Fyodor Dostoyevsky's "Notes from Underground" is considered by many to be the first existentialist novel. It presents itself as an excerpt from the rambling memoirs of a bitter, isolated, unnamed narrator (generally referred to by critics as the Underground Man) who is a retired civil servant living in St. Petersburg. The first part of the story is told in monologue form, or the underground man's

diary, and attacks emerging Western philosophy, especially Nikolay Chernyshevsky's "What Is to Be Done?" The second part of the book is called "Àpropos of the Wet Snow," and describes certain events that, it seems, are destroying and sometimes renewing the underground man, who acts as a first person, unreliable narrator.

Explicating clearly and concisely the full implication of a praxis-oriented language pedagogy, this book argues for an approach to language teaching grounded in a significant scientific theory of human learning—a stance that rejects the consumer approach to theory and the dichotomy between theory and practice that dominates SLA and language teaching. This approach is based on Vygotsky's sociocultural theory, according to which the two activities are inherently connected so that each is necessarily rooted in the other; practice is the research laboratory where the theory is tested. From the perspective of language education, this is what is meant by the 'pedagogical imperative.' *Sociocultural Theory and the Pedagogical Imperative in L2 Education* •

Elaborates a new approach to dealing with the relationship between theory and practice—an approach grounded in praxis—the dialectical unity of theory and practice • Presents an analysis of empirical research illustrating praxis-based principles in real language classrooms • Brings together cognitive linguistics and sociocultural theory – the former provides the theoretical knowledge of language required of praxis and the latter furnishes the theoretical principles of learning and development also called for in a praxis approach • Offers recommendations for redesigning teacher education programs Its timely focus on the theory-practice gap in language education and its original approach to bridging it put this book at the cutting

edge of thinking about Vygotskian sociocultural theory in applied linguistics and SLA.

Spanish remains a large and constant fixture in the foreign language learning landscape in the United States. As Spanish language study has grown, so too has the diversity of students and contexts of use, placing the field in the midst of a curricular identity crisis. Spanish has become a second, rather than a foreign, language in the US, which leads to unique opportunities and challenges for curriculum and syllabus design, materials development, individual and program assessment, and classroom pedagogy. In their book, Brown and Thompson address these challenges and provide a vision of Spanish language education for the twenty-first century. Using data from the College Board, ETS, and the authors' own institutions, as well as responses to their national survey of almost seven hundred Spanish language educators, the authors argue that the field needs to evolve to reflect changes in the sociocultural, socioeducational, and sociopolitical landscape of the US. The authors provide coherent and compelling discussion of the most pressing issues facing Spanish post-secondary education and strategies for converting these challenges into opportunities. Topics that are addressed in the book include: Heritage learners, service learning in Spanish-speaking communities, Spanish for specific purposes, assessment, unique needs for Spanish teacher training, online and hybrid teaching, and the relevance of ACTFL's national standards for Spanish post-secondary education. An essential read for Spanish language scholars, especially those interested in curriculum design and pedagogy, that includes supporting

reflection questions and pedagogical activities for use in upper-level undergraduate and graduate-level courses.
