CABRERA FARMER

Agnes Chinese University Press
"I'd grown up in the land of
TRANSYLVANIA, homeland to Dracula,
Vlad the Impaler, and, worse, the
Communist dictator, Nicolae Ceausescu--
who turned Romania into a land of gray-
clad zombies who never dared to show
their individuality, and where neighbors
became informants, and the Securitate
made people disappear," writes the

author. "Daylight empowered the regime
to encircle us like starved wolves, and so
night had always been the time to steal
a bit of freedom. As if bred into our
Transylvanian blood, we were like
vampires who came to life after
sundown. I buried the family jewels and
left my outpost to join the action . . .
tonight Ceausescu would die!" Known for
using stand-ins to pose for him, Aura
doubts if it was even Ceausescu himself
who was killed that night. Nevertheless,
when her countrymen topple one of the
most draconian regimes in the Soviet

bloc, Aura Imbarus tells herself that life post-revolution will be different. But little in the country changes. With two pieces of luggage and a powerful dream, Aura and her new husband flee to America. Through sacrifice and hard work, the couple acquire the "American Dream"-- but discover that straddling two cultures is much more complicated than they expect.

Börsenblatt für den deutschen Buchhandel VCH Publishers

As new hypotheses to explain biological processes are formulated and new techniques are perfected, the ubiquitous presence of ciliates and their ease of cultivation have won new converts from genetics, cell biology, ecology, molecular biology, and other specialists who are searching for a convenient organism to

test their hypotheses and techniques. For these scientists as well as general biologists, graduate students beginning their careers, and those protozoologists already charmed by ciliates, this compilation of the current state of knowledge of ciliates will be exciting reading. Modern ultrastructural and molecular techniques offer insights on cytology, metabolism, and genetics of ciliates that have stimulated new conclusions about ontogenesis, sexuality, ecology, and systematics. Philosophy and Technology Stephen F. Austin University Press
Schreiben ist ein zentrales Medium wissenschaftlicher Kommunikation. Die Fähigkeit, wissenschaftliche Texte zu verfassen, ist eine Kompetenz, die den Erfolg in Wissenschaft und Studium

wesentlich mitbestimmt. Diese Fähigkeit bedarf systematischer Vermittlung - eine Aufgabe für Schule und Universität. Neueste Entwicklungen in der Linguistik erarbeiten Grundlagen für eine solche Schreibdidaktik. Der Band bietet einen repräsentativen Überblick über die aktuelle Diskussion und den derzeitigen Kenntnisstand.

German books in print Knopf

This book analyzes the changing portrayal of GDR literature in German Gymnasium textbooks 1985-2015. Addressing the need for textbook research to broaden its focus from GDR history to GDR literature, the author presents case studies of well-known GDR authors (Bertolt Brecht, Johannes R. Becher, Anna Seghers, Wolf Biermann, and Christa Wolf), each examining a

particular aspect of the societal discourse about GDR literature and the tension between (literary) text and (historical) context. Taken together, the case studies reveal the frequently underestimated power of ideology in literature textbooks. They also show how attempts to package these authors into simplified categories ultimately reveal the profound complexities of the GDR literary legacy. By examining the clear tension between literature and politics in textbooks and curricula, the author demonstrates how ideological messages are transmitted in all textbooks, as well as the importance of attending to overt and covert ideology.

Historia de la vida y de las aventuras verdaderas del hombre pobre de Toggenburgo Walter de Gruyter

Este libro recoge en esencia la vida del escritor suizo Ulrich Bräker, nacido en 1735 en una familia campesina muy pobre, criado en medio de grandes necesidades, que fue soldado mercenario, escapó de la guerra, volvió a casa, se casó, se dedicó al negocio del hilo, tuvo hijos... y poco más. Una vida como la de muchos de sus paisanos y vecinos, nada especial, y sin embargo esta autobiografía novelada, o novela autobiográfica, ha recibido los elogios de autores como Hofmannsthal o Walter Benjamin. Hay en la obra de Bräker un carácter tan atormentado y temeroso de Dios como firme en su individualidad, un carácter marcado por la introspección reflexiva y una curiosidad y admiración por el mundo que trata de ver en lo anecdótico tanto las leyes naturales o

del hombre como los designios del Todopoderoso. Esto es lo que permite a Bräker contemplarse desde cierta distancia y narrar su discurrir por el mundo exterior e interior de forma descarnada para, al final de su vida, poder hacer balance sincero.

Amtsblatt National Geographic Books
 Puts the development of chemical ideas in the context of social and industrial needs. This book uses OCR terminology, and contains a glossary of the key terms from the specification. It is structured in line with the OCR specification with colour content, photographs and illustrations.

Band 12, der den Abschluss des Historischen Wörterbuches der Rhetorik

bildet, bietet eine umfassende Bibliographie zu Quellen und Forschungsliteratur.

Deutschunterricht Königshausen & Neumann

Forest Resource Economics and Finance is intended for undergraduate forestry students, but practicing foresters and policy analysts will also find it a useful reference. The text emphasizes economics as a way of thinking in which we compare added costs and benefits of actions in order to maximize net benefits. With the basics of capital theory, readers learn how to evaluate forestry investments in a way that embraces important environmental factors. Another key feature is a focus on analyzing current conflicts and tradeoffs that will continue to be prominent

forestry issues in the 21st century: free market policies versus different levels of government intervention, economic development versus environmental conservation, private property rights versus public amenity rights, and timber versus non-timber outputs. This text also addresses additional topics not often found in other forest economic books including: economics of non-clearcutting management systems, economics of forest damage, risk analysis, inflation, environmental economics, capital budgeting, and regional economics. Add to this a micro-economics review, multiple-use and non-market good analysis, optimal capital management, benefit/cost analysis, timber supply and demand issues, appraisal and valuation, forest industry economics, and world

forestry issues, and you have the most comprehensive forest economics text on the market. In addition to new and updated figures throughout the text, this newly-revised second edition provides an overview of important trends in the modern timber industry including advancements in engineered wood, international trade, global environmental issues, as well as community forestry and agroforestry.

Bibliographie Königshausen & Neumann Named a Best Book of the Year for the Know-It-All by The Globe and Mail In this richly illustrated volume, a leading neurobiologist presents fascinating stories of plant migration that reveal unexpected connections between nature and culture. When we talk about migrations, we should study plants to

understand that these phenomena are unstoppable. In the many different ways plants move, we can see the incessant action and drive to spread life that has led plants to colonize every possible environment on earth. The history of this relentless expansion is unknown to most people, but we can begin our exploration with these surprising tales, engagingly told by Stefano Mancuso. Generation after generation, using spores, seeds, or any other means available, plants move in the world to conquer new spaces. They release huge quantities of spores that can be transported thousands of miles. The number and variety of tools through which seeds spread is astonishing: we have seeds dispersed by wind, by rolling on the ground, by animals, by water, or by a simple fall

from the plant, which can happen thanks to propulsive mechanisms, the swaying of the mother plant, the drying of the fruit, and much more. In this accessible, absorbing overview, Mancuso considers how plants convince animals to transport them around the world, and how some plants need particular animals to spread; how they have been able to grow in places so inaccessible and inhospitable as to remain isolated; how they resisted the atomic bomb and the Chernobyl disaster; how they are able to bring life to sterile islands; how they can travel through the ages, as they sail around the world.

Chemical Storylines. SCB Distributors
Our understanding of the function and structure of chromosomes and their interrelationship has grown in recent

years. The chapters in this issue describe the advances that have been made possible by combining microscope techniques with sophisticated biochemical and genetic approaches to unlock the secrets of chromosomes. The authors look at many aspects of chromosome biology, such as protein, DNA and RNA composition of chromosomes, defined chromosome structures, unusual chromosome structures and specialized chromosomes and microscope tools for chromosome analysis. 'Chromosome Structure and Function' will be an invaluable resource for undergraduate and postgraduate students in fields such as plant and animal sciences, genetics, and molecular biology. In fact, any student, teacher or researcher interested in chromosome

biology will find this special issue indispensable.

Literaturwissenschaft und Linguistik von 1960 bis heute Springer Nature

Peter Stamm's best-selling debut novel, *Agnes*, now available for the first time in the United States. "Write a story about me," Agnes said to her lover, "so I know what you think of me." So he started to write the story of everything that had happened to them from the moment they met. At first, he works with Agnes to create a narrative that is most true to life, but as time passes and he grows more enamored with the narrative he has begun, he continues writing on his own, imagining a future for them after he reaches the present. Happy couples do not necessarily make for compelling reading, and as Agnes sees the

unexpected plot he has planned for her, the line between fiction and reality begins to blur. In this unforgettable and haunting novel Stamm incisively examines the power of storytelling to influence thought and behavior, reaching a chilling conclusion.

Gender, Discourse and the Self in Literature Ediciones Cátedra

A collection of correspondence between Claude Eatherly, a former air force pilot, and Günther Anders, a German philosopher. Eatherly was the pilot who gave the all-clear for the dropping of the atomic bomb on Hiroshima: an action the implications of which he had not known at the time. Returning from the mission and learning of the devastating impact of the atomic bomb Eatherly was unable to calmly accept his role. Though

he was treated as a hero in the press, Eatherly was morally distraught over his actions and felt that he could not silently accept the accolades. Over the course of some 71 letters Anders and Eatherly struggled with the problem of taking moral responsibility in a time when ethics were the last thing that most people seemed to want to discuss. Part of what fascinated Anders about Eatherly – and prompted the former to contact the latter – was precisely this way in which Eatherly sought to take responsibility for something which he easily could have ignored as having been a matter of “just following orders.” *Burning Conscience* is a fascinating and troubling book – not simply because it provides a first-hand account of an oft untold moral story in the aftermath of

World War II, but because the matters being discussed by Anders and Eatherly are as important today as they were during the lives of the correspondents.—
Lib. Ship.

Einführung in die Literaturdidaktik

Walter de Gruyter

Philosophy and technology is a comprehensive collection of selected readings treating technology as a general philosophical problem. Theses essays, by such eminent philosophers as Lewis Mumford, Jacques Ellul, José Ortega y Gasset, and Friedrich Dessauer, are divided into five major categories: conceptus issues, ethical and political critiques, religious critiques, existential critiques, and metaphysical studies. Each of these essays present an in-depth analysis of major arguments and ideas

relevant to the particular area and is designed to bring out opposing viewpoints. The essays span the period from 1927 to the present. Read chronologically, they trace the development of the philosophy of technology as a specific discipline....Philosophy and Technology will serve as excellent source material for undergraduate and graduate students interested in this field as well as in political philosophy, philosophy of science, philosophy of religion, epistemology, and metaphysics" -- **Ciliates** Other Press, LLC

Critiquing the fictive nature of socially accepted values about gender, the authors unravel the strategies adopted by writers and filmmakers in (de)constructing the gendered self in

mainland China, Taiwan and Hong Kong. Съпоставително езикознание Walter de Gruyter

Literaturdidaktik als Teil der Literaturwissenschaft. Von den traditionellen Aufgaben bis zu den aktuellen Diskussionen um die Krise der Interpretation und um die Kanonisierung reichen die Themenfelder. In die 2. Auflage sind die Ergebnisse der Pisa-Studien eingearbeitet.

Burning Conscience: The Case Of The Hiroshima Pilot Claude Eatherly
C. Boschen

Mitbegründet von Walter Jens. Mehr als 300 Fachwissenschaftler wurden gewonnen, um dieses einzigartige enzyklopädische Vorhaben zu verwirklichen. Erstmals in der mehr als zweitausendjährigen Geschichte der Rhetorik werden die klassischen und modernen Begriffe dieser Disziplin in einem Wörterbuch für Fachwissenschaftler, Studenten und Praktiker erschlossen: ein Kompendium unseres gesamten aktuellen Wissens über die Rhetorik. Etwa 1400 Artikel bringen die nicht mehr überschaubare Fülle von Einzelforschungen in eine umfassende und systematische Darstellung. Aufgenommen wurde die gesamte rhetorische Nomenklatur (z.B. Argumentatio, Brevitas, Salutatio, Vetustas) sowie solche Termini, die aus

der Verbindung zwischen Rhetorik und anderen Wissenschaften hervorgegangen sind wie Aufsatzlehre, Biographie, Hermeneutik, Illustration, Klangrede, Predigt, Recherche, Sprachgebrauch oder Zielgruppe. Am Anfang eines jeden Artikels steht eine Begriffsdefinition als Grundlage und Ausgangspunkt für die präzise Erläuterung des Terminus, seiner geschichtlichen und theoretischen Entwicklung und - illustriert mit Beispielen - seiner Verwendung in der rhetorischen Praxis. Hinzu kommen bibliographische Angaben zum aktuellen Stand der Forschung und Stichwortverweise, die den begrifflichen Zusammenhang des Lexikons belegen. Jeder Begriff wird seinem systematischen Gewicht entsprechend in

einem Forschungs-, Sach- oder Definitionsartikel erklärt. Die Übersetzung fremdsprachlicher Zitate erleichtert dabei die Lesbarkeit dieses Nachschlagewerks, das sich nicht nur an den Spezialisten richtet, sondern durch die Verbindung eines hohen wissenschaftlichen Standards mit verständlicher Darstellung ein unentbehrliches Handbuch für alle bildet, die an dieser Disziplin interessiert sind. Dazu gehören vor allem Literaturwissenschaftler, Linguisten, Medien- und Kommunikationswissenschaftler, aber auch Juristen, Philosophen, Pädagogen, Theologen, Musik- und Kunstwissenschaftler sowie alle, die mit dem Medium Sprache praktisch umgehen. Dieses interdisziplinäre Werk

gibt jedem Benutzer ein theoretisches und praktisches Fachwissen an die Hand, mit dem klassische und neuzeitliche Redekunst, Wahrheit und Methode der Rhetorik neu entdeckt werden können. Das »Historische Wörterbuch der Rhetorik« erscheint seit 1992 im zweijährigen Turnus mit einem Gesamtumfang von elf Bänden und ist nur komplett beziehbar.

Torn Away Springer-Verlag
 Günter Kunert, 1929 in Berlin geboren, ist einer der bedeutendsten und vielseitigsten deutschen Schriftsteller der Gegenwart. Bis 1979 Bürger der DDR, stand er in engem Kontakt mit Bertolt Brecht und Johannes R. Becher und unterstützte 1976 die Initiativen gegen die Ausbürgerung Wolf Biermanns. Wie wenige andere

repräsentiert Kunert, dessen breit gefächertes Œuvre neben Erzählungen und Gedichten auch Aphorismen, Essays und Drehbücher sowie zahlreiche andere Genres umfasst, die deutsch-deutsche Literaturgeschichte und die Literatur des wiedervereinigten Deutschlands. Die vorliegende Bibliographie erschließt erstmals und umfassend das gesamte Kunert'sche Werk von 1947 bis 2011 und weist dabei neben seinen eigenständigen Veröffentlichungen auch kleinere, verstreut in Zeitungen, Zeitschriften und Anthologien publizierte Texte nach, daneben in Auswahl wichtige Rezensionen zu seinen Lyrik- und Prosabänden sowie die einschlägige wissenschaftliche Sekundärliteratur. Die Daten sind mit großer philologischer Sorgfalt zusammengetragen, was zum

ersten Mal z. B. die Erschließung der ca. 1.800 Gedichte ermöglicht, die zum Teil auf Grund gleich lautender oder wechselnder Titel bislang nicht immer eindeutig zuzuordnen und aufzufinden waren. Neben den Überschriften werden auch Gedichtanfänge wiedergegeben, danach folgt die chronologische Dokumentation der Editionsgeschichte. Dank eines umfangreichen Registers, das eine Recherche u. a. nach Werktiteln, nach Rezensenten- sowie Herausgeber- und Übersetzernamen ermöglicht, sind die einzelnen Informationen gezielt und rasch auffindbar.

Only Child Virago Press

Surviving a horrific school shooting, a six-year-old boy retreats into the world of books and art while making sobering

observations about his mother's determination to prosecute the shooter's parents and the wider community's efforts to make sense of the tragedy.

Texte, Themen und Strukturen Orca Book Publishers

An “entertaining” look at the psychology and neuroscience behind the act of influencing others (Kirkus Reviews).

People try to persuade us every day. From the news to the Internet to coworkers and family, everyone and everything wants to influence our thoughts in some way. And in turn, we hope to persuade others. Understanding the dynamics of persuasion can help us to achieve our own goals—and resist being manipulated by those who don't necessarily have our best interests at heart. Psychologist Kevin Dutton has

identified a powerful strain of immediate, instinctual persuasion, a method of influence that allows people to disarm skepticism, win arguments, and close deals. With a combination of astute methods and in-depth research in the fields of psychology and neuroscience, Dutton's fascinating and provocative book: Introduces the natural super-persuaders in our midst: Buddhist monks, magicians, advertisers, con men, hostage negotiators, and even psychopaths. Reveals which hidden pathways in the brain lead us to believe something even when we know it's not true. Explains how group dynamics can make us more tolerant or deepen our extremism. Illuminates the five elements of SPICE (simplicity, perceived self-interest, incongruity, confidence, and

empathy) for instantly effective persuasion. “[Split-Second Persuasion]

offers some powerful insights into the art and science of getting people to do what you want.” —New Scientist
