HR managers are under intense pressure to become strategic business partners. Many, unfortunately, lack the technical skills in financial analysis to succeed in this role. Now, respected HR management educator Dr. Steven Director addresses this skill gap head-on. Writing from HR's viewpoint, Director covers everything mid-level and senior-level HR professionals need to know to formulate, model, and evaluate their HR initiatives from a financial and business perspective. Drawing on his unsurpassed expertise working with HR executives, he walks through each crucial financial issue associated with strategic talent management, including the quantifiable links between workforces and business value, the cost-benefit analysis of HR and strategic financial initiatives, and specific issues related to total rewards programs. Unlike finance books for non-financial managers, Financial Analysis for HR Managers focuses entirely on core HR issues. More than ever before, HR practitioners must empirically demonstrate a clear link between their practices and firm performance. In Investing in People , Wayne F. Cascio and John W.

Boudreau show exactly how to choose, implement, and use metrics to improve decision-making, optimize organizational effectiveness, and maximize the value of HR investments. They provide powerful techniques for looking inside the HR "black box," implementing human capital metrics that track the effectiveness of talent policies and practices, demonstrating the logical connections to financial and line-of-business, and using HR metrics to drive more effective decision-making. Using their powerful "LAMP" methodology (Logic, Analytics, Measures, and Process), the authors demonstrate how to measure and analyze the value of every area of HR that impacts strategic value.

Intermediate Accounting by Donald Kieso, Jerry Weygandt, and Terry Warfield has always been, and continues to be, the gold standard. Through significant updates, the 18th Edition presents a refreshed, accessible, and modern approach with new perspectives that help connect students to the what, the why, and the how of accounting information. To move beyond basic understanding, students work through new integrated practice right at the point of learning and high-quality assessment at varying levels, helping them to learn concepts more efficiently and create connections between topics and real-world application. Throughout the course, students also work through various hands-on activities including Critical Thinking Cases, Excel Templates, and Analytics in Action problems, all within the chapter context. These applications help students develop an accounting decision-making mindset and improve the professional judgement and communication skills needed to be successful in the profession.
