A practical, concise, and up-to-date reference for the ICU LANGE Critical Care delivers concise, evidenced-based, and highly clinical coverage of the surgical and medical aspects of critical care. The book provides basic fundamentals, applications and insights that will be of lasting value to all ICU physicians, nurses, advanced care providers, and allied personnel who care for the critically ill and injured patients in all ICUs. Noteworthy features include a well-illustrated Clinical Care Procedures section, high-yield summaries of the full spectrum of essential critical care topics, and the inclusion of "Controversies" chapters throughout each section addressing some of the ambiguous aspects of critical care. This timely book also covers the growing scope of critical care provided outside the ICU and the increasing importance of critical care services within the hospital structure. In keeping with the multi-professional nature of critical care delivery, several chapters are authored or coauthored by critical care fellows, ICU nurses, physician assistants, nurse practitioners, and pharmacists. FEATURES: • Includes both the surgical and medical aspects of critical care, making it valuable to the intensivist working in the medical, surgical, or neurological ICU • Utilizes

numerous visual elements such as figures, tables, and algorithms

- Appendix contains valuable reference material and formulas, including a chapter on bedside statistics
- Excellent primer for internal medicine and anesthesiology ICU rotations and great for board examination review

*Glencoe Health Student Edition 2011* McGraw Hill Professional The world's leading source of evidence-based guidance on caring for patients at the end of life. Featuring the content of the world's

most widely read medical journal, plus completely new, never-before-published content. Perfect for medical students, trainees, and clinicians alike. Market / Audience Medical students: 18000/yr US, 250,000 global NP and PA students: 25,000/yr US, 50,000+ global IM and FP residents: 30,000 US, 60,000 global IM and FP clinicians: 140,000 US, 300,000+ global Palliative medicine: 3000 US Oncology: 20,000 US, 60,000 global Social workers About the Book In the tradition of the User's Guides to the Medical Literature, and The Rational Clinical Examination, JAMA/Care at the Close of Life is based on a widely successful series of articles appearing over the course of the last ten years in JAMA, the world's most widely read medical journal. The series is directed by Stephen McPhee, a leading authority of end of life care, and the chief editor of our market leading Current Medical Diagnosis and Treatment text. The articles in the series cover fundamental topics and challenges in caring for patients who have been given a terminal diagnosis. Featuring a strong focus on evidence-based medicine, and organized by clinical cases, the articles are widely read by faculty, medical students, and clinicians who, frankly, have not been given a solid educational experience on this very important medical issue. The book will be physically modeled after The Rational Clinical Examination, in a full color format that highlights the clinical cases. It will be well suited for use as an required or recommended textbook for medical, PA, and NO students, and as a clinical reference text for trainees and practicing physicians and nurses. Key Selling Features Based on highly regarded content from the world's most widely read medical journal All content is completely updated, and extensive new, never-before-published content has been added Case-based, and evidence-based, so its a perfect fit for the way medical students and residents like to learn Focuses on practical, real-world issues for primary care physicians, and avoids esoteric issues of interest only to specialists in palliative care Full color format, modeled after the highly regarded Rational Clinical Examination Includes multimedia materials available on line: Power Point slides for teaching, and video interviews with patients in end-of-life care, so that faculty and students get supplemental resources for learning the art and science of care at the end of life Evidence-based guidance from the world's leading medical journal, on a critical topic that has been neglected in medical education and training until recently. Author Profile JAMA is the

world's most widely read medical journal, and has a reputation for excellence in evidence-based medicine. Stephen McPhee has high visibility on account of his editorship of CMDT, and for his driving role in enhancing end of life care in medical education and training programs. He is: Professor of Medicine, UCSF School of Medicine, San Francisco CA
