapter in this second edition of the Handbook has been thoroughly revised to integrate recent advances in the field of educational psychology. Two chapters have been added to reflect advances in both helping students develop learning strategies and using technology to

individualize instruction. As with the first edition, this updated volume showcases the best research being done on learning and instruction by traversing a broad array of academic domains, learning constructs, and instructional methods.

ASHE Volume 39, Number 5 SAGE

Despite being highly debated in applied linguistics and L2 teaching literature, the controversial issue of (non)nativeness still remains unresolved. Contemporary critical research has questioned the theoretical foundations of the nativeness paradigm, which still exerts a strong influence in the language teaching profession. Written by well-known researchers and teacher educators from all over the world, both NSs and NNSs, the selected contributions of this volume cover a great variety of aspects related to the professional role and status of both NS and NNS teachers in terms of both perceived differences and professional concerns and challenges. The strongest aspects of this volume are the global perspectives and the implications for future research and teacher education. It is precisely this international perspective which makes this volume illustrative of different realities with a similar objective in mind: the improvement of second language teaching and teacher education. In today's world, being a NS or NNS should not really matter but rather teachers' professional competences. This publication thus provides a forum of reflection and discussion for all L2 educators who need to be aware of how much they might offer to their future students.

WSC2008Chair's Welcome Message Dear Colleague, The World Soft Computing (WSC) conference is an annual international online conference on applied and theoretical soft computing technology. This WSC 2008 is the thirteenth conference in this series and it has been a great success. We received a lot of excellent paper submissions which were peer-reviewed by an international team of experts. Only 60 papers out of 111

submissions were selected for online publication. This assured a high quality standard for this online conference. The corresponding online statistics are a proof of the great world-wide interest in the WSC 2008 conference. The conference website had a total of 33,367 different human user accesses from 43 countries with around 100 visitors every day, 151 people signed up to WSC to discuss their scientific disciplines in our chat rooms and the forum. Also audio and slide presentations allowed a detailed discussion of the papers. The submissions and discussions showed that there is a wide range of soft computing applications to date. The topics covered by the conference range from applied to theoretical aspects of fuzzy, neuro-fuzzy and rough sets over to neural networks to single and multi-objective optimisation.

Contributions

about particles swarm optimisation, gene expression programming, clustering, classification, support vector machines, quantum evolution and agents systems have also been received. One whole session was devoted to soft computing techniques in computer graphics, imaging, vision and signal processing.

Are you ready to start teaching elementary education? This comprehensive guide provides you with the exact material you need to demonstrate your knowledge of the principles and processes of elementary education. Praxis Elementary Education 0011, 0012, 5011, 5015 teacher certification study guide covers the 6 content categories of Reading and Language Arts; Mathematics; Science; Social Studies; Arts and Physical Education; and General Information About Curriculum, Instruction, and Assessment. Covers 18 competencies, 81 skills, and contains 100 sample test questions and 4 constructed response essays. Included in this book is access to our online IntelliGuide™ - no CD needed! XAMonline's IntelliGuide™ is a new cutting-edge technology product that will redefine how students and professionals use eBooks and prepare for their exams. IntelliGuide™ is an online platform that transforms the traditional eBook experience from simply reading a static PDF to interacting with an enhanced study guide and test practice session using innovative tools such as printable eStickynotes, highlighter capability, pre-made or user-generated eFlashcards, and timed, scored, and hyperlinked practice tests. Dedicated to providing

teachers with the resources they need to succeed, XAMonline developed the IntelliGuide to move beyond the traditional PDF experience and help teachers attain certification the first time using superior study tools.

Teacher Education Programs in the United States is the only publication to offer, in one place, comprehensive information on the teacher education programs available in U.S. colleges and universities. Information includes accreditation of the programs, and the degrees and certification offered for students who complete the programs.

Teacher Education Programs in the United States Teacher Created Resources

Annotation "19 Urban Questions: Teaching in the City, the definitive overview of urban education, is provocative in style and rich in detail. Emphasizing the complexity of urban education, Steinberg, Kincheloe, and the authors ask direct questions about what urban teachers need to know. Their answers are guaranteed to generate both classroom discussion and discourse in the field for years to come. This is a volume that should be used in every school of education. Important topics include: difference in urban education; motives for teaching in city settings; understanding and dealing with drop-outs; the role of counseling in urban schools; identifying resistance in urban settings; gangs and gang membership; evaluation and assessment; unique issues relating to disabilities; bilingual education; unique issues in urban literacy; urban students and the writing process; technology in urban classrooms; the value of teaching science in urban settings; the role of aesthetics in city schools; health risks among city students; understanding the urban family.

A Focus on Estonian Higher Education Mometrix Media LLC

This book is the first longitudinal study that addresses language policy and planning in the context of a major international sporting event and examines the ideological, political, social, cultural, and economic effects of such context-specific policy initiatives on contemporary China. The book has important reference value for future research on language management at the supranational level and language services for linguistically complex events. At the same time, it presents some broader

implications for current and future language policy makers, language educators and learners, particularly from non-English speaking backgrounds. Foreword by Ingrid Piller

With a clear comparative approach, this volume brings together for the first time contributions that cover different periods of the history of ancient pharmacology, from Greek, Byzantine, and Syriac medicine to the Rabbinic-Talmudic medical discourses. This collection opens up new synchronic and diachronic perspectives in the study of the ancient traditions of recipe-books and medical collections. Besides the highly influential Galenic tradition, the contributions will focus on less studied Byzantine and Syriac sources as well as on the Talmudic tradition, which has never been systematically investigated in relation to medicine. This inquiry will highlight the overwhelming mass of information about drugs and remedies, which accumulated over the centuries and was disseminated in a variety of texts belonging to distinct cultural milieus. Through a close analysis of some relevant case studies, this volume will trace some paths of this transmission and transformation of pharmacological knowledge across cultural and linguistic boundaries, by pointing to the variety of disciplines and areas of expertise involved in the process.

Praxis II Test Review for the Praxis II Subject Assessments

Mometrix Media LLC

Here is an overview of students with disabilities in postsecondary institutions and the importance of allies in their lives. It is a call to action for faculty, staff, and administrators in all facets of higher education, and emphasizes the shared responsibility toward students with disabilities and toward creating meaningful change. This monograph begins with a look into the future of disability education. How will students create their own identities? Will there be a need for disability accommodations or will a universally designed world eliminate that current necessity? It also looks at the past, with discussions of disability legislation such as the ADA of 1990, the impact of Supreme Court decisions, descriptions of college students with disabilities, and the paradigm shift from the medical "deficit" model of disability to one that focuses on the individual's lived experience as a social construct. Drawing on theoretical frameworks in multiple

disciplines, disability identity development is explained, ally development is defined, and disability services are explored. The monograph ends with a discussion of where disability education is now and how faculty, staff, and administrators will continue to be

allies of inclusion for students in the years to come. This is the 5th issue of the 39th volume of the Jossey-Bass series ASHE Higher Education Report. Each monograph is the definitive analysis of a tough higher education issue, based on thorough research of

pertinent literature and institutional experiences. Topics are identified by a national survey. Noted practitioners and scholars are then commissioned to write their reports, with experts providing critical reviews of each manuscript before publication.
