In a multi-faith world, Islam is widely regarded as dogmatic and exclusivist. Yet in the Qur'an we have a great and worthy example of how to live in diversity, of powerful scriptural tenets that lend themselves precisely to engagement with those of other faiths. As such Islam has much to add to the debate on Religious Pluralism. For Muslims the issue is a delicate one. Aside from being tolerant and respectful of other faiths, advocating freedom of faith, and peaceful coexistence for all humanity, Muslims have to intellectually engage on matters of religious truth whilst defending the validity of their own Islamic tenets. This study is focused on the Qur'anic text. It explores the Qur'anic conception of normative religious pluralism with a view to providing answers to questions such as whether the Qur'an itself regards normative religious pluralism as a value system or simply a method through which the Qur'anic world view can be actualized. In doing so the author corrects some highly controversial misquoted, mistranslated, and/or quoted out of context verses of the Qur'an, including the so-called verse of the sword and the perception of not taking non-Muslims as friends. In reality, the Qur'an calls for freedom of faith and peaceful coexistence, but condemns oppression, religious persecution, and those who initiate hostilities. In this way it not only invokes human dignity, but restores it when it is violated.

This volume opens when the caliph al-Mansur has just defeated the rebellion of Muhammad the Pure Soul in 145/762-3 and is now securely established in power. The main concerns of the remaining thirteen years of his reign are the building of his new capital at Baghdad, on which al-Tabari's text contains details not previously published in English, and his efforts to have his nephew 'Isa b. Musa replaced as heir apparent by his own son Muhammad al-Mahdi, a maneuver that required all his political skills. The circumstances of al-Mansur's death in 158/775 are described in vivid detail, and this section is followed by a series of anecdotes, some serious, some humorous, most vivid and lively, that illustrate his character and habits. The last section of the volume describes the reign of al-Mahdi, more pious than his father but also more liberal and open-handed. Along with routine administration, space is devoted to the bizarre intrigues that accompanied the rise and fall of the vizier Ya'qub b. Dawud and the mysterious circumstances of the caliph's own death in 169/785, followed by a short collection of character stories. In addition, the volume also contains important information about warfare on the Byzantine frontier and in Khurasan. A discounted price is available when purchasing the entire 39-volume History of al-Tabari set. Contact SUNY Press for more information.

There are many considerations that influence how a transaction is structured, including tax considerations. The most basic tax issue is whether to structure the transaction as taxable or tax-free. In general, there are four basic structures for a corporate acquisition: (1) a taxable acquisition of a target corporation's stock; (2) a taxable acquisition of a target corporation's assets; (3) a tax-free acquisition of the target corporation's stock; or (4) a

tax-free acquisition of a target corporation's assets.

In order to understand the true message and spirit of the Holy Quran, it is essential to know the language it has been revealed in. The first step is to understand the meaning of individual words. One needs to understand how words were used by the ancient Arabs by the time of Quranic revelation, and not depend on anyone's explanation or understanding as to what they mean today. Along with proper understanding of Arabic grammar, the true meanings of Quranic words, and their use with respect to the context in which they have been revealed in, one student of Quran may get closer to the Truth. The task of creating a Quranic dictionary or encyclopedia that would explain the classical meanings of Quranic words and their use along with significance was undertaken by Allama Ghulam Ahmed Parwez in 1960, where he compiled Lughat-ul-Quran in Urdu language. Now this dictionary has been translated to English by Quranic Education Society in Norway, in order to appeal to a larger audience worldwide and to inspire modern Quranic students.

The History of al-Tabari Vol. 29 Adam Publishers

Providing commentary on three oft-recited chapters of the Holy Qur'an, this excerpt of the monumental discourse by 18th-century mystic and scholar Ahmad ibn 'Ajiba presents both an example of Islamic erudition based on traditional sources as well as insight into his own personal journey of discovery. Each verse is expounded upon with an exoteric explanation as well as related with an esoteric commentary to the mystic path of Islam, Sufism. As one of the few scholarly translations of traditional Qur'anic exegesis, this volume affords the previously unacquainted access not only to how educated Muslims have understood the dominant themes of these three chapters since the earliest days of Islam but also to how traditional Sufic sources have viewed the same themes in respect to the microcosm of the soul and the journey towards God.
