The Dynamics of Interviewing Univ of California Press

Written in an accessible style, this book facilitates a deep understanding of the Rasch model. Authors Bond and Fox review the crucial properties of the Rasch model and demonstrate its use with a wide range of examples including the measurement of educational achievement, human development, attitudes, and medical rehabilitation. A glossary and numerous illustrations further aid the reader's understanding. The authors demonstrate how to apply Rasch analysis and prepare readers to perform their own analyses and interpret the results. Updated throughout,

highlights of the Second Edition include: a new CD that features an introductory version of the latest Winsteps program and the data files for the book's examples, preprogrammed to run using Winsteps; a new chapter on invariance that highlights the parallels between physical and human science measurement; a new appendix on analyzing data to help those new to Rasch analysis; more explanation of the key concepts and item characteristic curves; a new empirical example with data sets demonstrates the many facets of the Rasch model and other new examples; and an increased focus on issues related to unidimensionality, multidimensionality, and the Rasch factor analysis of residuals. Applying the Rasch Model is intended for researchers and practitioners in psychology, especially developmental psychologists, education, health care, medical rehabilitation, business, government, and those interested in measuring attitude, ability, and/or performance. The book is an excellent text for use in courses on advanced research methods, measurement, or quantitative analysis. Significant knowledge of statistics is not required.

Research Methods in Education H.M. WARD PRESS

This volume examines the assessment of higher order thinking skills from the perspectives of applied cognitive psychology and measurement theory. The volume considers a variety of higher order thinking skills, including problem solving, critical thinking, argumentation, decision making, creativity, metacognition, and self-regulation. Fourteen chapters by experts in learning and measurement comprise four sections which address conceptual approaches to understanding higher

order thinking skills, cognitively oriented assessment models, thinking in the content domains, and practical assessment issues. The volume discusses models of thinking skills, as well as applied issues related to the construction, validation, administration and scoring of performance-based, selected-response, and constructed-response assessments. The goal of the volume is to promote a better theoretical understanding of higher order thinking in order to facilitate instruction and assessment of those skills among students in all K-12 content domains, as well as professional licensure and certification settings.

Evaluation New York : Wiley

The Spice Islands Voyage is about a journey and a quest: a journey among the Spice Islands of equatorial Indonesia aboard a traditional native sailing vessel; a quest to rediscover Alfred Russel Wallace, the brilliant and intrepid naturalist who jointly proposed, with Charles Darwin, the theory of natural selection, and whose travels founded the science of zoo geography. Navigating through sparkling coral seas to remote shorelines, Tim Severin and his crew retraced the explorer's journeys, encountering green turtles and flying foxes, observing the smuggling of rare birds and rainforest destruction, but also witnessing the emergence of a new sense of environmental awareness. 'Full of insights retraces a journey through places of fabulous natural and cultural diversity should inspire new readers to discover the remarkable writings of Wallace himself', Independent

The Art of Social Media Routledge
Suitable for undergraduate Evaluation Research courses in a variety of departments, including psychology, sociology, public health, public policy/affairs, education, and criminal justice. Acquainting students with the complexities inherent in evaluation research, this timely and accessible guide explores how we apply research methods in evaluating social programs, and illustrates its points with reference to a variety of fields, including education, social services, and criminal justice. Written in an intelligent and graceful prose, it offers practical advice on understanding the reasons for the study, identifying key questions to be answered, and planning and implementing the overall design of the study, including measurement, qualitative methods of inquiry, data collection, analysis, reporting, and dissemination.

Birkhäuser

The majority of contributions to this volume, with the exception of those by Marcus Mietzner, Ross Tapsell and Thomas Power, were developed out of papers presented at the 37th annual Indonesia Update conference, held at the Australian National University (ANU), Canberra, on 6-7 September 2019. At each of the annual ANU Indonesia Updates since 2014, authors of the political update papers expressed growing concern about the downhill trajectory of Indonesia's democracy. The 2019 Update took stock of this trend by posing a question: had Indonesian democracy shifted from a state of stagnation, as proposed at the same venue five years previously, to one of regression? The excellent array of papers presented by the contributors to

this book revealed an overwhelming, and profoundly troubling, answer. We wish to express our thanks to each of the authors represented in this volume for being part of this endeavour. Not only did the contributors travel to Canberra to share their expert analyses, but in the months that followed they gave much of their time to our editorial process. The result is, we believe, an important and comprehensive evaluation of Indonesia's democratic decline at the outset of President Joko Widodo's second term. Indonesia has long been hailed as a rare case of democratic transition and persistence in an era of global democratic setbacks. But as the country enters its third decade of democracy, such laudatory assessments have become increasingly untenable. The stagnation that characterized Susilo Bambang Yudhoyono's second presidential term has given way to a more far-reaching pattern of democratic regression under his successor, Joko Widodo. This volume is the first comprehensive study of Indonesia's contemporary democratic decline. Its contributors identify, explain and debate the signs of regression, including arbitrary state crackdowns on freedom of speech and organization, the rise of vigilantism, deepening political polarization, populist mobilization, the dysfunction of key democratic institutions, and the erosion of checks and balances on executive power. They ask why Indonesia, until recently considered a beacon of democratic exceptionalism, increasingly conforms to the global pattern of democracy in retreat.

A History of God CRC Press

Why does God exist? How have the three dominant monotheistic religions—Judaism, Christianity, and

Islam—shaped and altered the conception of God? How have these religions influenced each other? In this stunningly intelligent book, Karen Armstrong, one of Britain's foremost commentators on religious affairs, traces the history of how men and women have perceived and experienced God, from the time of Abraham to the present. The epic story begins with the Jews' gradual transformation of pagan idol worship in Babylon into true monotheism—a concept previously unknown in the world. Christianity and Islam both rose on the foundation of this revolutionary idea, but these religions refashioned 'the One God' to suit the social and political needs of their followers. From classical philosophy and medieval mysticism to the Reformation, Karen Armstrong performs the near miracle of distilling the intellectual history of monotheism into one superbly readable volume, destined to take its place as a classic. Praise for *History of God* "An admirable and impressive work of synthesis that will give insight and satisfaction to thousands of lay readers."—The Washington Post Book World "A brilliantly lucid, splendidly readable book. [Karen] Armstrong has a dazzling ability: she can take a long and complex subject and reduce it to the fundamentals, without oversimplifying."—The Sunday Times (London) "Absorbing . . . A lode of learning."—Time "The most fascinating and learned study of the biggest wild goose chase in history—the quest for God. Karen Armstrong is a genius."—A.N. Wilson, author of *Jesus: A Life Acting IAP*

By now it's clear that whether you're promoting a business, a product, or yourself, social media is near the top of what determines your success or failure. And there are countless pundits, authors, and consultants eager to advise you. But there's no one quite like Guy Kawasaki, the legendary former chief evangelist for Apple and one of the pioneers of business blogging, tweeting, Facebooking, Tumbling, and much, much more. Now Guy has teamed up with Peg Fitzpatrick, who he says is the best social-media person he's ever met, to offer *The Art of Social Media*—the one essential guide you need to get the most bang for your time, effort, and money. With over one hundred practical tips, tricks, and insights, Guy and Peg present a bottom-up strategy to produce a focused, thorough, and compelling presence on the most popular social-media platforms. They guide you through steps to build your foundation, amass your digital assets, optimize your profile, attract more followers, and effectively integrate social media and blogging. For beginners overwhelmed by too many choices as well as seasoned professionals eager to improve their game, *The Art of Social Media* is full of tactics that have been proven to work in the real world. Or as Guy puts it, “great stuff, no fluff.”

Learning by Effective Utilization of Technologies: Facilitating Intercultural Understanding Corwin Press

A considerable amount of money is invested in an ongoing basis on large scale projects to enhance the quality of teaching and learning within the higher education sector. Examples from the UK include the Teaching Quality Enhancement Fund and the creation of CELTS - Centres for Excellence in Learning and Teaching. Similar initiatives can be found in most other Westernized countries. These projects (and other, smaller institutional projects) require evaluation, but the higher education sector has not conceptualized such evaluation work and therefore the opportunity to understand the value of

such projects is frequently missed. *Reconceptualising Evaluative Practices in HE* aims to aid understanding, drawing on a set of evaluative practices from the UK and internationally to foster understanding, which will be of genuine value and relevance to higher education over an indefinite period of time.

This book provides comprehensive coverage of issues that facility managers in the property industry need to understand and apply in the pursuit of value for money over the life span of built facilities. The authors introduce the fast-growing discipline of facility management, examine the core competencies that facility managers should possess and study different contemporary drivers of change. The book emphasises the need to consider facilities management issues at the pre-design stage of the construction process, rather than only when the building is completed, in order to maximise value for money.
