At a UN General Assembly Special Session in 1999, governments recognised unsafe abortion as a major public health concern, and pledged their commitment to reduce the need for abortion through expanded and improved family planning services, as well as ensure abortion services should be

safe and accessible. This technical and policy guidance provides a comprehensive overview of the many actions that can be taken in health systems to ensure that women have access to good quality abortion services as allowed by law.

This volume brings together an interdisciplinary group of scholars from the United States, the Middle East, and North Africa, to discuss and critically analyze the intersection of gender and human rights laws as applied to individuals of Arab descent. It seeks to raise consciousness at the intersection of gender, identity, and human rights as it relates to Arabs at home and throughout the diaspora. The context of revolution and the destabilizing impact of armed conflicts in the region are used to critique and examine the utility of human rights law to address contemporary human rights issues through extralegal strategies. To this end, the volume seeks to inform, educate, persuade, and facilitate newer or less-heard perspectives related to gender and masculinities theories. It provides readers with new ways of understanding gender and human rights and proposes forward-looking solutions to implementing human rights norms. The goal of this book is to use the context of Arabs at home and throughout the diaspora to critique and examine the utility of human rights norms and laws to diminish human suffering with the goal of transforming the structural, social, and cultural conditions that impede access to human rights. This book will be of interest to a diverse audience of scholars, students, public policy researchers, lawyers and the educated public interested in the fields of human rights law, international studies, gender politics, migration and diaspora, and Middle East and North African politics.

The "Microbiology" volume of the new revised and updated Handbook of Enology focuses on the vinification process. It describes how yeasts work and how they can be influenced to achieve better results. It continues to look at the metabolism of lactic acid bacterias and of acetic acid bacterias, and again, how can they be treated to avoid disasters in the winemaking process and how to achieve optimal results. The last chapters in the book deal with the use of sulfur-dioxide, the grape and its maturation process, harvest and pre-fermentation treatment, and the basis of red, white and speciality wine making. The result is the ultimate text and reference on the science and technology of the vinification process: understanding and dealing with yeasts and bacterias involved in the transformation from grape to wine. A must for all serious students and practitioners involved in winemaking.

The AIDS epidemic in Sub-Saharan Africa continues to affect all facets of life throughout the subcontinent. Deaths related to AIDS have driven down the life expectancy rate of residents in Zambia, Kenya, and Uganda with far-reaching implications. This book details the current state of the AIDS epidemic in Africa and what is known about the behaviors that contribute to the transmission of the HIV infection. It lays out what research is needed and what is necessary to design more effective prevention programs.

The essays collected in this volume present a multi-faceted range of scholarship from late antique synagogues, Jewish funerary art, early Christian and Byzantine mosaics, to Byzantine and Jewish book art, and the representation of the Old Testament in Western manuscripts.

**Disaster Management Policies and Practices** Daniele Giacomini

In this book David E. McNabb and Carl R. Swenson blend their different experiences to outline the nature of the crises government leaders now face. Together they provide a foundation of knowledge from which current and future elected leaders, policy makers, and public managers can develop the knowledge and skills necessary to confront these challenges. Merging the historic, academic, and practical aspects of emergency planning and disaster response, the book fills in the missing pieces for creating a guide to understanding the nature and breadth of the work ahead. The authors focus on the principles, framework, and structure of emergency preparedness planning and disaster response and recovery. In doing so, they draw on an extensive literature review, combined with relevant practical examples and insights to create a detailed picture of how to prepare for and respond to the increasing array of emergency crisis and disaster management. Disaster Management Policies and Practices provides a solid foundation in emergency preparedness and disaster response for practitioners, public managers, and those who aspire to such positions. It is designed for use as a resource for scholarly research in the theory and practice of emergency response, public administration, public policy, and governance.

Scientific Study from the year 2007 in the subject Engineering - Communication Technology, grade: none, Ton Duc Thang University, 35 entries in the bibliography, language: English, abstract: This book is resulted from an electrical engineering research project at Ton Duc Thang University - Ho Chi Minh City in Vietnam. In this book, the authors introduce both fundamental theory and practical issues about mobile communication networks, including GSM networks, CDMA-based networks, MC-CDMA and MTC-MC-CDMA networks. Each issue is introduced together with simulation model written in MATLAB and/or SIMULINK. Most part of this book (chapters 2-5) can be used as a useful reference book for undergraduate students who are studying mobile communication, especially about simulation aspect. Other remaining parts is dedicated for graduate students, that is, some sections in chapter 4,5 and the whole chapter 6.

**The Politics of Passion** Giuffrè Editore

The Politics of Passion centers on an old institution among the Afro-Surinamese working class in which women have multiple sexual relationships with both men and women. These women reject marriage because of the bonds of dependency it fosters, preferring to create their own families of kin, lovers, and children. Gloria Wekker analyzes this phenomenon, known as mati work, as she vividly describes the lives of Afro-Surinamese women. She gives an account of women's sexuality that is not limited to either heterosexuality or same-sex sexuality. Her work offers new perspectives on black women's sexuality, the lives of Caribbean women, transnational gay and lesbian movements, and an Afro-Surinamese tradition that challenges conventional Western notions of marriage, gender, and sexuality. By foregrounding the voices of Afro-Surinamese women, Wekker illuminates these women's daily lives in light of the changes occurring in Surinamese society. She also considers the historical, religious, psychological, economic, linguistic, cultural, and political elements that have shaped their lives. The book concludes with stories of women who have migrated to the Netherlands, where they have created new, vibrant mati communities.

NEW YORK TIMES BESTSELLER • “Comprehensive, enlightening, and terrifyingly timely.”—The New York Times Book Review (Editors' Choice) WINNER OF THE GOLDSMITH BOOK PRIZE • SHORTLISTED FOR THE LIONEL GELBER PRIZE • NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The Washington Post • Time • Foreign Affairs • WBUR • Paste Donald Trump’s presidency has raised a question that many of us never thought we’d be asking: Is our democracy in danger? Harvard professors Steven Levitsky and Daniel Ziblatt have spent more than twenty years studying the breakdown of democracies in Europe and Latin America, and they believe the answer is yes. Democracy no longer ends with a bang—in a revolution or military coup—but with a whimper: the slow, steady weakening of critical institutions, such as the judiciary and the press, and the gradual erosion of long-standing political norms. The good news is that there are several exit ramps on the road to authoritarianism. The bad news is that, by electing

Trump, we have already passed the first one. Drawing on decades of research and a wide range of historical and global examples, from 1930s Europe to contemporary Hungary, Turkey, and Venezuela, to the American South during Jim Crow, Levitsky and Ziblatt show how democracies die—and how ours can be saved. Praise for *How Democracies Die* “What we desperately need is a sober, dispassionate look at the current state of affairs. Steven Levitsky and Daniel Ziblatt, two of the most respected scholars in the field of democracy studies, offer just that.”—The Washington Post “Where Levitsky and Ziblatt make their mark is in weaving together political science and historical analysis of both domestic and international democratic crises; in doing so, they expand the conversation beyond Trump and before him, to other countries and to the deep structure of American democracy and politics.”—Ezra Klein, Vox “If you only read one book for the rest of the year, read *How Democracies Die*. . . . This is not a book for just Democrats or Republicans. It is a book for all Americans. It is nonpartisan. It is fact based. It is deeply rooted in history. . . . These four papers supplement the book *Contraception and Reproduction: Health Consequences for Women and Children in the Developing World* by bringing together data and analyses that would otherwise be difficult to obtain in a single source. The topics addressed are an analysis of the relationship between maternal mortality and changing reproductive patterns; the risks and benefits of contraception; the effects of changing reproductive patterns on infant health; and the psychosocial consequences to women of controlled fertility and contraceptive use.

The Darwin Elasmobranch Biodiversity Conservation and Management project in Sabah held a three-day international seminar that included a one-day workshop in order to highlight freshwater and coastal elasmobranch conservation issues in the region and worldwide, to disseminate the result of the project to other Malaysian states and countries, and to raise awareness of the importance of considering aspects of elasmobranch biodiversity in the context of nature conservation, commercial fisheries management, and for subsistence fishing communities. These proceedings contain numerous peer-reviewed papers originally presented at the seminar, which cover a wide range of topics, with particular reference to species from freshwater and estuarine habitats. The workshop served to develop recommendations concerning the future prospects of elasmobranch fisheries, biodiversity, conservation and management. This paper records those conclusions, which highlight the importance of elasmobranchs as top marine predators and keystone species, noting that permanent damage to shark and ray populations are likely to have serious and unexpected negative consequences for commercial and subsistence yields of other important fish stocks.

Formless Formation is an experimental project conceived and co-authored by two performance theorists working in critical aesthetics and political thought. The book is an insurgent revolt, walking side by side with plural and planetary anticolonial forces organizing against debt, expropriative extractive capital, environmental catastrophe, and the militarized policing of people and borders. It is in direct conversation with all Indigenous, Black, Brown, ecological, queer, diasporic movements and struggles against capitalist predatory formations across time and space. Through shared resonances across differing aesthetic life-worlds and solidarities that bypass the nation-state, Ruiz and Vourloumis bring to the forefront performative and aesthetic practices and methods that address current and future social organizing.

The Metasploit Framework makes discovering, exploiting, and sharing vulnerabilities quick and relatively painless. But while Metasploit is used by security professionals everywhere, the tool can be hard to grasp for first-time users. Metasploit: The Penetration Tester's Guide fills this gap by teaching you how to harness the Framework and interact with the vibrant community of Metasploit contributors. Once you've built your foundation for penetration testing, you'll learn the Framework's conventions, interfaces, and module system as you launch simulated attacks. You'll move on to advanced penetration testing techniques, including network reconnaissance and enumeration, client-side attacks, wireless attacks, and targeted social-engineering attacks. Learn how to: -Find and exploit unmaintained, misconfigured, and unpatched systems -Perform reconnaissance and find valuable information about your target -Bypass anti-virus technologies and circumvent security controls -Integrate Nmap, NeXpose, and Nessus with Metasploit to automate discovery -Use the Meterpreter shell to launch further attacks from inside the network -Harness standalone Metasploit utilities, third-party tools, and plug-ins -Learn how to write your own Meterpreter post exploitation modules and scripts You'll even touch on exploit discovery for zero-day research, write a fuzzer, port existing exploits into the Framework, and learn how to cover your tracks. Whether your goal is to secure your own networks or to put someone else's to the test, Metasploit: The Penetration Tester's Guide will take you there and beyond.
