Putting two and two together takes practice and concentration! Help your child develop observation and reasoning abilities. This 64-page Thinking Skills workbook helps preschoolers practice organizing information, classifying, sequencing, completing picture analogies, and solving logic puzzles. A range of activities are designed to sharpen focus and attention to detail. "Circle 5 things

that are wrong with this picture." "Draw what comes next." "Put an X by the picture that shows why this happened." Full-color illustrations enhance every page.

For Grades 6-12 Little Thinkers

Don't simply show your data—tell a story with it! Storytelling with Data teaches you the fundamentals of data visualization and how to communicate effectively with data. You'll discover the power of storytelling and the way to make data a pivotal point in your story. The lessons in this illuminative text are grounded in theory, but made accessible through numerous real-world examples—ready for immediate application to your next graph or presentation.

Storytelling is not an inherent skill, especially when it comes to data visualization, and the tools at our disposal don't make it any easier. This book demonstrates how to go beyond conventional tools to reach the root of your data, and how to use your data to create an engaging, informative, compelling story. Specifically, you'll learn how to: Understand the importance of context and audience
Determine the appropriate type of graph for your situation
Recognize and eliminate the clutter clouding your information
Direct your audience's attention to the most important parts of your data
Think like a designer and utilize concepts of

design in data visualization Leverage the power of storytelling to help your message resonate with your audience Together, the lessons in this book will help you turn your data into high impact visual stories that stick with your audience. Rid your world of ineffective graphs, one exploding 3D pie chart at a time. There is a story in your data—Storytelling with Data will give you the skills and power to tell it!

Big Preschool

Workbook Kumon

Publishing North America

Published to coincide with the twentieth anniversary of the fall of the Berlin Wall — a definitive and groundbreaking account of the revolutionary

ideology that changed the modern world. The inexorable rise of Communism was the most momentous political phenomenon of the first half of the twentieth century. Its demise in Europe and its decline elsewhere have produced the most profound political changes of the last few decades. In this illuminating book, based on forty years of study and a wealth of new sources, Archie Brown provides a comprehensive history as well as an original and highly readable analysis of an ideology that has shaped the world and still rules over a fifth of humanity. A compelling new work from an internationally renowned specialist, *The Rise and Fall of Communism* promises

to be the definitive study of the most remarkable political and human story of our times.

Our Thinking Skills Workbooks strengthen critical thinking skills that are crucial for success in school and beyond.

Beginning Highlights Press

Our Thinking Skills Workbooks strengthen critical thinking skills that are crucial for your child's success in school and in life. With our effective step-by-step method and colorful, engaging activities, your child will enjoy each page as he or she builds essential skills.

Primarily Logic ASCD

It's never too early to start building thinking skills—skills that will spill over into other areas of the curriculum and into real life.

Primarily Logic consists of a series of units designed to introduce logical thinking to young students. It is an excellent, easy-to-use starting point for teaching well-established forms of logical thinking. Each skill is introduced with examples, and then worksheets give students an opportunity to practice the skill. Group lessons and worksheets provide practice in: finding relationships, analogies, thinking logically using “all” and “none” statements, syllogisms, and deductive reasoning using logic puzzles. Logical thinking is both

enjoyable and challenging for students as they build a sound foundation for further instruction in critical thinking.

Suggestions for related activities are included in the Instructions for Teachers section. For easier logic activities for younger students, try Lollipop Logic.

Grades 2-4

Critical Thinking and Logical Reasoning
Kumon Publishing

North America

A unique blend of age-appropriate tracing and writing activities are combined with puzzles to make learning fun while helping kindergarteners build logic and critical thinking skills and develop lifelong learning confidence. Developing good thinking and deductive reasoning skills is an

important step toward success in school, and Highlights (TM) infuses Fun with a Purpose® into this essential learning activity. With vibrant art and engaging prompts, Thinking and Reasoning exposes kindergarteners to concepts such as sequencing and grouping and sorting through appealing activities and fun puzzles, including That's Silly!(TM) and Hidden Pictures® puzzles.

Big Kindergarten Workbook Scholastic Inc.

The Gift Of Logic (tm) Critical Thinking & Logical Reasoning Series is a set of twelve workbooks written with the goal of establishing a basic standard in cognitive thinking for K-12 students. These

workbooks will help the students develop cognitive skills in three strands - Verbal Reasoning, Analytical Reasoning, and Pictorial Reasoning. Each workbook has a variety of exercises in these three strands. These workbooks can be used by college students and working professionals as well for a quick and easy introduction to logic and reasoning. Visit the Gift Of Logic website for more information. Ideal for use during the school day to keep the students challenged, and during winter and summer breaks to maintain strong thinking skills. Gifted and Talented students and Homeschoolers can use it as a comprehensive curriculum.

Logic Puzzles for Clever Kids Kumon Publishing North America

This classic book will excite students' imaginations while enriching skills in logical thinking.

Orbiting with Logic problems are easy to

incorporate into lesson plans and are formatted to enhance the fullest spectrum of curriculum areas while sharpening thinking skills. Challenging and instructional, these thought-provoking books present

sequential exercises in logical reasoning that include relationships, analogies, syllogisms, sequences, deductive reasoning, inference, truth-values, and logical notation. Simple

grids coupled with intriguing problems evoke enthusiasm and inspire students to higher and higher levels of thinking. Each book in this series builds on concepts presented previously in the series to offer a comprehensive logic adventure for young thinkers. The skills students build by using

this book are applicable to several areas of the curriculum. Academic skills used in reading, math, writing, and science all depend on the ability to perceive and define relationships, sequence events, and form inferences. But, beyond the academic world students will find logical thinking an integral part of everyday life.

Deductive Thinking Skills Doubleday

Canada

“Ellen

Galinsky—already the go-to person on interaction between families and the workplace—draws on fresh research to explain what we ought to be teaching our children. This is must-reading for everyone who cares about

America’s fate in the 21st century.” — Judy Woodruff, Senior Correspondent for The PBS NewsHour Families and Work Institute President Ellen Galinsky (*Ask the Children, The Six Stages of Parenthood*) presents a book of groundbreaking advice based on the latest research on child development.

Mind in the Making
Kumon Publishing

North America

Builds on early reading skills to help children master the reading and writing of phrases that combine similar-sounding consonant and vowel combinations in a volume that offers tracing and pronunciation games involving such example phrases as "grab the grape" and "ride the

bike." Original.
