 Module 3 covers the issues of clinical

assessment, diagnosis, and treatment. We will define assessment and then describe key issues such as reliability, validity, standardization, and specific methods that are used. In terms of clinical diagnosis, we will discuss the two main classification systems used around the world – the DSM-5 and ICD-10. Module 3: Clinical Assessment, Diagnosis, and Treatment ... Many clinical metrics are driven by government regulations. These are things you have to do, so they make a good starting point when you're defining your clinical metrics. You'll want to review evidence-based literature as well to see what the best practices for that area are and whether you're following them.
