The goals of the Conference were to foster increased communication and understanding between practitioners and researchers and among various research disciplines, to present and discuss research results, and to identify possible future research activities. The participation and interaction of both high level negotiations practitioners and researchers were considered especially valuable and unique aspects of the Conference. All of the subjects dealt with at the Conference have direct and obvious relevance to improving negotiations outcomes on, and the ability to deal effectively with, such issues as the trans boundary effects (environmental, economic, etc.) of technological risk, security and confidence-building measures, and international economic cooperation- all of which are high on the negotiations agenda of many countries.

International Operations Management: Lessons in Global Business uses a fascinating selection of case studies researched during the 'International Operations Management Project', sponsored by the European Commission, to produce a valuable view of businesses in Western and Eastern traditions. Ranging from China Post and Flextronics International (Singapore) to Electrolux, Ford, and GlaxoSmithKline, the studies link conceptual and practical approaches in five areas: international operations management strategy, sourcing and manufacturing, new product development, logistics, and networked organisations. Throughout, the authors compare the Western and Eastern approaches to business, and introduce theory to clarify the comparison and the real consequences of internationalisation. With its balance of theoretical and applied content, this volume, created from an exciting collaboration between universities and schools of management in Europe and China, serves as both a primary and supplementary source for higher level students and educators, and as

Fluctuations and Non-linear Wave Interactions in Plasmas talks about a theory of fluctuations in a homogenous plasma. The title takes into consideration non-linear wave interactions. The text first presents the statistical description of plasma, and then proceeds to covering non-linear electrodynamic equations. Next, the selection deals with the electrodynamic properties of magento-active plasma and waves in plasma. The text also tackles non-linear wave interactions, along with fluctuations in plasmas. The next chapter talks about the effect of non-linear wave interaction on fluctuations in a plasma. Chapter 8 details fluctuation-dissipation theorem, while Chapter 9 discusses kinetic equations. The tenth chapter covers the scattering and radiation of waves and the last chapter tackles wave interaction in semi-bounded plasma. The book will be of great use to scientists and professionals who deals with plasmas.
