Directions: Put a check mark in the space to identify the correct front(s). Front Weather Event Cold Warm Stationary Occluded 1. A colder air mass moves toward a warmer air mass. 2. An approaching front stalls. 3. Warm air glides above a cold air mass. 4. A fast-moving cold front catchesName: Pd: Date: Page # Weather Patterns -- Lesson 2 Study ...Section 2 Objectives 1. Describe how weather is associated with fronts and high- and low-pressure areas. 2. Explain how tornadoes develop from thunderstorms. 3. Discuss the dangers of severe weather. Section 2: Weather PatternsChapter 16: Weather - SAS-WinstedStudy Guide and Reinforcement 1 ANSWER KEY Chapter 1, The Nature of Science Section 1 (p. 1) 1. scientia 9. 4 2. knowledge 10. 1 3. observation 11. 3 4. investigation ...Study Guide and Reinforce Answers - Hanover Area School ...Section 2 Weather Patterns A. Because ____ and ____ move in the atmosphere, weather constantly changes. 1. Air mass—a large body of air with properties like the part of ____ over which it formed 2. Stormy weather is associated with ____ pressure areas. 3.Name Date Class Directed Reading for Overview Content ...Section 2 Currents and Climate Key Concept Ocean currents transport energy, affect climate and weather, and distribute nutrients. What You Will Learn • Surface currents affect climate by distributing energy around Earth. • Changes in surface currents, such as El Niño, can cause changes in weather patterns. Why It MattersSection 2 Currents and

Climate - Travellin - HomeImagine our weather if Earth were completely motionless, had a flat dry landscape and an untilted axis. This of course is not the case; if it were, the weather would be very different. The local weather that impacts our daily lives results from large global patterns in the atmosphere caused by the interactions of solar radiation, Earth's large ocean, diverse landscapes, and motion in space.Weather systems & patterns | National Oceanic and ...7.E.1.2 Explain how the cycling of water in and out of the atmosphere and atmospheric conditions relate to the weather patterns on earth. 7.E.1.5 Explain the influence of convection, global winds and the jet stream on weather and climatic conditions.Section 2-2 "Energy Transfer & The Water Cycle"FIGURE 2 represents a 7.
