Real life is messier than the movies. A bold, thought-provoking novel from the exceptionally talented, Steven Camden.

**Max Doesn't Like to Read** Cambridge University Press

This is a charming story about one really bad monster who learns to change his ways. Written originally in French, and illustrated with delightfully ghoulish paintings by the Québécois artist known simply as Rogé, *Taming Horrible Harry* is a wonderful tale about the power of

stories. At the gates of a beautiful forest, Harry the monster lies in wait. One day, as monsters are wont to do, he frightens a little girl, who runs away leaving behind a peculiar object. Harry picks it up, turns it over, bites it ... spits it out, and throws it down in a fury! He wonders what kind of a thing he has found. As it turns out, the object is a book ... and one way or another, Harry learns to read it, and his life is changed forever. This delightful story will enchant both young readers and their parents, teachers, and librarians, as they discover together, the magic of reading.

*Textrovert* HarperCollins UK

An interactive approach to first-year French for English speakers.

**Les Livres disponibles** CLE International

This book brings together history educators from Australia and around the world to tell their own personal stories and how they approach teaching history in the context of contemporary tensions in the classroom. It encourages historians to think actively about how history in the classroom can play a role in helping students to make sense of their world and to act honourably within it. The contributors come from diverse backgrounds and include experienced history educators and early career academics. They showcase both a mix of approaches and democratize and decolonize the academy. The book blends theory and practice. It reflects on what is happening in the classroom and supports the discipline to understanding itself better, to improve upon its practices and to engage in academic discussion about the responsibility of teaching in the contemporary world.

*A Place to Live* Routledge

Some people might think it's odd when a teenage boy starts making movies of his

classmates kissing. But in A PLACE TO LIVE, the aspiring filmmaker's project turns into a compelling protest against authoritarianism that could get him kicked out of school, and expose his surprising feelings for his best friend.

*The Road to Chlifa* Peter Lang

Follow Hermes on 100 unforgettable journeys across the fascinating, colourful world of Greek mythology. The young god is determined to have adventures from the very moment of his unusual birth, stealing sacred cows, discovering fire and inventing the lyre and flute. With his tumbling brown curls and cheerful fearlessness, he charms his fellow gods: mighty Apollo, mournful Artemis, beautiful Aphrodite, and even the king of the gods, his father, Zeus himself. He will drink the nectar of Olympus and discover the truth about the immortals, from their first moments and worst monsters to their greatest loves and most terrible battles-but Hermes won't let any of it distract him from that whole wide world of good fun...

Children Learn by Observing and Contributing to Family and Community Endeavors, the latest in the Advances in Child Development and Behavior Series provides a major step forward in

highlighting patterns and variability in the normative development of the everyday lives of children, expanding beyond the usual research populations that have extensive Western schooling in common. The book documents the organization of children's learning and social lives, especially among children whose families have historical roots in the Americas (North, Central, and South), where children traditionally are included and contribute to the activities of their families and communities, and where Western schooling is a recent foreign influence. The findings and theoretical arguments highlight a coherent picture of the importance of the development of children's participation in ongoing activity as presented by authors with extensive experience living and working in such communities. - Contains contributions from leading authorities in the field of child development and behavior - Presents a coherent picture of the importance of the development of children's participation in ongoing activity - Provides a major step forward in highlighting patterns and variability in the normative development of the everyday lives of children, expanding beyond the usual research populations that have extensive Western schooling in common - Informs and updates on all the latest developments in the field

A trio of no-good loafers learns that it's unwise to push a stinkbug too far.

**It's About Love** Ashgate Publishing, Ltd.

The legendary goalie who revolutionized the game of hockey Young Jacques Plante's way of playing hockey may look different from everyone else's. Instead of a puck, he uses a tennis ball, and his

shin pads are made out of potato sacks and wooden slats. But that's not going to stop him. He loves the game. Jacques is drafted by the Montreal Canadiens in his mid-twenties. Fans love the unstoppable goalie as he leads his team to one victory after another. But there's a price to pay: pucks to the face result in a broken jaw, broken cheekbones, multiple stitches, and even a skull fracture. One day, Jacques has had enough. He goes on the ice wearing a fiberglass mask. The coach orders him to take it off. Finally, at a game against the Rangers, when yet another puck hits Jacques square in the face, he puts his foot down. He will not continue to play unless he's allowed to wear a mask. Young hockey fans will enjoy this story of Jacques Plante, whose determination and love of the game brought about a revolutionary change to how it is played. *Perspectives pour une didactique des langues contextualisée* BoD - Books on Demand

Twenty years after the fall of the Berlin Wall, the question remains 'Do good fences still make good neighbours'? Since the Great Wall of China, the Antonine Wall, built in Scotland to support Hadrian's Wall, the Roman 'Limes' or the Danevirk fence, the 'wall' has been a constant in the protection of defined entities claiming sovereignty, East and West. But is the wall more than an historical relict for the management of borders? In recent years, the wall has been given renewed vigour in North America, particularly along the U.S.-Mexico border, and in Israel-Palestine. But the success of these new walls in the development of friendly and orderly relations between nations (or indeed, within nations) remains unclear. What role does the wall play in the development of security and insecurity?

Do walls contribute to a sense of insecurity as much as they assuage fears and create a sense of security for those 'behind the line'? Exactly what kind of security is associated with border walls? This book explores the issue of how the return of the border fences and walls as a political tool may be symptomatic of a new era in border studies and international relations. Taking a multidisciplinary approach, this volume examines problems that include security issues ; the recurrence and/or decline of the wall; wall discourses ; legal approaches to the wall; the 'wall industry' and border technology, as well as their symbolism, role, objectives and efficiency.

**Livres hebdo** Academic Press

What remains of materialism's subversive potential — i.e., its ties with heresy or atheism and republicanism or communism — and to what extent does this concept still interpellate us politically and philosophically? As neoliberal policies expanded far beyond the state, their mechanisms of control seeped into the materiality of social reproduction, solidifying a conception of matter as something inert, to be appropriated, manipulated, and exploited. If in this context the subversive nature of a reference to materiality is called into question, it has also provoked new forms of resistance, as well as fundamental reconsiderations of the political implications of the notion of 'matter'. Against this background, the aim of this book is to show the diversity within continued engagements with materialism as a central concept for progressive politics, be it in the direction opened up by New Materialism, in renewed forms of Marxist and Spinozist based approaches, or in feminist analyses, each in their own terms,

without excluding the possibility of alliances between them. Finally, this volume insists that the study of materiality and materialist approaches does not amount to a renunciation of philosophy, but rather urges us to broaden the task of philosophical thought in order to reconsider the historical and, in every sense of the word, material situatedness of all philosophical problems. Against a reductive and ahistorical conception of materialism — the straightest way back to ideology —, this book offers an analysis of its diverse emancipatory potentialities.

Teaching History for the Contemporary World Dorling Kindersley

Self Managed Learning and the New Educational Paradigm proposes revolutionary change to the educational system. The overwhelming research evidence is that the sum total of educational and training input accounts typically for only 10–20% of what makes a person an effective human being. Balancing theory, evidence and practice, this ground-breaking book demonstrates that current structures in education are ill-equipped to support a learning-based approach. It establishes the case that learning, as a core human activity, is too important to be left to schools and other educational institutions. The book goes beyond just a critique of current practice in showing how a New Educational Paradigm can work. Self Managed Learning College (for 9–17 year olds) has no classrooms, no lessons, no imposed timetable and no imposed curriculum. This is a place where students can learn whatever they want, in any way they want and whenever they want. And it works – as evidenced by the lives of former students and from academic research. Dr Ian Cunningham, its

founder, draws also on his extensive work in using Self Managed Learning in many of the world's largest organisations to show how this new paradigm can be put into practice. The book blends the unequivocal research evidence that we need a New Educational Paradigm with a real live demonstration of what it could look like. It should be essential reading for anyone wanting to see how a new approach to education can be achieved.

An offbeat penguin shows his peers the power of individuality in this humorous tale from the author of Pookins Gets Her Way. Tacky is an odd bird. He likes to do splashy cannonballs and greet his companions with a loud "What's happening?" In fact, he's something of an eccentric, which wouldn't be a problem if all the other penguins weren't such...conformists. When intimidating visitors invade their peaceful, nice, icy land, it'll take a lot more than a bunch of perfect penguins to save the day. Thank goodness Tacky's such an odd bird!

"This book is must reading for any kid—or grown-up—who refuses to follow the pack."—Publishers Weekly

French for Everyone Junior: 5 Words a Day Tundra Books

Do you love the harp? The French harpist Henriette Reni (1875–1956) asked this question of each student, and it remained her ideal throughout her life. This book explores the circumstances which surrounded the beginning of

Henriette Renis career as a masterful harpist and composer. Through her celebrated performances of her Concerto en ut mineur, she gained acclaim simultaneously as a virtuosic performer and composer. In the wake of her success, several new masterpieces by respected composers appeared, including Pierns Concertstck and Ravels Introduction et Allegro. The elements of Renies virtuosity are traced through her famous Lgende, and her less-known Deux promenades matinales. Her compositional style is explored through her Scherzo-Fantaisie for harp and violin and her Concerto en ut mineur. As a teacher, Renis influence echoed throughout the world. Her profound

influence has been evident through the vision of her own students, including Susann McDonald, Marcel Grandjany, Mildred Dilling, Odette Le Dentu, Odette de Montesquiou, Bertile Fournier, Emmy Hrlimann, Bertile Robet Auffray, and Marie Astrid DAuffray. The crystallization of Renis teaching practice is described through her Mthode complte de harpe (Complete Method for Harp) and her twelve volumes of harp transcriptions, Les classiques de la harpe. The amount of literature about Renis life and work is disproportionate to the deep imprint she made upon the harps history and repertoire. This book is a start to further recognizing her vast importance to the establishment of the harp.
