Elementary-school students need to learn to write explanatory/informational, argument, and narrative text types and respond to literature, both for standardized tests and, more importantly, real-world writing. With a balanced literacy approach, Wolfe provides core instruction, teaching strategies, and mini-lessons on these text types, each of which can be delivered across content areas or as a complete unit of instruction. Mini-lessons

Do You Like These Boots? Macmillan Comic book studies has developed as a solid academic discipline, becoming an increasingly vibrant field in the United States and globally. A growing number of dissertations, monographs, and edited books publish every year on the subject, while world comics represent the fastest-growing sector of publishing. The Oxford Handbook of Comic Book Studies looks at the field systematically, examining the history and evolution of the genre from a global perspective. This includes a discussion of how comic books are built out of shared aesthetic systems

such as literature, painting, drawing, photography, and film. The Handbook brings together readable, jargon-free essays written by established and emerging scholars from diverse geographic, institutional, gender, and national backgrounds. In particular, it explores how the term "global comics" has been defined, as well the major movements and trends that will drive the field in the years to come. Each essay will help readers understand comic books as a storytelling form grown within specific communities, and will also show how these forms exist within what can be considered a world system of comics.

He Was Some Kind of a Man:

Masculinities in the B Western explores the construction and representation of masculinity in low-budget western movies made from the 1930s to the early 1950s. These films contained some of the mid-twentieth-century's most familiar names, especially for youngsters: cowboys such as Roy Rogers, Hopalong Cassidy, and Red Ryder. The first serious study of a body of films that was central to the youth of two generations, *He Was Some Kind of a Man* combines the author's childhood fascination with this genre with an interdisciplinary scholarly exploration of the films influence on modern views of masculinity. McGillis argues that the masculinity offered by these films is less one-dimensional than it is plural, perhaps contrary to expectations. Their

deeply conservative values are edged with transgressive desire, and they construct a male figure who does not fit into binary categories, such as insider/outsider or masculine/feminine. Particularly relevant is the author's discussion of George W. Bush as a cowboy and how his aspirations to cowboy ideals continue to shape American policy. This engagingly written book will appeal to the general reader interested in film, westerns, and contemporary culture as well as to scholars in film studies, gender studies, children's literature, and auto/biography. More than 470 color photos bring in-depth detail to this comprehensive look at the almost forgotten decorative art of leather inlay and overlay. Leather is an often-overlooked textile, with very little documentation on its tools and techniques, and this guide fills a crucial gap for the aspiring leatherworker. These skills have historically been passed along orally, and the book begins with a brief introduction of the cowboy

boot, since this is the discipline that has become a repository for the art of leather inlay and overlay. Learn what these decorative methods can bring to your work with details on the tools and machinery needed, and clear explanations of the techniques. Also covered are the history of leather inlay and overlay, choosing the best leather, how to pattern and create leather art, and basic sewing machine maintenance. The book finishes with an illustrated, step-by-step guide to three leather projects."

Official Gazette of the United States Patent Office Gryphon House, Inc. Considered by many the greatest war novel of all time, All Quiet on the Western Front is Erich Maria Remarque's

masterpiece of the German experience during World War I. I am young, I am twenty years old; yet I know nothing of life but despair, death, fear, and fatuous superficiality cast over an abyss of sorrow. . . . This is the testament of Paul Bäumer, who enlists with his classmates in the German army during World War I. They become soldiers with youthful enthusiasm. But the world of duty, culture, and progress they had been taught breaks in pieces under the first bombardment in the trenches. Through years of vivid horror, Paul holds fast to a single vow: to fight against the principle of hate that meaninglessly pits young men of the same generation but different uniforms against one another . . . if only he can come out of the war alive. “The world has a great writer in

Erich Maria Remarque. He is a craftsman of unquestionably first rank, a man who can bend language to his will. Whether he writes of men or of inanimate nature, his touch is sensitive, firm, and sure.”—The New York Times Book Review

Shine allures and awakens desire. As a phenomenon of perception shiny things and materials fascinate and tantalize. They are a formative element of material

culture, promising luxury, social distinction and the hope of limitless experience and excess. Since the early twentieth century the mass production, dissemination and popularization of synthetic materials that produce heretofore-unknown effects of shine have increased. At the same time, shine is subjectified as “glamor” and made into a token of performative self-empowerment. The volume illuminates genealogical as well as systematic relationships between material phenomena of shine and cultural-philosophical concepts of appearance, illusion, distraction and glare in bringing together renowned scholars from various disciplines.
