Joining the ranks of *The Life-Changing Magic of Not Giving a F*ck*, *The Subtle Art of Not Giving a F*ck*, *You Are a Badass**, and *F*ck Feelings* comes this refreshing, BS-free, self-empowerment guide that offers an honest, no-nonsense, tough-love approach to help you move past self-imposed limitations. Are you tired of feeling fu*ked up? If you are, Gary John Bishop has the answer. In this straightforward handbook, he gives you the tools and advice you need to demolish the slag weighing you down and become the truly unfu*ked version of yourself. "Wake up to the miracle you are," he directs. "Here's what you've forgotten: You're a fu*king miracle of being." It isn't other people that are standing in your way, it isn't even your circumstances that are blocking your ability to thrive, it's yourself and the negative self-talk you keep telling yourself. In *Unfu*k Yourself*, Bishop leads you through a series of seven assertions: I am willing. I am wired to win. I got this. I embrace the uncertainty. I am not my thoughts; I am what I do. I am relentless. I expect nothing and accept everything. Lead the life you were meant to have—*Unfu*k Yourself*.

Detailed characterization of fuzzy interactions will be of central importance for understanding the diverse biological functions of intrinsically disordered proteins in complex eukaryotic signaling networks. In this volume, Peter Tompa and Monika Fuxreiter have assembled a series of papers that address the issue of fuzziness in molecular interactions. These papers provide a broad overview of the phenomenon of fuzziness and provide compelling examples of the central role played by fuzzy interactions in regulation of cellular signaling processes and in viral infectivity. These contributions summarize the current state of knowledge in this new field and will undoubtedly stimulate future research that will further advance our understanding of fuzziness and its role in biomolecular interactions.

The Valley of the Queens Project is a collaboration of the Supreme Council of Antiquities and the Getty Conservation Institute from 2006-2011. The project involved comprehensive research, planning and assessment culminating in the development of detailed plans for conservation and management of the site.

Volume 2 of the report is the condition summary of the 111 tombs from the 18th, 19th, and 20th Dynasties in the Valley of the Queens. This includes a summary of tomb architectural development, the geological and hydrological context, wall painting technique and condition assessment of the paintings and structural stability of the tombs.

This volume details current and new computational methodologies to study peptides. Chapters guide readers through antimicrobial peptides, foldability, amyloid sheet formation, membrane-active peptides, organized peptide assemblies, protein-peptide interfaces, prediction of peptide-MHC complexes, advanced free energy simulations for peptide binding, and methods for high throughput peptide or miniprotein design. Written in the format of the highly successful *Methods in Molecular Biology* series, each chapter includes an introduction to the topic, lists necessary materials, software, and reagents, includes tips on troubleshooting and known pitfalls, and step-by-step, readily reproducible protocols. Authoritative and cutting-edge, *Computational Peptides Science: Methods and Protocols* aims to provide concepts, methods, and guidelines to help both novices and experienced workers benefit from today's new opportunities and challenges.

For the Yearbook of International Organizations, the most up-to-date and comprehensive reference to international organizations, the UIA has selected the most important 31,086 organizations from its extensive database of current and previous organizations. Yearbook provides profiles of 5,546 intergovernmental and 25,540 international non-governmental organizations active in nearly 300 countries and territories in the world today. Organization descriptions listed in Volume 1 are numbered sequentially to facilitate quick and easy cross-referencing from the other Yearbook Volumes. Users can refer to Volumes 2 and 3 to locate organizations by region or subject respectively, and comprehensive indexes are included. Naturally, the high standards of accuracy, consistency and detail set by previous editions of the Yearbook of International Organizations have been maintained for this edition.

Our politics is intimately linked to the environmental conditions - and crises - of our time. The challenges of sustainability and the discovery of ecological limits to growth are transforming how we understand the core concepts at the heart of political theory. In this essential new textbook, leading political theorist Steve Vanderheiden examines how the concept of sustainability challenges - and is challenged - by eight key social and political ideas, ranging from freedom and equality to democracy and sovereignty. He shows that environmental change will disrupt some of our most cherished ideals, requiring new indicators of progress, new forms of community, and new conceptions of agency and responsibility. He draws on canonical texts, contemporary approaches to environmental political theory, and vivid examples to illustrate how changes in our conceptualization of our social aspirations can inhibit or enable a transition to a just and sustainable society. Vanderheiden masterfully balances crystal clear explanation of the essentials with cutting-edge analysis to produce a book that will be core reading for students of environmental and green political theory everywhere.

This applications-oriented book describes the construction of an injection mould from the ground up. Included are explanations of the individual types of tools, components, and technical terms; design procedures; techniques, tips, and tricks in the construction of an injection mould; and pros and cons of various solutions. Based on a plastic part ("bowl with lid") specially developed for this book, easily understandable text and many illustrative pictures and drawings provide the necessary knowledge for practical implementation. Step by step, the plastic part is modified and enhanced. The technologies and designs that are additionally needed for an injection mould are described by engineering drawings. Maintenance and repair, and essential manufacturing techniques are also discussed. Now in full color, this second edition builds on the success of the first, with updates and small corrections throughout, as well as a new expanded section covering the process chain.

The most comprehensive resource on slurries and slurry systems, covering everything from fluid mechanics to soil classification, pump design to selection criteria Slurries are mixtures of liquids and solid particles of all types. For instance, liquid is used as a way of transporting what you get out of the mine, which might be better than shoveling it into freight cars and carrying it out by train. Slurry systems are fundamental to dredging, many mineral processes, bridge and tunnel construction, and to the manufacturer of synthetic petroleum products from oil sands.

The Economic Geology of Iran is a complete and comprehensive book about mineral deposits, energy and water resources of Iran. Dr. Mansour Ghorbani has travelled to each of the huge variety of locations that feature the resources covered, personally verifying the details of them all. The book starts by describing the geography and physiography of Iran as well as its various climatic regions and the diverse corresponding vegetation. Then the book gives an excellent overview of the geology of the country, followed by the history of mining in Iran up to now. The author

describes also the metallogenic and mineralization phases of Iran, its mineral zones and belts, and, more generally, the distribution of mineral deposits in the country. Dr. Ghorbani gives us also an analysis of the position of Iran in terms of global mineral resources, as well as the role that the country's mineral, energy and natural resources play in its overall economy. The book finishes with also provides a complete list of Iranian mineral deposits. This book is a perfect source of information for all students and researchers in the field of geo-science at the university level but also for mining and oil companies that would like to work, invest and get involved in such businesses in Iran. *Basic, Intermediate and Advanced Grammar and Composition In English-Norwegian* Springer Science & Business Media

"This comprehensive history of nineteenth century Kandahar, Afghanistan's second largest city, uses not only traditional historical sources, but unpublished diaries, archived military reports, contemporary photographs, drawings, paintings, and maps of the city drawn by British soldiers, other European visitors, and Asian sources. In addition to its detailed expansion on familiar political history, he addresses the social structure, tribal and ethnic composition, religious institutions, and economic activity during this century. Central to his work is an often street-by-street description of the geographical layout of Kandahar, its

key features, and how they changed over time. Both for historians and those seeking the context of contemporary issues in Central Asia, Trousdale's work is an essential read"--

"Eleven historians bring their knowledge and insights to bear on the long Braudelian sweep of Southeast Asian history. In doing so they seek both to debunk simplistic assumptions about fragile traditions and transformational modernities, and to identify real repeating patterns in Southeast Asia's past: clientelistic political structures, periodic tectonic and climatic disasters, ethnic occupational specializations, long cycles of economic globalization and deglobalization. Their contributions range across many centuries: from the Austronesian expansion to the Aceh tsunami, and from the Sanskrit cosmopolis to the Asian financial crisis. The book is inspired by, and dedicated to, Peter Boomgaard, a scholar whose work has embodied the Braudelian spirit in Southeast Asian historiography"--
