A 261 kW(350hp) spark-ignited, turbo-charged and aftercooled Cummins 'Big Cam' propane engine was developed and tested for class 8 truck application. Two propane engines were operated in line-haul service for a total of 33 months and almost 350,000 kilometres (217,480 miles). A diesel-powered tractor, in similar service, was monitored for comparison. Fuel economy, oil consumption, maintenance, drivers' comments, and engine refinements were fully documented. Propane fuel economy averaged 94 L/100 km (3.0 mpg), relative to 45 L/100 km (6.3 mpg) with the diesel. Overall reliability was good and driver acceptance excellent; however, further refinements, especially in the turbocharger, ignition, and cooling system, are required to compete with the modern diesel. For the covering abstract of the Conference see IRRD Abstract No. 807661.

Sasquatch Books

A must for all ERF fans, this is the third and final installment in The Lorries of Arabia series. While the first book paid tribute to ERF's world-class long-haulers in the Middle East and those who drove them and the second book went on to explore the fortunes

of this legendary machine, this final volume is a continued narration of an unfolding history in the 1970s and 1980s of a premium tractive unit model. With new findings, new details, new insights, and new pictures, readers of the first two books will surely enjoy the final volume of this acclaimed series. Containing a full register of all the 91 NGCs known to have ever been built, this is the enthusiast's guide to the rugged, reliable, left-hand drive tractive unit forever associated with long-haul European and Middle Eastern routes of the 70s and 80s.

Diesel & Gas Turbine Worldwide Catalog Jones & Bartlett Learning
 "Fundamentals of Medium/Heavy Duty Diesel Engines, Second Edition offers comprehensive coverage of every ASE task with clarity and precision in a concise format that ensures student comprehension and encourages critical thinking. This edition describes safe and effective diagnostic, repair, and maintenance procedures for today's medium and heavy vehicle diesel engines"--

Go-West Editions TECHNIP

Actually, I have driven commercial vehicles throughout the United States and Canada for over five million miles. I covered a quarter of a million miles training others how to drive trucks as well. Trucks are the life of this nation, and I am proud of my involvement.
