ALANNAH MARISA

JOB INTERVIEW Offshore Oil & Gas Rigs Petrogav International

A comprehensive, tour-de-force analysis of the birth of slavery, racism, and white supremacy in the American South—and how it shaped our modern world. “A must-read for all social justice activists, teachers, and scholars.” —Roxanne Dunbar-Ortiz, author of *An Indigenous*

Peoples’ History of the United States Long heralded as a classic study of the origin of white privilege from the activist who first coined the term, Theodore W. Allen’s work remains an indispensable resource for making sense of our conflicted present, a reference point for everyone from Roxanne Dunbar-Ortiz and Nell Irvin Painter to Reni-Eddo Lodge and Aníbal Quijano. When the first Africans arrived in Virginia in 1619, there were no “white” people there. Nor, according to colonial records, would

there be for another sixty years. In this seminal work, available for the first time here in a single volume, Allen tells how America's ruling classes created the category of the "white race" as a means of social control. Since that early invention, white privileges have enforced the myth of racial superiority, a fact central to maintaining ruling class domination over ordinary working people of all colors throughout the history of the Atlantic world. Spanning centuries and nations, Allen's analysis takes us from the plantations of Northern Ireland and the mines of Peru to the sugar fields of Brazil and colonies of Chesapeake Bay, Virginia. His account records lives of hardscrabble immigrant survival, Faustian bargains with white supremacy, the tragedy of human bondage, and the

stubborn, unbreakable resistance to the global color line.

Studies of Communication in the 2016 Presidential Campaign CRC Press

"There are textbooks galore, but there aren't many crafted as intelligently as this one. This book will change the way that students understand leisure. It will give them an easier entry to that place where difficult ideas fuse into something intelligible, where real understanding sits and the educated imagination is stirred." - Tony Blackshaw, Sheffield Hallam University Peter Bramham and Stephen Wagg provide a foundation for those studying within the broad field of leisure studies. The book gives students an accessible and engaging introduction to leisure studies and leisure research, encouraging students to engage in

reflexive analysis of their common sense understandings of everyday life and enabling them to develop an understanding of contemporary leisure studies and changing leisure practices.

Critical Race Judgments Fordham Univ Press

The classic account of an unforgettable endurance test, now updated with a new introduction The 1989 Ironman World Championship was the greatest race ever in endurance sports. In a spectacular duel that became known as the Iron War, the world's two strongest athletes raced side by side at world-record pace for a grueling 139 miles. Driven by one of the fiercest rivalries in triathlon, Dave Scott and Mark Allen raced shoulder to shoulder through Ironman's 2.4-mile swim, 112-mile bike

race, and 26.2-mile marathon. After 8 punishing hours, both men would demolish the previous record--and cross the finish line a mere 58 seconds apart. In *Iron War*, sports journalist Matt Fitzgerald writes a riveting epic about how Allen and Scott drove themselves and each other through the most awe-inspiring race in sports history. *Iron War* goes beyond the pulse-pounding race story to offer a fascinating exploration of the lives of the world's two toughest men and their unquenchable desire to succeed. Weaving an examination of mental resolve into a gripping tale of athletic adventure, *Iron War* is a soaring narrative of two champions and the paths that led to their stunning final showdown.

The Measure of America 2010-2011

Oxford University Press

A gripping in-depth look at the presidential election that stunned the world Donald Trump's election victory resulted in one of the most unexpected presidencies in history. *Identity Crisis* provides the definitive account of the campaign that seemed to break all the political rules—but in fact didn't. Featuring a new afterword by the authors that discusses the 2018 midterms and today's emerging political trends, this compelling book describes how Trump's victory was foreshadowed by changes in the Democratic and Republican coalitions that were driven by people's racial and ethnic identities, and how the Trump campaign exacerbated these divisions by hammering away on race, immigration,

and religion. The result was an epic battle not just for the White House but about what America should be.

The Secret of Cycling Petrogav International

Using CRT, this book demonstrates how law can make Black lives, and the lives of other racially marginalized groups, matter.

Topothesia Verso

From one of our most important scholars and civil rights activist icon, a powerful study of the women's liberation movement and the tangled knot of oppression facing Black women. "Angela Davis is herself a woman of undeniable courage. She should be heard."—The New York Times Angela Davis provides a powerful history of the social and political influence of whiteness and

elitism in feminism, from abolitionist days to the present, and demonstrates how the racist and classist biases of its leaders inevitably hampered any collective ambitions. While Black women were aided by some activists like Sarah and Angelina Grimke and the suffrage cause found unwavering support in Frederick Douglass, many women played on the fears of white supremacists for political gain rather than take an intersectional approach to liberation. Here, Davis not only contextualizes the legacy and pitfalls of civil and women's rights activists, but also discusses Communist women, the murder of Emmitt Till, and Margaret Sanger's racism. Davis shows readers how the inequalities between Black and white women influence the contemporary

issues of rape, reproductive freedom, housework and child care in this bold and indispensable work.

Race and Crime University Press of Colorado

The volume is based on the groundbreaking American Human Development Index, which provides a single measure of well-being for all Americans, broken down by state and congressional district, as well as by race, gender, and ethnicity. The Index rankings of the 50 states and 435 congressional districts reveal huge disparities in the health, education, and standard of living of different groups.

An Introduction to Leisure Studies

Vintage

In *The Place with No Edge*, Adam Mandelman follows three centuries of

human efforts to inhabit and control the lower Mississippi River delta, the vast watery flatlands spreading across much of southern Louisiana. He finds that people's use of technology to tame unruly nature in the region has produced interdependence with—rather than independence from—the environment. Created over millennia by deposits of silt and sand, the Mississippi River delta is one of the most dynamic landscapes in North America. From the eighteenth-century establishment of the first French fort below New Orleans to the creation of Louisiana's Coastal Master Plan in the 2000s, people have attempted to harness and master this landscape through technology. Mandelman examines six specific interventions employed in the delta over time: levees,

rice flumes, pullboats, geophysical surveys, dredgers, and petroleum cracking. He demonstrates that even as people seemed to gain control over the environment, they grew more deeply intertwined with—and vulnerable to—it. The greatest folly, Mandelman argues, is to believe that technology affords mastery. Environmental catastrophes of coastal land loss and petrochemical pollution may appear to be disconnected, but both emerged from the same fantasy of harnessing nature to technology. Similarly, the levee system's failures and the subsequent deluge after Hurricane Katrina owe as much to centuries of human entanglement with the delta as to global warming's rising seas and strengthening storms. The Place with No Edge advocates for a

deeper understanding of humans' relationship with nature. It provides compelling evidence that altering the environment—whether to make it habitable, profitable, or navigable—inevitably brings a response, sometimes with unanticipated consequences. Mandelman encourages a mindfulness of the ways that our inventions engage with nature and a willingness to intervene in responsible, respectful ways.

"Tabbner's Nursing Care: Theory and Practice is the only Australian and New Zealand textbook written specifically for the enrolled nurse student. The new 5th edition of this best-selling text has been fully revised and updated throughout to reflect the content of the new National Curriculum. Unit 1 The evolution of nursing Unit 2 The health care environment Unit 3 Cultural diversity and nursing practice Unit 4 Promoting psychosocial health in nursing practice Unit 5 Nursing individuals throughout the lifespan Unit 6 The nursing process Unit 7 Assessing health Unit 8 Important component of nursing care Unit 9 Health

promotion and nursing care of the individual Appendices."--Provided by publisher.

Python for Software Design Triumph Books

Continuing to challenge American colleges and universities is the underrepresentation of women faculty in Science, Technology, Engineering, and Mathematics (STEM) fields, particularly Latinas and other underrepresented women of color. *Advancing Women in Academic STEM Fields through Dual Career Policies and Practices*, comprised of scholarly essays, case studies, and interviews, argues that to address equity issues related to women faculty, academic institutions should consider work-life perspectives, including dual careers, when designing faculty

recruitment, retention, and advancement strategies. By connecting the topic of dual career hiring to gender and ethnicity, the volume extends the current research on work-life integration by sharing best practices and approaches that have worked among institutions of higher education while incorporating issues related to intersectionality.

Advancing Women in Academic STEM Fields through Dual Career Policies and Practices LSU Press

Developed from celebrated Harvard statistics lectures, Introduction to Probability provides essential language

and tools for understanding statistics, randomness, and uncertainty. The book explores a wide variety of applications and examples, ranging from coincidences and paradoxes to Google PageRank and Markov chain Monte Carlo (MCMC). Additional application areas explored include genetics, medicine, computer science, and information theory. The print book version includes a code that provides free access to an eBook version. The authors present the material in an accessible style and motivate concepts using real-world examples. Throughout, they use stories to uncover connections between the fundamental distributions in statistics and conditioning to reduce complicated problems to manageable pieces. The book includes many intuitive

explanations, diagrams, and practice problems. Each chapter ends with a section showing how to perform relevant simulations and calculations in R, a free statistical software environment.

The courageous and inspiring personal narratives and empirical studies in *Presumed Incompetent II: Race, Class, Power, and Resistance of Women in Academia* name formidable obstacles and systemic biases that all women faculty—from diverse intersectional and transnational identities and from tenure track, terminal contract, and administrative positions—encounter in their higher education careers. They provide practical, specific, and insightful guidance to fight back, prevail, and

thrive in challenging work environments. This new volume comes at a crucial historical moment as the United States grapples with a resurgence of white supremacy and misogyny at the forefront of our social and political dialogues that continue to permeate the academic world. Contributors: Marcia Allen Owens, Sarah Amira de la Garza, Sahar Aziz, Jacquelyn Bridgeman, Jamiella Brooks, Lolita Buckner Inniss, Kim Case, Donna Castaneda, Julia Chang, Meredith Clark, Meera Deo, Penelope Espinoza, Yvette Flores, Lynn Fujiwara, Jennifer Gomez, Angela Harris, Dorothy Hines, Rachelle Joplin, Jessica Lavariega Monforti, Cynthia Lee, Yessenia Manzo, Melissa Michelson, Susie E. The Invention of the White Race

Petrogav International

In an era increasingly marked by polarized and unproductive political debates, this volume makes the case for a renewed emphasis on teaching speech and debate, both in and outside of the classroom. Speech and debate education leads students to better understand their First Amendment rights and the power of

speaking. It teaches them to work together collaboratively to solve problems, and it encourages critical thinking, reasoned and fact-based argumentation, and respect for differing viewpoints in our increasingly diverse and global society. Highlighting the need for more emphasis on the ethics and skills of democratic deliberation, the contributors to this volume—leading scholars, teachers, and coaches in speech and debate programs around the country—offer new ideas for reinvigorating curricular and co-curricular speech and debate by recovering and reinventing their historical mission as civic education. Combining historical case studies, theoretical reflections, and reports on programs that utilize rhetorical

pedagogies to educate for citizenship, *Speech and Debate as Civic Education* is a first-of-its-kind collection of the best ideas for reinventing and revitalizing the civic mission of speech and debate for a new generation of students. In addition to the editors, the contributors to this volume include Jenn Anderson, Michael D. Bartanen, Ann Crigler, Sara A. Mehlretter Drury, David A. Frank, G. Thomas Goodnight, Ronald Walter Greene, Taylor W. Hahn, Darrin Hicks, Edward A. Hinck, Jin Huang, Una Kimokeo-Goes, Rebecca A. Kuehl, Lorand Laskai, Tim Lewis, Robert S. Littlefield, Allan D. Provides a solid foundation for understanding American agricultural history and offers new directions for research. A Companion to American Agricultural History addresses the key aspects of America's complex agricultural past from 8,000 BCE to the first decades of the twenty-first century. Bringing together more than thirty original essays by both established and emerging scholars, this innovative volume presents a succinct and accessible overview of American agricultural history while delivering a state-of-the-art assessment of modern scholarship on a diversity of subjects,

themes, and issues. The essays provide readers with starting points for their exploration of American agricultural history—whether in general or in regards to a specific topic—and highlights the many ways the agricultural history of America is of integral importance to the wider American experience. Individual essays trace the origin and development of agricultural politics and policies, examine changes in science, technology, and government regulations, offer analytical suggestions for new research areas, discuss matters of ethnicity and gender in American agriculture, and more. This Companion: Introduces readers to a uniquely wide range of topics within the study of American agricultural history. Provides a narrative summary and a critical examination of

field-defining works Introduces specific topics within American agricultural history such as agrarian reform, agribusiness, and agricultural power and production Discusses the impacts of American agriculture on different groups including Native Americans, African Americans, and European, Asian, and Latinx immigrants Views the agricultural history of America through new interdisciplinary lenses of race, class, and the environment Explores depictions of American agriculture in film, popular music, literature, and art A Companion to American Agricultural History is an essential resource for introductory students and general readers seeking a concise overview of the subject, and for graduate students and scholars wanting to learn about a particular aspect of

American agricultural history. *Technical questions and answers for job interview Offshore Oil & Gas Platforms* Univ of California Press Award-winning teacher, blogger, and author Larry Ferlazzo is back with more insightful research and strategies for helping students want to care more about school and learning. In his previous books on motivation—*Helping Students Motivate Themselves* and *Self-Driven Learning*—he tackled ways to help students build intrinsic motivation by how you use class time, manage your class, encourage students to feel positive about learning, help them not feel burned out by testing, and more. In this book, he looks at how teachers can create classroom conditions that are needed for motivation to grow in the first

place. Ferlazzo provides research-based suggestions on what you can do today to help students want to develop qualities like physical health, grit, flow, and a desire to transfer what they're learning to life outside of school. At the end of each chapter, you'll find high-interest lesson plans, correlated to the Common Core ELA/Literacy Standards, that set the stage for long-term positive impacts. Students will read about sports stars, how maintaining a healthy lifestyle can help them achieve their goals, and other engaging topics. They will integrate information from various texts and make connections to their own lives, hopes and dreams—a more powerful way to learn to care than being told they should. The readings for these lessons and other tools are available as free

eResources on our website so you can easily print them for your students. *A Companion to American Agricultural History* Petrogav International Meyer & Meyer Premium — the next level of instructional sports literature with high-quality, full-color books. How much power does your human engine have? How much power do you need for cycling in different conditions? How can you optimize your training and racing performance? How can you use power meters to improve your results? What are the ultimate limits of human performance? *The Secret of Cycling* answers all of these questions. All factors determining the performance in cycling are explained step by step: training, nutrition, body weight, bike weight, wheels, frame, aerobars, power

meters, wind, hills, temperature, the world hour record and much more. Many graphs, tables and examples from practice make it very easy to understand for the reader. Get 20% fitter, healthier and faster! This title also contains brand new insights on how the balance of the power of your human engine and the power requirement for cycling in

different conditions determines your performance. It shows how power meters can be used to optimize your training and your race result. Being already a bestseller in the Netherlands and Belgium, The Secret of Cycling can be considered the ultimate textbook for all serious cyclists and their coaches.
