The process of coordinating work activities with and through other individuals to ensure that work activities are completed effectively and efficiently is what managers "do." The management of an enterprise's activities is referred to as "management." In layman's terms,

Language Management is a group of employees in an organization who have authority over others. An illustration of both good management and bad management The act of getting things done in an effective and efficient manner through and with other people is referred to as management. Being both effective and efficient is essential for management. Efficiency and effectiveness are two different aspects of the same thing. However, these two aspects need to be balanced, and management sometimes has to choose between efficiency and

compromise. For instance, it is simpler to be efficient and disregard efficiency—that is, to finish the task at hand but at a high cost.
