Have fun while you expand your powers of deductive reasoning! Every one of these puzzles calls for conclusions based only on the information provided; the answers don't depend on previous knowledge, memory, wordplay, or deception--just a logical mind. Accept the alternatives that lead to the correct response and discard all faulty assumptions until you've arrived at the only possibility that makes sense. There are eight kinds of puzzle, and in most cases diagrams help organize your results. Here's one example: A supermarket theft has occurred. Someone took a fully loaded cart without paying for the groceries. One of the three suspects is guilty--but which one? The guilty party's statement is true; the other two are false. Who is guilty? A. B took the cart loaded with groceries B. A's statement is true C. A's statement is false Answer: C is the guilty party.

Become a better problem solver, and find solutions in situations that confuse most people. Try all six kinds: Hypotheses, Who Did It? Puzzles, Letters for Digits, Standards of Veracity, Arrangement in Order, Fragments of Information. There are tips on how to find the answers, and when all else fails, the answers themselves, worked out in detail.

Mensa Exercise Your Mind Math & Logic Puzzles Sterling Publishing Company, Inc.

Your brain will go into a tizzy solving these twisted, perplexing logic puzzles! But untangling them will challenge your mind, expand your knowledge, and develop your powers of deduction and reasoning. Success begins with a process of trial and error: examine the propositions, and logically test one against the other. Some will cancel each other out. Others point to additional information that helps you arrive at the correct answer. Give the six sections a shot: each one contains a different type of puzzle, starts with the simplest, and becomes increasingly intricate. Here's just a sample of what you'll find! By looking at the five statements, figure out in which subject Prince Tal excelled, and in which he did especially well: 1. If he excelled in chivalry, he did especially well in horsemanship. 2. If he excelled in horsemanship, he did especially well in fencing. 3. If he did especially well in horsemanship, he excelled in fencing. 4. If he excelled in fencing, he did especially well in chivalry. 5. If he did especially well in chivalry, he excelled in horsemanship. The answer is number two. Can you figure out why? 96 pages, 5 3/8 x 8 1/4.

*Fantastic Book of Logic Puzzles* Sterling

Travelers cooped up in their seats can at least think out of the box! That's what logic puzzles demand: at first read, these tough little problems seem to provide barely enough information to find the answer. But look again, use your deductive reasoning to eliminate false possibilities, and you'll reach a solution. Figure out where each of the three provinces in the kingdom of Farflungus is located—and which of three princes rules it. Join Jasmyn for a planetary shopping spree—and try to discover the order in which she visited four planets, and what she bought. The time will fly by!

Mystifying Logic Puzzles Sterling Publishing Company, Inc.

In his new book, Raymond Smullyan, grand vizier of the logic puzzle, joins Scheherazade, a charming young woman of “fantastic logical ingenuity,” to give us 1001 hours of brain-teasing fun. Scheherazade, we find, has gotten back into hot water with the king, and is once more in danger of losing her head at dawn. But, thinking quickly, she tempts the king to stay her execution by posing him the most delightfully devious mathematical and logic puzzle ever invented. They keep him guessing for many more nights until the fatal hour has passed, and she keeps her head. The Riddle of Scheherazade includes several wonderful old chestnuts and many fiendishly original puzzles, 225 in all. There are logic tricks and number games, metapuzzles (puzzles about puzzles), liar/truth-teller exercises, Gödelian brain twisters, baffling paradoxes, and an excursion, under Scheherazade's expert guidance, into an amusing new field invented by Smullyan, called “coercive” logic, in which the answer to a problem can actually change the fate of the puzzler!

An absolute must for all puzzle fans—from the middle-school whiz to the sophisticated mathematician or computer scientist.
