Examines the roller coaster rise, fall, and re-emergence of one of North America's more enigmatic exhibition phenomena co-founded in Canada in 1977 by entertainment lawyer-turned-film producer, Garth Drabinsky, together with industry veteran, Nathan A Taylor, Cineplex Corporation had been among the first, to unveil a largely unprecedented concept before the movie-going public -- the cinema megaplex -- opening with a 'modest' 18-screen theatre in downtown Toronto's Eaton Centre shopping mall. The book looks at the birth and progress of the Canadian exhibitor, and at elements of its plush theatre circuit, built primarily upon the determination of 'one man and a multinational'. And with the aid of some previously unpublished photos, examined here, too, is an overview of the corporation's fledgling Gallery circuit, Cineplex Odeon's short-lived UK subsidiary, the dozen locations of which became surrendered initially to Cannon in 1990.

This thorough update to Benjamin Compaine's original 1979 benchmark and 1982 revisit of media ownership tackles the question of media ownership, providing a detailed examination of the current state of the media industry. Retaining the wealth of data of the earlier volumes, Compaine and his co-author Douglas Gomery chronicle the myriad changes in the media industry and the factors contributing to these changes. They also examine how the media industry is being reshaped by technological forces in all segments, as well as by social and cultural reactions to these forces. This third edition of *Who Owns the Media?* has been reorganized and expanded, reflecting the evolution of the media industry structure. Looking beyond conventional wisdom and expectations, Compaine and Gomery examine the characteristics of competition in the media marketplace, present alternative positions on the meanings of concentration, and ultimately urge readers to draw their own conclusions on an issue that is neither black nor white. Appropriate for media practitioners and sociologists, historians, and economists studying mass media, this volume can also be used for advanced courses in broadcasting, journalism, mass communication, telecommunications, and media education. As a new benchmark for the current state of media ownership, it is invaluable to anyone needing to understand who controls the media and thus the information and entertainment messages received by media consumers.

Bestselling and award-winning author Lee Strobel interviews experts about the evidence for the afterlife and offers credible answers to the most provocative questions about what happens when we die, near-death experiences, heaven, and hell. We all want to know what awaits us on the other side of death, but is there any reliable evidence that there is life after death? Investigative author Lee Strobel offers a lively and compelling study into one of the most provocative topics of our day. Through fascinating conversations with respected scholars and experts—a neuroscientist from Cambridge University, a researcher who analyzed a thousand accounts of near-death experiences, and an atheist-turned-Christian-philosopher--Strobel offers compelling reasons for why death is not the end of our existence but a transition to an exciting world to come. Looking at biblical accounts, Strobel unfolds what awaits us after we take our last breath and answers questions like: Is there an afterlife? What is heaven like? How will we spend our time there? And what does it mean to see God face to face? With a balanced approach, Strobel examines the alternative of Hell and the logic of damnation, and gives a careful look at reincarnation, universalism, the exclusivity claims of Christ, and other issues related to the topic of life after death. With vulnerability, Strobel shares the experience of how he nearly died years ago and how the reality of death can shape our lives and

faith. Follow Strobel on this journey of discovery of the entirely credible, believable, and exhilarating life to come.

Be energized, but not overwhelmed What's the most pressure you've ever been under? How did you react? What helped? What didn't? Over the past five years, Dane Jensen has asked these questions of thousands of high performers—from Olympic gold medalists to Navy SEALs, politicians, executives and busy parents. If we can recognize the patterns, we can improve our ability to sidestep the biological traps that can sabotage us—and use the energy that accompanies pressure to thrive. The Power of Pressure combines the insights gathered from Jensen's work with the latest research in biology and neuroscience to help you understand and use the "pressure equation" of importance, uncertainty and volume escape the traps of pressure with effective tools and tactics be ambidextrous so that you can handle pressure both in peak pressure moments and over the long haul reduce tension, sleep better and have more energy so that you can meet challenges head-on recognize pressure moments so that you can prepare for when you will likely feel the heat leverage strategies so that you can give everything you've got when it's most important And more! This college-level media management textbook reflects the changes in the media industries that have occurred in the past decade. Today's managers must address new issues that their predecessors never faced, from the threats of professional piracy and casual copying of digital media products, to global networks, on-demand consumption, and changing business models. The book explains the new new vocabulary of media moguls, such as bandwidth, digital rights management, customer relations management, distributed work groups, centralized broadcast operations, automated playlists, server-based playout, repurposing, mobisodes, TV-to-DVD, and content management. The chapters logically unfold the ways that managers are evolving their practices to make content, market it, and deliver it to consumers in a competitive, global digital marketplace. In addition to media companies, this book covers management processes that extend to all content-producing organizations, because today's students are as likely to produce high-quality video and Web video for ABC Computer Sales as they are for the ABC Entertainment Television Network.

How did neighborhood groceries, parish halls, factories, and even saloons contribute more to urban vitality than did the fiscal might of postwar urban renewal? With a novelist's eye for telling detail, Douglas Rae depicts the features that contributed most to city life in the early "urbanist" decades of the twentieth century. Rae's subject is New Haven, Connecticut, but the lessons he draws apply to many American cities. City: Urbanism and Its End begins with a richly textured portrait of New Haven in the early twentieth century, a period of centralized manufacturing, civic vitality, and mixed-use neighborhoods. As social and economic conditions changed, the city confronted its end of urbanism first during the Depression, and then very aggressively during the mayoral reign of Richard C. Lee (1954–70), when New Haven led the nation in urban renewal spending. But government spending has repeatedly failed to restore urban vitality. Rae argues that strategies for the urban future should focus on nurturing the unplanned civic engagements that make mixed-use city life so appealing and so civilized. Cities need not reach their old peaks of population, or look like thriving suburbs, to be once again splendid places for human beings to live and work.

The triple crown of Oscars awarded to Denzel Washington, Halle Berry, and Sidney Poitier on a single

evening in 2002 seemed to mark a turning point for African Americans in cinema. Certainly it was hyped as such by the media, eager to overlook the nuances of this sudden embrace. In this new study, author David Leonard uses this event as a jumping-off point from which to discuss the current state of African-American cinema and the various genres that currently compose it. Looking at such recent films as Love and Basketball, Antwone Fisher, Training Day, and the two Barbershop films—all of which were directed by black artists, and most of which starred and were written by blacks as well—Leonard examines the issues of representation and opportunity in contemporary cinema. In many cases, these films—which walk a line between confronting racial stereotypes and trafficking in them—made a great deal of money while hardly playing to white audiences at all. By examining the ways in which they address the American Dream, racial progress, racial difference, blackness, whiteness, class, capitalism and a host of other issues, Leonard shows that while certainly there are differences between the grotesque images of years past and those that define today's era, the consistency of images across genre and time reflects the lasting power of racism, as well as the black community's response to it.

From Giller Prize-winning author Michael Redhill comes a literary thriller about a woman who fears for her sanity—and then her life—when she learns that her doppelganger has appeared in a local park. Jean Mason has a doppelganger. She's never seen her, but others swear they have.

Apparently, her identical twin hangs out in Kensington Market, where she sometimes buys churros and drags an empty shopping cart down the streets, like she's looking for something to put in it. Jean's a grown woman with a husband and two kids, as well as a thriving bookstore in downtown Toronto, and she doesn't rattle easily—not like she used to. But after two customers insist they've seen her double, Jean decides to investigate. She begins at the crossroads of Kensington Market: a city park called Bellevue Square. Although she sees no one who looks like her, it only takes a few visits to the park for her to become obsessed with the possibility of encountering her twin in the flesh. With the aid of a small army of locals who hang around in the park, she expands her surveillance, making it known she'll pay for information or sightings. A peculiar collection of drug addicts, scam artists, philanthropists, philosophers and vagrants—the regulars of Bellevue Square—are eager to contribute to Jean's investigation. But when some of them start disappearing, she fears her alleged double has a sinister agenda. Unless Jean stops her, she and everyone she cares about will face a fate much stranger than death.

The global film industry has witnessed significant transformations in the past few years. Regions outside the USA have begun to prosper while non-traditional production companies such as Netflix have assumed a larger market share and online movies adapted from literature have continued to gain in popularity. How have these trends shaped the global film industry? This book answers this question by analyzing an increasingly globalized business through a global lens. Development of the Global Film Industry examines the recent history and current state of the business in all parts of the world. While many existing studies focus on the internal workings of the industry, such as production, distribution and screening, this study takes a "big picture" view, encompassing the transnational integration of the cultural and entertainment industry as a whole, and pays more attention to the coordinated development of the film industry in the light of influence from literature, television, animation, games and other sectors. This volume is a critical reference for students, scholars and the public to help them understand the major trends facing the global film industry in today's world.

From the first entrepreneurs who attempted to lure customers in to movie exhibition halls, to the digital revolution and its impact on moviegoing, Reel Time highlights the pivotal role of amusement venues in shaping the leisure activities of working- and middle-class people across North America.

Profit Brand presents a results-driven view of branding that any CEO or CFO would applaud. While branding strategies often concern themselves with "awareness," "visibility," "impact," and "image," author Nick Wreden shifts the focus to the bottom line. He offers a comprehensive metrics-based approach to branding that allows companies to link branding activities directly with profits. Wreden looks at the inefficiencies of traditional branding strategies that stress customer acquisition over customer retention. Customer loyalty, he argues, is the key to delivering profitability. With this in mind, he explores loyalty schemes, the need to own the customer experience, and the means of leveraging allies as brand ambassadors. He covers topics such as segmentation, optimization, pricing, and communication strategies and explores accountability systems such as six sigma, CRM, and scorecards. Citing examples from global brands such as IBM, Disney, Amex and KLM, the book highlights marketing practices both good and bad.
