Delineate the politicians, business people, artists, immigrant laborers, and city dwellers who are the key players in the tale. In tracing the park's history, the writers also give us the history of New York. They explain how squabbles over politics, taxes, and real estate development shaped the park and describe the acrimonious debates over what a public park should look like, what facilities it should offer, and how it should accommodate the often incompatible.

Fluorescence and Phosphorescence Spectroscopy:

Physicochemical Principles and Practice deals with the physicochemical principles and applications of fluorescence and phosphorescence spectroscopy in experimental biology and chemistry. Topics covered include the absorption of light by molecules; instrumentation for the measurement of fluorescence and phosphorescence; solvent and acidity effects on electronic

spectra; and polarization of fluorescence and phosphorescence. Comprised of four chapters, this book begins with a discussion on photophysical processes in isolated molecules and molecules in solution, paying particular attention to thermal equilibration of electronically excited molecules, phototautomerism, and coordination by metal ions. The next chapter describes the instrumentation for measuring fluorescence and phosphorescence, which consists essentially of a light source to electronically excite the sample; a monochromator to separate the light of desired energy from the source; a sample compartment; a second monochromator to isolate the sample's fluorescence energy from the excitation energy; a photodetector to translate the fluorescent light into an electrical signal; and a readout system such as a galvanometer or a recorder, coupled with an amplifier to determine the intensity of fluorescent light that is emitted. The final chapter is devoted to various applications of fluorescence and phosphorescence spectroscopy, including the analysis of organic and inorganic compounds. This monograph is written primarily for analytical chemists and biological scientists.

Globalization has created an interconnected world, but has not diminished violence and militarism. The Economics of Killing describes how the power of global elites, entrenched under globalization, has created a deadly cycle of violence. In this groundbreaking work, Vijay Mehta shows how attempts at peaceful national development are routinely blocked by Western powers. He centers the 2008 financial crisis in US attempts to block China's model of development. He shows how Europe and the US conspire with regional dictators to prevent countries from developing advanced industries, and how this system has fed terrorism. Mehta argues that a different world is possible, based

on policies of disarmament, demilitarization, and sustainable development. This original and thought-provoking book will be of great interest to anyone concerned about the consequences of endless war fueled by the West.

If you've never experienced this unique, cute sci-fi romance about what it means to be human, now's your chance! One of the biggest hits from CLAMP, creators of *xxxHOLiC* and *Magic Knight Rayearth*, returns in a definitive, hardcover premium collector's edition, featuring a large size, premium paper, color pages, and more. After moving from the countryside into the big city, poor college student Hideki Motosuwa finds himself down on his luck. All he wants is a good job, a girlfriend, and his very own "persocom" - the latest and greatest in humanoid computer technology. Hideki's luck changes one night when he finds Chi - an adorable, but seemingly broken, persocom thrown out in a pile of trash. After taking her home, Hideki discovers that Chi is more responsibility than he expected - and that there's much more to his cute new persocom than meets the eye.

An introductory text that gives its reader a strong understanding of the dimensions of tourism, the industries of which it is comprised, the issues that affect its success, and the management of its impact on destination economies, environments and communities. Now in a full colour design, the new edition features a clear focus on the issues affecting 21st century tourism, providing students with extensive coverage on the effects of globalisation and global conflict; sustainability and climate change; developments in digital technology and the rise

of the sharing economy. International case-studies and snapshots (mini-case studies) are used throughout and have been taken from around the globe, including the US, China, Russia, Gambia, Bhutan, Cuba, Singapore, New Zealand, Australia, Caribbean, Canada and the UK, and from companies including TUI, Airbnb and Marriot. The accompanying Online Resources include PowerPoint slides and an Instructor's Manual for lecturers and additional case studies, useful video links, and web links for students. Suitable for students new to tourism studies.

Women, Writing, and the Industrial Revolution The Economics of KillingHow the West Fuels War and Poverty in the Developing World

From 1815 to 1865, as city blocks encroached on farmland to accommodate Manhattan's exploding population, prosperous New Yorkers developed new ideas about what an urban environment should contain—ideas that poorer immigrants resisted. As Catherine McNeur shows, taming Manhattan came at the cost of amplifying environmental and economic disparities.

This is a tender, poetic novel about Maddie, a 41 year-old artist on the brink of success. As her work becomes more and more engrossing, she is drawn to a family mystery symbolized by two packing cases of broken glass.

Deep Blue Silence SAGE

Industrialization in the eighteenth and nineteenth centuries inspired deep fears and divisions throughout England. The era's emergent factory system disrupted traditional patterns and familiar ways of life. Male laborers feared the loss of meaningful work and status within their communities and families.

Condemning these transformations, Britain's male writers looked longingly to an idealized past. Its women writers, however, were not so pessimistic about the future. As Susan Zlotnick argues in *Women, Writing, and the Industrial Revolution*, women writers foresaw in the industrial revolution the prospect of real improvements. Zlotnick also examines the poetry and fiction produced by working-class men and women. She includes texts written by the Chartists, the largest laboring-class movement in the early nineteenth century, as well as those of the dialect tradition, the popular, commercial literature of the industrial working class after mid-century.

An Introduction JHU Press

Despite heightened partisanship in the U.S. Congress and constituencies split along ideological lines, congressional representatives frequently buck their parties and seldom do precisely what voters ask. In *Personal Roots of Representation*, Barry Burden challenges standard explanations of legislative preferences to emphasize the important role that personal influences play in representatives' voting behavior. This timely book is the first to examine the extent to which the very same values, experiences, and interests that shape congressional members as individuals and guide their own life choices similarly shape their policymaking decisions. Burden takes a close look at legislative decision making in the areas of tobacco regulation, vouchers and school choice, and religion and bioethics. He finds that personal factors become more significant when legislators are acting proactively rather than reactively, grappling with specific policy issues, and defending rather than challenging the status quo. Marshaling both qualitative and quantitative evidence, Burden reveals that the personal roots of representatives' actions can be as influential as the usual suspects of partisanship and constituency--and that personal factors quite often have the greatest impact when the policymaking stakes are at their highest. *Personal Roots of Representation* is a provocative book that raises pressing new questions about legislative discretion and the accountability of our elected officials.

At the moment when Mabel wins Waddles the pig at the Mystery Fair, Dipper ruins his chance to impress Wendy. But when Dipper finds a way to travel back in time and changes his fate with Wendy, Mabel's fate also changes—for the worse. Will Dipper and Mabel tweak time so they both leave the fair a winner? Will Mabel ever share a slice of pizza with her beloved Waddles again? Then, when a prehistoric creature snatches up Waddles, it's up to the Gravity Falls gang to save him! Readers will love this chapter book filled with black-and-white art from the show.

O to be a Dragon Princeton University Press

One day, gravity on Earth suddenly became a fraction of what it is now. Twenty years later, humanity has adapted to its new low-gravity reality. And to Willa Fowler, who was born just after G-day, it's pretty awesome. You can fly through the air! I mean, sure, you can also die if you jump too high. So you just don't jump too high. And maybe don't get mixed up in your dad's secret plan to bring gravity back that could get you killed! From writer JOE HENDERSON (showrunner of Fox's *Lucifer*) and artist LEE GARBETT (*Lucifer*, *Loki: Agent of Asgard*) comes the story of a young woman's journey to find her place in a world turned upside down.
