Analytic Geometry Rev Edition - reliefwatch.com 2 REVIEW OF ANALYTIC GEOMETRY (b) The set of all points with x -coordinate 1 is a horizontal line one unit above the x -axis [see Figure 3(b)]. (c) Recall from Review of Algebra that the given region consists of those points in the plane

whose y -coordinates lie between $y = 1$ and $y = 2$. Thus, the region consists of all points that lie between (but not on) the horizontal line $y = 1$ and the horizontal line $y = 2$.
