Surrealist Writings on the Cinema Canelo

A certain unlikely hero... Touma Kamijou has the worst luck imaginable... Sure he's a citizen of Academy City, a scientific marvel of the modern world where superhuman abilities are artificially cultivated and commonplace, but when it comes to paranormal talent, Kamijou's been classified a Level Zero—a loser, basically. Oh, he does have one trick up his sleeve (literally), but even that's more trouble than it's worth. When Kamijou encounters a delusional young girl convinced she's a nun and raving about being chased by evil sorcerers, he's eager to send her on her way and get back to failing his studies. Fate, it would seem though, has other ideas, and he suddenly finds himself caught up in a supernatural intrigue with a girl named "Index" at the center! Science and magic collide in this first volume of one of the most popular light novel series ever penned!

A Thousand Things You Didn't Know about Man's Best Friend Simon and Schuster

Arkady and Boris Strugatsky are widely known as the greatest Russian writers of science fiction, and their 1964 novel *Hard to Be a God* is considered one of the greatest of their works. It tells the story of Don Rumata, who is sent from Earth to the medieval kingdom of Arkanar with instructions to observe and to influence, but never to directly interfere. Masquerading as an arrogant nobleman, a dueler and a brawler, Don Rumata is never defeated but can never kill. With his doubt and compassion, and his deep love for a local girl named Kira, Rumata wants to save the kingdom from the machinations of Don Reba, the First Minister to the king. But given his orders, what role can he play? *Hard to Be a God* has inspired a computer role-playing game and two movies, including Aleksei German's long-awaited swan song. Yet until now the only English version (out of print for over thirty years) was based on a German translation, and was full of errors, infelicities, and misunderstandings. This new edition—translated by Olena Bormashenko, whose translation of the authors' *Roadside Picnic* has received widespread acclaim, and supplemented with a new foreword by Hari Kunzru and an afterword by Boris Strugatsky, both of which supply much-needed context—reintroduces one of the most profound Soviet-era novels to an eager audience.

A History From Beginning to End Arcturus Publishing

• Explains how a Vampyre is not a blood-sucking mythical figure but a shaman who is skilled in gathering, using, and storing energy for magical power and personal liberation • Reveals how to gather and store energy from the world around you and shares magical techniques, manifestation methods, and practices to utilize the energy you have collected • Looks at servitors and familiars, vampyric runes, dream architecture, money magick practices, and sex magick techniques as well as advanced practices such as healing with vampyric magick In this initiatory guide, Don Webb explains how to learn from the myth of the vampire to gather, use, and store energy for magical power, manifestation, and personal liberation. A Master of the Order of the Vampyre within the Temple of Set, the author shares a 9-month process to awaken and initiate you as a Vampyre and allow you to actualize your hidden potential. Webb begins by explaining how to gather energy from the world around you and store it in the body, in artifacts and talismans, and in groups of people, such as a coven. Through the 9 stages of initiation, the author offers guided magical techniques, manifestation methods, and experiments to utilize the energy you have learned to gather and store. He also examines familiars, Vampyric runes, money magick practices, and sex magic techniques. Sharing more advanced practices, Webb looks at the creation and destruction of egregores and how to fight off psychic vampires—those who steal your power and energies. Achieve greater self-knowledge, a deeper connection with the energies that surround you, and the power to manifest your deepest desires by walking the path of the Vampyre.

Reflections on Character and Leadership Boydell & Brewer Ltd

Reflections on Character and Leadership is the first of the three books in the Manfred Kets de Vries on the Couch series. Here, Kets de Vries looks at entrepreneurship, the pathology of leadership, and the personality of the leader. The reader will visit the disturbed inner worlds of leaders like Alexander the Great, Shaka Zulu and Robert Maxwell, discover how to distinguish between a cold fish and a live volcano, and identify impostors, despots, organizational fools and global leaders. The book highlights the basic principles of the clinical paradigm—the process of putting organizations and the individuals who lead them on the psychoanalyst's couch. It includes studies of personality archetypes and the effects they have on organizational life and culture—and the effects that organizations have on them. Referring frequently to key management concepts, Kets de Vries looks not only at what happens when things go wrong, but also at how to create the psychological and organizational space to make sure that things go right. About the series: The series offers an overview of Kets de Vries's work spanning four decades, a period in which he has established himself as the leading figure in the clinical study of organizational leadership. The books in this series contain a representative selection of Kets de Vries' writings about leadership from a wide variety of published sources and cover character and leadership in a global context, career development and leadership in organizations. The original essays were all written or published between 1976 and 2008. Updated where appropriate and revised by the author, they present a digest of the work of one of the most influential management thinkers of the present day.

A History of British Identity in 50 Documents MIT Press

From an obscure, misty archipelago on the fringes of the Roman world to history's largest empire and originator of the world's mongrel, magpie language - this is Britain's past. But, today, Britain is experiencing an acute trauma of identity, pulled simultaneously towards its European, Atlantic and wider heritages. To understand the dislocation and collapse, we must look back: to Britain's evolution, achievements, complexities and tensions. In a ground-breaking new take on British identity, historian and barrister Dominic Selwood explores over 950,000 years of British history by examining 50 documents that tell the story of what makes Britain unique. Some of these documents are well-known. Most are not. Each reveal something important about Britain and its people. From Anglo-Saxon poetry, medieval folk music and the first Valentine's Day letter to the origin of computer code, Hitler's kill list of prominent Britons, the Sex Pistols' graphic art and the Brexit referendum ballot paper, *Anatomy of a Nation* reveals a Britain we have never seen before. People are at the heart of the story: a female charioteer queen from Wetwang, a plague surviving graffiti artist, a drunken Bible translator, outlandish Restoration rakehells, canting criminals, the eccentric fathers of modern typography and the bankers who caused the finance crisis. Selwood vividly blends human stories with the selected 50 documents to bring out the startling variety and complexity of Britain's achievements and failures in a fresh and incisive insight into the British psyche. This is history the way it is supposed to be told: a captivating and entertaining account of the people that built Britain.

Ancient Rome: The Rise and Fall of an Empire Canelo

How often does it happen that a single tiny mistake causes an entire civilization to collapse? More often than you think! Readers of Jared Knott's book, *Tiny Blunders/Big Disasters*, will be amazed at the little things that changed history in a bit way. Here are a few examples: A single document poorly designed by one single clerk in one single county changed the outcome of a presidential election and led directly to a major war. A soldier accidentally kicks a helmet off of the top of a wall and causes an empire to collapse. A small mechanical device several inches long fails to function, which changes the outcome of WWII and leads to the death of millions of people. A man fails to gather his army in time to defend against an attack because of the temptation of opium and a young slave woman. And many more! Hypnotic and addictive, these well-researched, factual stories will keep you turning pages far past your bedtime. Human weakness at its very worst at critical moments. This book is the "Butterfly Effect" in human history reviewed.

Spies, Sadists and Sorcerers

This is the story of the greatest empire the world has ever known. Simon Baker charts the rise and fall of the world's first superpower, focusing on six momentous turning points that shaped Roman history. Welcome to Rome as you've never seen it before - awesome and splendid, gritty and squalid. From the conquest of the Mediterranean beginning in the third century BC to the destruction of the Roman Empire at the hands of barbarian invaders some seven centuries later, we discover the most critical episodes in Roman history: the spectacular collapse of the 'free' republic, the birth of the age of the 'Caesars', the violent suppression of the strongest rebellion against Roman power, and the bloody civil war that launched Christianity as a world religion. At the heart of this account are the dynamic, complex but flawed characters of some of the most powerful rulers in history: men such as Pompey the Great, Julius Caesar, Augustus, Nero and Constantine. Putting flesh on the bones of these distant, legendary figures, Simon Baker looks beyond the dusty, toga-clad caricatures and explores their real motivations and ambitions, intrigues and rivalries. The superb narrative, full of energy and imagination, is a brilliant distillation of the latest scholarship and a wonderfully evocative account of Ancient Rome.

Book of Vile Darkness John Wiley & Sons

The illusion that ethnography is a matter of sorting strange and irregular facts into familiar and orderly categories—this is magic, that is technology—has long since been exploded. What it is instead, however, is less clear. That it might be a kind of writing, putting things to paper, has now and then occurred to those engaged in producing it, consuming it, or both. But the examination of it as such has been impeded by several considerations, none of them very reasonable. One of these, especially weighty among the producers, has been simply that it is an unanthropological sort of

thing to do. What a proper ethnographer ought properly to be doing is going out to places, coming back with information about how people live there, and making that information available to the professional community in practical form, not lounging about in libraries reflecting on literary questions. Excessive concern, which in practice usually means any concern at all, with how ethnographic texts are constructed seems like an unhealthy self-absorption—time wasting at best,

hypochondriacal at worst. The advantage of shifting at least part of our attention from the fascinations of field work, which have held us so long in thrall, to those of writing is not only that this difficulty will become more clearly understood, but also that we shall learn to read with a more percipient eye. A hundred and fifteen years (if we date our profession, as conventionally, from Tylor) of asseverational prose and literary innocence is long enough.
