*Meeting Regional Stemm Workforce Needs in the Wake of Covid-19* CreateSpace Army Doctrine Publication (ADP) 6-0 presents the Army's guidance on command, control, and the mission command warfighting function. This publication concisely describes how commanders,

supported by their staffs, combine the art of command and the science of control to understand situations, make decisions, direct action, and accomplish missions. The principal audience for ADP 6-0 is all professionals within the Army.

Commanders and staffs of Army headquarters serving as joint task force or multinational headquarters should also refer to applicable joint or multinational

doctrine on command and control of joint or multinational forces. Trainers and educators throughout the Army will also use this publication.

Commanders, staffs, and subordinates ensure their decisions and actions comply with applicable U.S., international, and, in some cases, host-nation laws and regulations.

Commanders at all levels ensure their Soldiers operate in accordance with the law of war and the rules of engagement. ADP 6-0 applies to the Active Army, Army National Guard/Army National Guard of the United States, and United States Army Reserve unless otherwise stated.

*Mission Command (ADP 6-0)* Penguin

"After five years of groundbreaking research, Ori Brafman and Rod A. Beckstrom share some gripping stories. The Starfish and the Spider argues that organizations fall into two categories: traditional "spiders," which have a rigid hierarchy and top-down leadership, and revolutionary "starfish," which rely on the power of peer relationships. This book explores what happens when starfish take on spiders (such as the music industry vs. Napster, Kazaa, and the P2P services that followed). It reveals how established companies and institutions, from IBM to Intuit to the U.S. government, are also learning how to incorporate starfish principles to achieve

success."--BOOK  
JACKET.

Understanding SAP ERP  
Integration

The COVID-19 pandemic is transforming the global economy and significantly shifting workforce demand, requiring quick, adaptive responses. The pandemic has revealed the vulnerabilities of many organizations and regional economies, and it has accelerated trends that could lead to significant improvements in productivity, performance, and resilience, which will enable organizations and regions to thrive in the next normal. To explore how communities around the United States are addressing workforce issues laid bare by the

COVID-19 pandemic and how they are taking advantage of local opportunities to expand their science, technology, engineering, mathematics, and medicine (STEMM) workforces to position them for success going forward, the Board of Higher Education and Workforce of the National Academies of Sciences, Engineering, and Medicine convened a series of workshops to identify immediate and near-term regional STEMM workforce needs in the wake of the COVID-19 pandemic. The workshop planning committee identified five U.S. cities and their associated metropolitan areas - Birmingham, Alabama; Boston, Massachusetts; Richmond, Virginia;

Riverside, California; and Wichita, Kansas - to host workshops highlighting promising practices that communities can use to respond urgently and appropriately to their STEMM workforce needs. A sixth workshop discussed how the lessons learned during the five region-focused workshops could be applied in other communities to meet STEMM workforce needs. This proceedings of a virtual

workshop series summarizes the presentations and discussions from the six public workshops that made up the virtual workshop series and highlights the key points raised during the presentations, moderated panel discussions and deliberations, and open discussions among the workshop participants.
