BOOKS HUB
Giving
students the
capacity to
include
ethnography
in their own
experience!
Asking and
Listening is
the first book

to trace the
changing
ways in which
human beings
have learned
to look at the
Others
Beyond the
Gate with
their strange
languages and
stranger
customs. Not
a history of
ethnography
so much as a
chronicle of its
uses and
potentials,
Asking and
Listening
examines the
premises of
ethnography
and concerns
itself with a
wide range of
issues such as

ethnocentrism and the morass of cultural relativism, the cultures of corporations, and the meaning of ethnography for government policy. It ends with an examination of the problems in charting our tomorrows: ethnography in the information age, and for the future. Through its pragmatic analysis of cultures as storehouses of alternatives in the way universal

problems can and have been approached, Asking and Listening offers students not merely the opportunity to make sense of descriptions of other peoples lifeways, but makes such ethnographic knowledge immediately useful in their own lives, choices, and career plans.

A Novel

Penguin
One hundred years ago, four crewmembers of the "U.S.S Enterprise™ crossed the dimensional

barrier and found a mirror image of their own universe, populated by nightmare duplicates of their shipmates. Barely able to escape with their lives, they returned, thankful that the accident which had brought them there could not be duplicated, or so they thought. But now the scientists of that empire have found a doorway into our universe. Their plan is to destroy from within, to replace a

From the #1
New York
Times-

author of The
48 Laws of
Power comes
the definitive
new book on
decoding the
behavior of
the people
around you
Robert Greene
is a master
guide for
millions of
readers,
distilling
ancient
wisdom and
philosophy
into essential
texts for
seekers of
power,
understanding
and mastery.
Now he turns
to the most
important
subject of all -
understanding
people's
drives and
motivations,

even when they are unconscious of themselves. We are social animals. Our very lives depend on our relationships with people. Knowing why people do what they do is the most important tool we can possess, without which our other talents can only take us so far. Drawing from the ideas and examples of Pericles, Queen Elizabeth I, Martin Luther King Jr, and many others,

Greene teaches us how to detach ourselves from our own emotions and master self-control, how to develop the empathy that leads to insight, how to look behind people's masks, and how to resist conformity to develop your singular sense of purpose. Whether at work, in relationships, or in shaping the world around you, *The Laws of Human Nature* offers brilliant tactics for success, self-improvement,

and self-defense.

A History of the Oceans

Cram101
 Much of human experience can be distilled to saltwater: tears, sweat, and an enduring connection to the sea. In *Vast Expanses*, Helen M. Rozwadowski weaves a cultural, environmental, and geopolitical history of that relationship, a journey of tides and titanic forces reaching around the

globe and
across
geological and
evolutionary
time. Our
ancient
connections
with the sea
have
developed and
multiplied
through
industrialization and
globalization,
a trajectory
that runs
counter to
Western
depictions of
the ocean as a
place remote
from and
immune to
human
influence.
Rozwadowski
argues that
knowledge
about the
oceans—created through

work and play,
scientific
investigation,
and also
through
human
ambitions for
profiting from
the sea—has
played a
central role in
defining our
relationship
with this vast,
trackless, and
opaque place.
It has helped
us to exploit
marine
resources,
control ocean
space, extend
imperial or
national
power, and
attempt to
refashion the
sea into a
more tractable
arena for
human
activity. But

while
deepening
knowledge of
the ocean has
animated and
strengthened
connections
between
people and
the world's
seas, to
understand
this history we
must address
questions of
how, by
whom, and
why
knowledge of
the ocean was
created and
used—and
how we create
and use this
knowledge
today. Only
then can we
can forge a
healthier
relationship
with our
future sea.
