Manual of Standardization in the Romance Languages Cengage Learning

Language standardization is an ongoing process based on the notions of linguistic correctness and models. This manual contains thirty-six chapters that deal with the theories of linguistic norms and give a comprehensive up-to-date description and analysis of the standardization processes in the Romance languages. The first section presents the essential approaches to the concept of linguistic norm ranging from

antiquity to the present, and includes individual chapters on the notion of linguistic norms and correctness in classical grammar and rhetoric, in the Prague School, in the linguistic theory of Eugenio Coseriu, in sociolinguistics as well as in pragmatics, cognitive and discourse linguistics. The second section focuses on the application of these notions with respect to the Romance languages. It examines in detail the normative grammar and the normative dictionary as the reference tools for language codification and modernization of those languages that have a long and well-established written tradition, i.e. Romanian, Italian, French, Catalan, Spanish, and Portuguese. Furthermore, the volume offers a discussion of the key issues regarding the standardization of

the 'minor' Romance languages as well as Creoles.

Técnicas de escritura en español y géneros textuales / Developing Writing Skills in Spanish Oxford University Press

This book, first published in 2003, provides a comprehensive and structured vocabulary for all levels of undergraduate Spanish courses. It offers a broad coverage of the concrete and abstract vocabulary relating to the physical, cultural, social, commercial and political environment, as well as exposure to commonly encountered technical vocabulary. The accompanying exercises for private study and classroom use are designed to promote precision and awareness of nuance and register, develop good dictionary use, and encourage effective learning. The

book includes both Iberian and Latin American vocabulary, and clearly identifies differences between the two varieties. • Consists of twenty units each treating a different area of human experience • Units are divided into three levels which allows core vocabulary in each area to be learned first, and more specialised or complex terms to be added at later stages • Vocabulary is presented in alphabetical order for ease of location.
